NPSI BMP POLICY

NPSI BMP Policy

NPSI understands the need for proper monitoring and management of waste streams and effluent discharges. It is in the best interest of NPSI, Alaska citizens, and the regulators to have a healthy, viable, and diverse marine ecosystem. NPSI expects its employees and contractors to meet the requirements of the APDES and implement the facility's BMP.

NPSI has developed a standardized BMP Policy for its five seafood processing facilities. This standardization ensures that management, engineering, and process workers at each facility have a consistent understanding of NPSI's expectations.
