C. Plat Schematic #3 –Sitka Processing Waste To Grinders

During January through May 31, all waste is ground and goes to our outfall line in the channel. From June 1 until September 30th, it is estimated that 90% of our waste after being ground is pumped to the M/V Hula Girl for disposal at sea. The balance, 10%, that reaches the floor or during cleanup is ground and discharged to our outfall line. From October 1 until December 31 all waste is ground and goes to our outfall line in the channel.
