---

Dave and Aaron,

I discovered an error on the workbook I sent you yesterday afternoon, so please use the attached version of the spreadsheet in any correspondence with the FLMs regarding the project. On the spreadsheet labeled "Crit PTE lbhr Summary", there are two solar turbines listed with emissions computed in bypass mode. In the original application and the modeling done to support the project, only one Solar Turbine was assumed to be in bypass mode at any one time. To avoid confusion, please use the attached corrected workbook.

Thanks!

David R. Jordan, P.E.
