Re: Approval to Construct Authorization
Trident Seafoods Marine Discharge System, Petersburg, Alaska
ADEC Plan Tracking Number 25282

Dear Mr. Badgett:

Thank you for the onsite wastewater treatment system application filed with the department. The department reviewed the engineering plans and supporting documentation submitted for this seafood processing facility. In accordance with 18 AAC 72.225, Approval to Construct the proposed onsite wastewater treatment and disposal system is hereby granted. A Construction and Operation Certificate is enclosed for your records.

Advisories and Recommendations:

1. Application materials included calculations for a mixing zone. Mixing zones are reviewed, authorized, and administered by the APDES Program. Please contact Jackie Ebert (465-5336) if your project requires a mixing zone.

2. This construction approval is valid for two years. If the project is not constructed within two years, new plans and associated fees must be submitted to ADEC for review and approval.

3. This approval is contingent upon compliance with the conditions of Wastewater Disposal Regulations, 18 AAC 72.235, Construction Certification. The noted section of the regulations requires that a "Certification of Construction" be completed and submitted to the department within ninety (90) days of completion of construction. Record drawings, submitted by your engineer, must indicate any changes or deviations from the approved plans to facilitate final review. A "Certification of Construction" form is enclosed for your use.

4. This approval is contingent upon your receipt of any other state, federal or local authorizations which are required for your project. You are required to obtain all other necessary authorizations before proceeding with your project.

5. You are advised that if this development will require placing fill in wetlands or working in a stream, river, or lake, permits from the U.S. Army Corps of Engineers and the Alaska Department of Fish and Game may be required. A Coastal Projects Questionnaire will help you identify other permits and approvals that may be required for your project.

Any person who disagrees with this decision may request an adjudicatory hearing in accordance with 18 AAC 15.195 – 18 AAC 15.340 or an informal review by the Division Director in accordance with 18 AAC 15.185. Informal review requests must be delivered to the Division Director, 410 Willoughby Avenue, Suite 303, Juneau, Alaska 99801, within 15 days of receipt of the plan review decision. Adjudicatory hearing requests must be delivered to the Commissioner of the Department of Environmental Conservation, 410 Willoughby Avenue, Suite 303, Juneau, Alaska 99801, within 30 days of the decision. If a hearing is not requested within 30 days, the right to appeal is waived.

Please call me at 907-465-5167 if you have comments or questions.

Sincerely,

Robert E. Kimble
Engineering Associate I
