Re: ***Revised NOI Attachment A for General APDES Permit No. AK-G-52-0090 - Ketchikan, Alaska***

Alaska General Seafoods (AGS) is authorized to discharge seafood waste under the terms of the APDES seafood waste permit identified above.

Trident Seafoods (Trident) and AGS have entered into a limited term commercial contract that involves an agreement for AGS to supply Trident with seafood waste and in turn Trident agrees to accept that seafood waste. This agreement is of limited duration. AGS's ability to dispose of its seafood waste stream in this manner is only a temporary arrangement and may be discontinued with little or no notice period. This is our preferred method of handling our waste stream and it is our intent to handle it in this manner subject to having Trident's agreement to terms acceptable to AGS.

In the event that no agreement exists with Trident for any reason or that Trident is not able to accept AGS's seafood waste stream at any time it is our intent to discharge some or all of our waste stream through the outfall pipe or alternately shuttle the seafood waste to be dumped at an approved site at sea.

The amount of seafood waste discharged through the AGS outfall, shuttled for dumping at sea or transferred to Trident is reported in the annual summary submitted to ADEC.

Sincerely,

Gordon Lindquist,
Vice President & General Manager,
Alaska General Seafoods
