To whom it may concern:

Peter Pan Seafoods submitted a new NOI on January 16th, 2012. After further review of the document, I realized the President had failed to sign and date the form. I have included the entire NOI with the signature. If you have any further questions, please contact me.

To Whom It May Concern:

I have sent a new NOI for the Dillingham facility for the year 2012. I have included the drawing of the new outfall line that will be discharging in immediate proximity to the existing outfall line. We have added on another structure to our existing operation. This new structure will have a grinder system in place to meet regulatory requirements. We have updated the new purchase pounds and discharge amounts on the NOI application form.
I have also included a copy of the "bottom sampling project" done in 2009, that we submitted to Katy McKerney for our dive survey. She reviewed and approved. We have no settleable solids or pile. We feel having this new building on its own grinder system will help keep the existing grinder system from overloading. Please let me know if there is anything else I can provide you.

Sincerely,
Peter Pan Seafoods, Inc.

Ms. Katy McKerney
Senior Compliance and Enforcement Officer

Dear Ms. McKerney,

Between 6:45 pm and 7:30 pm on June 3, 2009 Peter Pan Seafoods, Dillingham facility conducted riverbed monitoring to ascertain the existence or extent of waste buildup around its discharge pipe. Quality Assurance Manager Colin Johnson performed the sampling from a skiff during the lowest tide of the day (-2 ft at 6:58pm). The end of the outfall line was located by pumping green dye out of the main gurry tank. Ten samples of the riverbed at different points around the outfall were then taken using a retrofitted posthole digger (see map). There was no evidence of any buildup of processing waste. No trace of fish residue was found (See attached photos).

Sincerely,

Colin Johnson
QA Manager
