The Evacuation Watch along the Chena Hot Springs Road between mile marker 27 and 39 was lifted. Access restrictions on Chena River State Recreation Area between Mile 27 and Mile 50.5 were lifted. The exception remains on the south side of Chena Hot Springs Road between Mile 27 and Mile 39 which will remain closed. Resources continue to mop up and secure established containment lines. Suppression Repair began on the south west sector. Five fresh crews arrived.

Blown down timber from last year's winter storm continues to present challenges and safety hazards to crews along the fireline. Pioneer IHC continued to remove hazard trees along the fireline to allow for safe mop-up by Type2 crews. The southern perimeter along the Tanana River was monitored by boats. Crews continue to secure the northeast corner of the fire near Mansfield Lake Village.

The fire was reported to Forestry from multiple private parties through Palmer 911 as a structure fire outside of the fire department service area. Helitack 973 responded to scene and found a 0.1 acre fire smoldering in hardwoods. The fire was contained to the area of the sauna which started the fire. The fire was contained, controlled, and called administratively out.

The fire was reported by Palmer 911 as an abandoned campfire that was smoldering and spreading at the bottom of a mountain, with access only by hiking or by 4-wheelers. Butte FD and one forestry engine with 4-wheelers responded. Upon location fire was found to be 0.1 acres, smoldering in grass and duff, burning one foot deep into the duff. The perimeter was secured and mop up was completed. No heat or smoke was found. The fire will be placed in monitor status due to the depth of the burn.

Crew mobilization was the primary focus as five crews were moved in and nine crews were moved out. Crew staffing will facilitate mop-up and rehabilitation efforts aided by weather conditions. The fire area reported 24 hour precipitation at .92" on the portable RAWS and .42" on Stuart Creek for totals of 1" to 2" within the past 48 hours. Overall, rain was heavier at higher elevations and the south half of the fire. Suppression repair on the southwest corner continued and is moving to the west perimeter. Additional dozer line from suppression efforts is being inventoried in the same vicinity.

Crews continued to mop up and secure line in the northwest and northeast corners of the fire. Progress is slow in areas of heavy blow down, mosaic burns, and on steep slopes. Fire weakened trees continue to fall in high winds and the IHC is snagging out line to allow for safe mop-up by type 2 crews. The southern perimeter of the fire continues to be monitored by boats.

At 1504 the fire was reported by a local resident from the Village of Shungnak. The fire was located approximately 1 1/2 miles north of Shungnak burning in tundra, within 200 meters of black spruce and crossing under a power line. One load of smoke jumpers, air attack, and 2 scoopers responded to the fire. The size of the fire increased to approximately 5 acres by end of shift and suppression efforts were effective.

| # 280         | Owner: MIL                  | Cause: Human          |                        |                        |
|               | Name: <b>Stuart Creek 2</b> |                       |                        |                        |

The later part of the afternoon saw substantial drying to the fire area. This helped show smokes along and within the perimeter particularly on the northeast section in Divisions S and A. This area still has two spots across the South Fork of the Chena. One spot is contained and mopped up at 30 acres while the 100 acre spot is contained but has interior heat. Single tree torching appeared soon after the skies cleared. This northeast perimeter still harbors heat throughout as this was the last area of fire movement and is located within extensive black spruce stands. Firebird Spike Camp was reduced to a staging area.

The fire was reported by Palmer 911 as an unattended 20' fire with no people or water on site. One forestry engine, Palmer FD, and Sutton FD responded. Upon arrival the fire was found to be 0.1 acres smoldering in hardwood leaf litter. The fire was contained, controlled, and placed in monitor status due to the presence of bee's not allowing the fire to be fully cold trailed. The cause of the fire is undetermined.

DOF and CES personnel responded to a report of wildland fire at 2327 on 7/21. On arrival personnel found a 5`x5` area smoldering in duff. Suppression action was taken and the fire was called contained. On 7/22 DOF personnel returned to find heat, smokes and flame. The fire continued burning in the duff but had not spread further. Personnel completed deep mop-up on the site and called the fire controlled. The fire has been placed in monitor status.

Today's weather provided ample opportunity for fuels to dry. This prompted active smoldering, making areas of heat more visible to fire fighters which aided mop-up operations. Sporadic single tree torching was observed during today's operational shift. Initial approval has been given to the military to energize power lines and engage in contractor improvements, such as electrical surveys and road maintenance, on the south end of the fire area. Fire Bird Spike has been reduced to a staging area and Lions Spike, near the community of Pleasant Valley, is the primary spike camp exhibiting an increase in fire personal and morning operational briefings.

Crews continue to mop-up deeper on critical portions of the fireline to meet management objectives. Pioneer Peak IHC continues removing hazard trees in advance of Type 2 handcrews. Fire personnel began removing structure protection equipment from all Division. The fire is being mapped by aircraft to inventory the blown down timber for future fire management and possible resource extraction.

|                | Name: <b>Bear Creek</b> |                    | Cause: Lightning              |                         |

Surveillance personnel aboard N114MN flew the fire and reported no activity or growth. The fire was declared out. Per AICC Intel, acreages from fires 305 and 306 were removed from fire 303 and added back to the fire reports of each of those two fires. However, the digitized fire perimeter for 303 still includes the acreages from those two fires (305 and 306) as of today.

The fire was reported by Palmer 911 as a fire in a back yard with spread to wildlands. Two forestry engines, prevention, Palmer FD, and Central FD responded. Upon arrival, the adjacent structure was found to be 50% involved with 0.1 acre wildland involvement in grass. The structure fire department personnel took action on the structure fire while Forestry took action on the wildland involvement. The wildland portion was gridded. It was contained, controlled, and called out. The cause of the fire is still under investigation by the structure fire department. The structure was a total loss.

The day's weather again provided ample opportunity for drying, exceeding the predicted temperatures and relative humidity. Single tree torching is visible but a rare occasion. USAF and US Army activity on the south side of the incident received initial approval entry. Power lines on the south end were energized. Contractor improvements such as road work and electrical surveys were performed by Range Control.

The fire was flown early in the day by aircraft 999FG. One smoke was observed on the far northwest edge of the fire. Dispatch received multiple calls of smoke reported in the vicinity of the fire later in the day. 999FG flew the fire again and reported an increase in fire behavior. The fire had a 2 acre, open flame spot that was putting off a smoke column. The winds were out of the west pushing the fire up the valley, and upslope towards an already burnt area. Plans are to continue working with Lake Clark National Park Service, and continue monitoring the fire.

Suppression Repair Plan for military lands finalized. Rehabilitation effort continues on the west perimeter in Division L, M, N, and P. Fire Bird Staging closed. USAF, US Army and contractor improvements such as road work and electrical surveys continued. Smoldering and creeping fire behavior dominate. Mop up and hot spotting efforts showed good progress.

 Name: **Excelsior** Cause: Lightning

Fire exhibited minimal growth. Acreage was gained on the southern and eastern flanks. Fire behavior observed was creeping and smoldering with isolated spots of rank 3 along the perimeter. The fire received no precipitation. Late afternoon stage 2 cumulus cells with moderate downdrafts increased fire behavior along the perimeter. Decrease in acreage due to more accurate mapping. The fire remains in monitor status.

 Name: **Currant Creek** Cause: Lightning

The fire was flown by aircraft 999FG. The fire was still active with winds pushing an open-flame area upslope directly into a previously burnt spot. Surrounding fuels are a mix of spruce and hardwoods, with a brush understory. The most active part of the fire is a portion backing down into the flats with a 200 to 300 yard perimeter adjacent to the lake shore. Currently the fire is not threatening allotments and shows no signs of crossing south of Currant Creek. The fire is pushing lots of smoke up the valley and away from Lake Clark. Plans for tomorrow are to mob two Park Service personnel who will set up a RAWs station and help with the continuation of monitoring the fire.

The fire was reported by Palmer 911 as a small fire on the side of the road that had just started. Two forestry engines and helitack 973 responded. Upon arrival of one forestry engine there was found to be a 0.1 acre grass spot that had been put out by bystanders. Helitack 973 flew over the area and returned to base, the second engine was released as well. The engine crew cold trailed the fire and determined it to be out. The cause of the fire was a spark from a passing vehicle.

The fire was reported by Palmer 911 as a 12' x 14' fire smoldering near the base of trees. Two forestry engines and Palmer FD responded. Forestry units arrived and found a 0.1 acre fire smoldering deep in mixed hardwoods and in the roots of some white spruce. Personnel on scene put a hose lay around the fire and did mop up and saw work. The fire was gridded and cold trailed; no heat or smoke was found. The fire was turned over to the landowner and called administratively out. The cause of the fire is undetermined.

This fire is being managed by a Type 3 organization several fires in the Tok area. Crews are working to contain critical portions of line to meet management objectives. Structure protection equipment and hose lays have been removed from the fire area. A mission to map the blow down timber from last year's wind storm succeeded in mapping 13,000 acres of blow down.

This fire is being managed by a Type 3 organization managing several fires in the Tok area. Crews continued to mopup and secure critical portions of line to ensure management action points are met. A plan is in place to turn the fires over to a local management team from Tok Area Forestry on July 30th.

The fire was spotted by 840AK doing a detection flight on 7/25. It was found to be a single cottonwood tree that was struck by lightning at 0.1 acres. No action was taken 7/25 due to a rain/thunder storm directly over our base, preventing helitack to take off. Helitack 973 responded to the area on 7/26 and were unable to locate the tree in question. This will remain in monitor status.

 Name: **Currant Creek** Cause: **Lightning**

The fire was flown today by 999FG. The fire was showing significantly less fire activity, and is now putting up multiple small columns of smoke instead of one large one. The fire continues to burn up the fuels on the north side of Currant Creek, and if this pattern holds it will consume the rest of the fuels within a couple days. The fire will be monitored daily, while the weather and indices are warm and dry. Two Park Service personnel remain on the fire.

Crews made good progress working to complete mop-up objectives in the northeast corner of the fire. Work continued to secure line and mop-up in heavy blow-down on the northwest corner of the fire. A reconnaissance flight of Moon Lake and other fires in the area was performed and smoldering, surface creeping, and occasional single tree torching was observed.

Aircraft N909AK flew the fire and reported it to be 3 acres, 70% active, and burning in tundra. Several allotments are located within 2 to 3 miles, and the closest structure appeared to be 6 miles west of the fire. Due to limited resources and limited time left in the day to fly, no action was taken. The fire will be flown again on 7/29.

This fire was reported by J-07 while on a detection flight. It was reported as 5 acres burning in black spruce, 70% active. The fire is burning on top of a south facing ridge. The fire received some rain, and the wind was pushing it to the southwest. There is an allotment two miles south of the fire near the confluence of the Swift and North Swift Rivers, and also an allotment less than one mile away to the east of the fire. The fire plots in Modified protection and will continue to be monitored.

A Lime Village local reported a smoke column 10 miles south east of Lime Village. J-07 responded to the fire from McGrath and reported it as 8 acres, smoldering in black spruce. The fire was 40% active, with no open flames, and no structures were immediately threatened. The fire received some precipitation, but was still putting off smoke in the interior and along some of the perimeter. The fire will be reevaluated tomorrow, and kept in monitor status.

The hot and dry weather has caused a marked increase in fire behavior. Single tree and group torching as well as short duration crown runs were observed. Helicopter buckets and water scooping air tankers were used to suppress a slopover on a critical portion of line on the eastern flank of the fire near Mansfield Lake Village. Crews made good progress towards achieving mop-up standards in the northwest corner of the fire having moved past sections of heavy blowdown. Crews continued to work toward achieving mop-up standards in the northeast corner. The southern perimeter of the fire was monitored by aircraft. The Upper Tanana #1 crew timed out and was demobilized.

Helitack 973 flew over the fire to check it after multiple people called in stating it was smoldering. They landed and hiked into the location. The tree was too hazardous to cut down, therefore helicopter 973's bucket was utilized to do multiple bucket drops on the area. This fire will remain in monitor status.

The hot dry weather caused a marked increase in fire behavior. Established running surface fire, single tree and group torching, and occasional short duration crown runs in interior pockets of unburned fuels were observed. A squad of Yukon Type 2IA crew was shuttled to the fire to address areas of heat identified by aerial infrared operations. Helicopter bucket drops were used to cool areas of concern. The fire is currently unstaffed and will continue to be monitored by aircraft.

The fire was reported by a private party as a smoldering ground fire around mile 106 of the Seward Highway. One Forestry engine responded to the area and were unable to locate it. They requested helitack 973 to respond to the area to assist. Helitack 973 did multiple orbits and was unable to locate the smoke. The reporting party was contacted and with their aid the fire location was found. The cause is escapement from a campfire at 0.1 acres. The fire was contained, controlled, and called out after cold trailing was completed.

Helicopter 212HL responded to the fire from Iliamna due to weather and proximity of the fire. Upon arrival they reported that the fire behavior had increased to 75% active, running and torching with 2 large pockets at the head. ASM A-4, T-55, and T-52 responded from Palmer, while J-07 responded from McGrath and deployed 8 jumpers. Helicopter 212HL returned to Iliamna to pick-up a second load of helitack. As suppression efforts continued, the fire behavior continued to increase at the head of the fire. An effort was made to stop the head of the fire but it was ineffective. The fire is pushing to the south along the right flank. Due to fire behavior, the suppression strategy is being reevaluated. Six jumpers along with eight helitack personnel remain on the fire.

This fire is being managed by a Type 3 organization managing several fires in the Tok area. The hot dry weather has caused a marked increase in fire behavior. Active running surface fire and short term crown runs were observed. Helicopters with buckets and water scooping air tankers were used for a second day to suppress a sloopover on the eastern side of the fire. Crews are continuing to mop-up along the northern section of the perimeter and to hot spot visible smokes on the southern portion of the perimeter along the Tanana River nearest the Alaska Highway. A TFR was put in place over the fire.

The fire was reported by aircraft 1010F as 6 acres, creeping in black spruce with some single tree torching. The fire plots in full protection, and was 5.5 miles southwest of Flat. Helitack and J-07 responded from McGrath, while A-4, T-52 and T-55 responded from Palmer. A mine with several structures was observed approximately 3.5 miles south east of the fire. IC reported later in the evening that the suppression efforts were extremely effective. Six jumpers and 4 helitack personnel remain on the fire.

With no water sources nearby, personnel relied on bucket drops from 212TH to help suppress the fire which was burning in grass and dead and down fuels from a previous burn. The fire burned deep into the matt layer and is requiring extensive mop-up. A total of 32 bucket drops were made over the fire today. The fire is 85% contained.

All personnel conducting direct attack on the fire were relocated to Lime Village to assess and conduct point protection. Smoke jumpers were demobed back to McGrath, and the Lower Kalskag crew was flown into Lime Village. Helicopter 212HL flew the fire in the evening and reported that the southwest side of the fire was burning at a rank 4 with 45-50' flame lengths. The southeast side had lower fire behavior, with 2-4' flame lengths and the north side of the fire was running and crowning with 45-50' flame lengths. Structures were assessed, and point protection will continue to be established.

 Name: **Moon Lake** Cause: Lightning

Crews continued to work with helicopters and a retardant aircraft to secure the slop over on the eastern side of the fire. Crews also continued mop-up in areas of concern on the northern section of the fire perimeter and to hotspot visible smokes along the river on the southern section of the perimeter. Active surface burning was observed, even in the old burn scar. A band of lightning moved through the fire area knocking out communication systems at dispatch and helibase.

The fire was flown by aircraft 909AK, and was reported to have bumped up against the tundra at the north side. The tundra is effectively slowing down the fire, and not much fire behavior was observed on the northern edge. The fire is putting up a large smoke column. No structures are immediately threatened, and the fire remains in monitor status.

Pioneer Peak IHC arrived at the fire and started assessment and prep of a homestead SE of the fire. Kalskag finished the hoselay into Lime Village. Equipment was delivered to the homestead by paracargo and other critical supplies were received in Lime Village. Fire activity was moderated on the north end due to shading by smoke. Heavy smoke also hindered movement of crews for point protection. Strong SW winds produced torching in areas of black spruce later in the afternoon.

The fire is being managed by a type 3 organization managing several fires in the Tok area. Numerous rain showers over the past couple of days raised fuel moisture enough to diminish fire activity. Crews prioritized work to secure a slopover on the eastern side of the fire. Crews continued mopup along the line on northern and southern sections of the perimeter. The Grayling crew demobilized and two additional type 2 crews mobilized and are in place on the fire.

Fire was 90% active, with the southern end backing actively into an old burn. Pockets of spruce on the north end caused spotting across the Stony river that burned towards fire #144. Pioneer Peak IHC continued prep at the homestead, and Kalskag continued prep at Lime Village. A Type 3 helicopter arrived at the fire and was utilized to complete a thorough recon of values at risk to the south. Some light precip occurred over the fire area.

Fire personnel took advantage of high fuel moistures from numerous rain showers in the past two days to secure critical sections of fireline in advance of hot, windy weather predicted for the area. The management objective is to prevent fire spread toward values at risk while allowing it the fire to burn naturally to the north. Crews continue to work to secure the eastern flank of the fire to prevent growth toward Mansfield Lake Village. Mop up continued in pockets of heat in white spruce along the Tanana River and on portions of the northern edge of the fire. Blown down timber from last years wind storm continues to present a challenge for fire personnel.

This fire is being managed by a type 3 organization managing several fires in the Tok area. Management objectives for keeping the fire from spreading to Tetlin Village lands to west have been met and the fire is being allowed to burn naturally to the east where no values are at risk. The fire was not flown yesterday due to higher priorities. The fire will remain in monitor status and be patrolled by aircraft.

 Name: **Mendeltna Creek** Cause: Lightning

A lightning caused 1 acre fire in spruce was knocked down with bucket work from 73LF. When the fire began spotting, a load of retardant was requested, which slowed the fire's spread long enough for ground personnel, traveling in difficult terrain, to gain access. Mop up is expected to require 2-3 days.

There was a transfer of command from a Type 4 incident to a Type 5. The Fort Yukon #1 crew mobilized to the fire this afternoon. The Midnight Suns IHC were reassigned from this fire to the Stuart Creek 2. H-920, N112BH and a BE-1900 were used to move the crews. Firefighters continued with mop up and snagging operations.

High temperatures and low humidities contributed to another day of active fire behavior. Wind speeds in the area were lower than predicted. Burnout operations were successfully conducted in Division C, supporting control objectives to keep the fire north of Brigadier Road and within the impact area. Using aerial ignition, approximately 2 miles of line was burned - totaling 300 acres. Structure protection was in place and resources on scene around military assets. Similar operations will likely continue through today. Mop up continued in Division S and the southern portion of Division A. Division R resources will continue to patrol. Seeding continued in repair areas on the west side of the fire. Aircraft, including air attack, scoopers, retardant planes, and helicopters will be vital to minimize potential fire spread, assure continued containment around the fire perimeter and support burnout operations during the next operational period. Midnight Suns were released from fire 588 and joined Stuart Creek 2 suppression forces in the PM.

|               | Name: <b>Can Creek</b>  |                      | Cause: Lightning              |                         |

Precipitation received over the fire area in the afternoon moderated the fire spread. Pioneer Peak IHC secured the spot that had crossed the Stony River by tying it into cold black from the Lime Hills fire. Kalskag continued structure prep at Lime Village. Smoke and weather conditions created poor visibility which hampered aviation activities.

Crews in Division W with the assistance of bucket helicopters made good progress securing the slopover in the Eagle Trail burn scar. A large pocket of fuels south of H-18 continued to burn out, but posed no threat to the line. In Division T, the Yukon crew continued to fall hazard trees along the Tanana River allowing mop up of heat with potential to spot across the river. Arctic and Delta #2 crews continued to mop up east from H-30 on the northwest corner of the fire.

This fire is located 50 miles northeast of Tok in an area of Limited suppression option where no values are at risk. The fire is being allowed to spread naturally. Infrared aircraft flew over the fire and detected small areas of isolated heat. The fire will remain in monitor status and continue to be patrolled by aircraft.

The fire is being managed by a Type 3 organization managing several fires in the Tok area. Management objectives to prevent fire spread west on native lands have been met and the fire is being allowed to spread naturally to the east where no values are at risk. Aircraft that patrolled the fire observed smoldering and creeping with occasional single tree torching in pockets of unburned fuel in the interior but no notable perimeter spread.

Fire personnel on helicopter 361EH reported this 10 acre fire at 1822. Fire behavior was smoldering and creeping with isolated torching in black and white spruce with mixed hardwoods and a low rate of spread. J-12 responded and deployed 8 smokejumpers on the fire at 1858. Smokejumpers continued cutting a line for a hose lay to the fire. A Type 1 crew was requested for tomorrow's operational shift.

911 dispatch reported a smoking tree on a powerline. Two forestry engines and the Rural Deltana VFD responded. The VFD was released. The powerline burned through the tree and when it dropped to the ground, forestry personnel safely initiated suppression action. The fire was contained and controlled. The fire was placed monitor status.

The fire was reported by a private party as a 10 x 10 smoldering spot on top of a ridge. Once plotting the fire on a map, it was shown to be in Limited. Air attack 9FG responded to recon the fire. JBER also sent a brush truck to try to locate it. After multiple orbits, 9FG was unable to locate the fire and returned to base. This fire will be placed in monitor status. The cause at this time is unknown.

AST requested DOF respond to vehicle fire which spread to the wildlands. Vehicle was located 1/4 off the roadway and was in black spruce. On arrival the vehicle was fully involved and putting up thick black smoke. Personnel waited for CES to extinguish the vehicle so they could suppress the wildlands that were involved. The fire was called contained, controlled and was placed in monitor status.

While responding to a reported fire by Chatanika Lodge (fire 648), ASM A-4 reported the Long Creek fire. All aerial and ground resources being dispatched to fire 648 were then reassigned. The fire grew to 40 acres and around 2130 A/A 35E reported the fire activity to have moderated. At the time of this report, fire resources continue to suppress the fire and await crews and equipment en route.

Fairbanks Area Forestry received a smoke report from Alaska State Troopers regarding, "something burning near Chatanika Lodge." ASM, engines, air tankers, jumpers, helitack, and heavy equipment were dispatched. The something burning turned out to be the Chatanika Gold Dredge. As that was discovered fire 649 was reported and all resources were reassigned. After monitoring that the dredge fire wasn't going to spread to the wildlands, fire 648 was declared out.

The Fort Yukon #1 crew continued full suppression activities today, successfully mopping up the fire one chain in from the perimeter. The fire is burning deep in the Upper Yukon Lake shore peat moss, creating numerous smoldering ash pits. Creeping and smoldering fire behavior was observed as temperatures peaked in the high 80's and RH dipped to 21%. Mop-up and gridding in the green will continue through the next operational period.

Using aerial firing, Chena and Midnight Sun IHC's assisted in completing a burnout which will secure the fire within the road system. Objectives for the burnout were met, though the area will require monitoring for any flare-ups in remaining green pockets near the perimeter. Patrol and monitoring of the Chena River continued where afternoon winds, low humidity, and dry fuels led to increased activity in interior green islands. A cabin site within a green island is threatened by surface fire, and action will be taken to protect the site once again. Firefighters continued to hotspot and mop-up near the South Fork Chena River. Rehab Group continued to repair areas on the southwest side of the fire. Continued concerns remain near contained areas along the perimeter, where widespread pockets of unburned fuel and dozer berms continue to hold heat. Continued warm, windy, and dry weather will require extensive monitoring around the fire perimeter to assure containment lines remain secure, as resources are dispatched to threatened areas as needed.

|             | Name: <b>Crater Creek</b> |                      | Cause: Human        |                     |

This fire was first reported by a Venetie resident as a smoke approximately 20 miles north of town. The sighting was verified by Fort Yukon helicopter 361EH and was plotted in full protection. 12 Jumpers were deployed on the incident at 2013. They reported the fire to be 250-300 acres with a 50% active perimeter, 2 foot flame lengths, burning in brush, grass and tundra. No known structures were immediately threatened. Scoopers 264, 267, T-52 and ASM A4 supported the initial attack until 2400. Limited water resources and sloping terrain to 40% are expected to challenge suppression efforts and warrant additional resources during the next operational period. This fire area has received no recent precipitation.

The fire was reported by Houston Brush 9-1 as a 40 x 50 smoldering brush pile. One forestry engine, prevention, and other Houston fire apparatus responded to scene. Houston fire department had the fire contained and controlled at 0.1 acres upon forestry's arrival; houston personnel turned the fire over to forestry and departed the scene. Forestry personnel cold trailed the fire and left it in monitor status due to the depth of the burn. The cause of the fire was fireworks.

Fire personnel on Helicopter 361EH landed at the cabin site at 1715. The cabin site was under 98% cloud cover with moderate to heavy precipitation. At 2007 personnel on surveillance aircraft reported the fire being within 1/2 mile to the cabin and advised to get people on the site. Four smokejumpers were dropped at the cabin site for point protection but were unable to burnout due to the area receiving some precipitation. The fire and weather will be monitored by personnel on the ground.

A squad was flown to a cabin site, where they mopped up areas of heat threatening a structure. Boat patrol continued on the Chena River. Crews monitored and patrolled the burnout from 8/3, which appears to have been successful in securing the fire within the road system, south of the Impact Area. The fire slowly advanced in a few areas where military values continue to be threatened within the Impact Area. Division A was wrapped up and is prepared for a 8/5 demob. Air attack patrolled the fire area and found no additional areas of heat threatening containment. Suppression repair continued on the west side of the fire. Power will be restored to sites in and around the Impact Area on 8/5. A TFR remains in place.

In Division T, Arctic Village and Delta #2 made good progress mopping up 300 feet in east from H-30 with the assistance of one squad from Yukon. The rest of the Yukon crew, with the assistance of bucket helicopters, made good progress falling hazard trees and mopping up a 5 acre pocket of heat along the Tanana River near Cathedral Rapids. In Division W, Tanana Chiefs worked with Upper Tanana #2 securing and mopping up the slopover in the 2010 Eagle Trail fire scar and constructing two new helispots. A pocket of heat on the northern edge of the fire in Section 2 developed into a wind-driven crown fire that ran one and a half miles to the northeast onto the ridge above H-18. Air Attack was ordered, and one load of retardant was dropped above H-18 to keep the fire from cresting the ridge. Bucket helicopters were used to check the spread along the western flank of the run. The Tanana Chiefs crew returned to ICP to begin days off. They are expected to return to the fire on 8/8.

## New - DOF

Daily Report From: 08/05

**3.0 Acreage On 08/05**

**HT43** Lat: **63:22:37.4** Status: **S/U** Acres: **3.0** Option: **CRITICAL**  
**313666** Lon: **143:22:40.9** Personnel: **25** Start Date: 8/5/13 Area: **TAS**  
**PNHT43** Legal: 19N 11E 31 C Out Date:  
#666 Owner: NCA Admin: Tanacross Corporation  
Name: **Tanacross Dump 2** Cause: Human

The fire size is 3 acres burning rank 2 to 3 in spruce and heavy blow down, creeping and running in continuous heavy fuels. The wind was 3 to 5 out of the south. The village of Tanacross was threatened. Crews put a saw line and hose line around the entire perimeter of fire. Two tanker drops of retardant boxed in the fire and line was supported with 2 heli's and engine crews.

Daily Report From: 08/05

**0.1 Acreage On 08/05**

**301665** Lat: **61:33:28.4** Status: **Out** Acres: **0.1** Option: **Critical**  
Lon: **148:55:01.4** Start Date: 8/5/13 Area: **MSS**  
Legal: 17N 3E 16 S Out Date: 8/5/13  
#665 Owner: STA Admin: L&W-Lands and Waters  
Name: **Maud Road** Cause: Human

The fire was reported by a private party as an unattended smoldering campfire burning deep into the roots of a tree. One forestry engine responded and found a 0.1 acre smoldering in the duff. The fire was contained and controlled upon their arrival. The fire was mopped up and cold trailed; no heat or smoke was found. The fire was called out.

Daily Report From: 08/05

**0.5 Acreage On 08/05**

**304664** Lat: **61:26:49.8** Status: **U/U** Acres: **0.5** Option: **Modified**

Name: **Crater Creek** Cause: Human

Twelve jumpers today continued line and helispot construction in preparation for the arrival of their requested resources. Chena IHC was released from Fire 280 and transported to the incident via fixed wing and rotor shuttles. Late in the day the Koyuk T-2 Crew was also mobed to the incident. Scoopers 264 and 267, along with air attack were valuable tactical tools throughout the day as water availability is scarce. The fire continues to gain acreage burning in grass, brush and tundra of the 2004 Pingo burn. Moving 2-3 additional crews to the fire and a remote refueling site to Venetie will be the logistical priorities for 8/6.

| Assigned Crews: |        | Assigned: |

The fire area was flown 8/5 by N309VS. Under 90% cloud cover, 2% of the perimeter was active exhibiting smoldering and creeeping behavior, with 1-2 foot flame lengths. All observed fire activity was noted in the north, with some associated spread to the north and east. Smokejumpers continue to prep and secure a federal cabin which was recently threatened by increased local fire activity. Light showers in the area yesterday postponed options to burn out around the structure.

Divisions A and S demobed this afternoon. The Chena IHC were reassigned to Fire 661 and White Mountain T2IA were released. Firefighters continued to monitor along the river and cabin sites on Division R and the fire area along Quarry Road, Brigadier Road and North Camara Road in Divisions B and C. Repair personnel completed seeding in IPBC and North Beaver Creek Road. Personnel will continue to patrol and monitor the fire. A TFR remains in place.

The northern edge of the fire made another run today, this time to the northwest. Group torching with column development and 3-400 foot spotting was observed. In Division T, Arctic Village and Delta #2 made good progress mopping up 300 feet in east from H-30 and developed a medevac site in their work area. Most of the Yukon crew made good progress falling hazard trees and mopping up a 5 acre pocket of heat along the Tanana River near Cathedral Rapids. In Division W, Upper Tanana #2 continued securing and mopping up the slopover in the 2010 Eagle Trail fire scar. A squad from Yukon worked an area of line in the vicinity of H-20. Bucket helicopters were used to cool the northern edge of the fire and reduce the likelihood of additional growth. A squad from Yukon was used late in the afternoon to assist Tok Area with an IA at the Tanacross landfill. Helicopter 214TH went out of service this afternoon with mechanical issues. It is unclear how long before it becomes available again.

 #414 Owner: STA Admin: L&W-Lands and Waters  
 Name: **Tetlin Jct Ridge** Cause: Lightning

Heavy clouds were present over the entire fire during the NIROPS infrared heat detection mission. No portions of the perimeter could be analyzed. Aerial reconnaissance in 78C verified that activity on the eastern portion of the fire increased throughout the day and developed an organized flame front with column development and acreage gain on State lands to the northeast across the Ladue River and on to the slope in Sections 26, 22 and 23. The fire continues to smolder on the north central and south central portions of the fire, but poses no threat to containment.

Dry site conditions, active fire spread in a variety of fuel types, lack of natural barriers and rugged local terrain have increased the fire complexity to a Type 3 incident. The fire suppression strategy has been modified from extinguishing the fire-- to halting the fire's progression to the east. Fire behavior today was smoldering, creeping and short runs with 5-10 foot flame lengths in dead and down fuels. The fire is currently burning in large topographic bowl which is creating squirrely winds and affords negligible features for anchoring and safely inserting crews. Minimal water resources on the fire and on site weather today warranted the need for Scoopers 264, 267, T-52, T-55, Air Attack and 35E. Limited local refueling capabilities for essential air supporting resources has mandated the establishment of a temporary fueling site in Venetie and the enhancement of refueling capabilities at Fort Yukon. Helicopters 361EH and 508EH are supporting the fire out of Fort Yukon. Venetie staging is concurrently being set-up. Of the total 5 crews assigned to this incident, three were staged off-incident as new strategies and safety considerations are implemented.

Several showers from isolated cells and the hard work of sawyers and the Venetie # 2 crew have contributed to the 100% containment of this incident, as of today. Per the I.C. "This fire is looking good!". Mopping up of all visual smokes, continued gridding of the green and the clearing out of unburned fuels will continue to be operational priorities over the next 2 burning periods.

The fire was flown 8/6 by NPS H-58191. Under 90% cloud cover - 30% of the perimeter was active exhibiting smoldering, creeping, backing and isolated torching. 1-3 foot flame lengths were observed. With south winds estimated at 15mph - all current fire activity was noted in the northern portions of the fire. To the north and NE, the fire was burning slowly through the old 2011 fire scar. On the fire's western edge, 4 smokejumpers continue to secure structures and prep fuels for possible burn-out operations, as warranted. Chinook wind conditions have contributed to fire behavior and falling trees.

The northern edge of the fire made a large run to the north and northwest, pushed by wind and topography. Active crown fire and spotting was observed. A large terrain-driven convection column developed in the early afternoon and built until the evening. In Division T, Delta #2 continued to make good progress mopping up 300 feet in east from H-30 with the support of helicopter bucket work. Buckets were also used to cool an area of heat along the Tanana with some potential to spot across the river. In Division W, Yukon continued securing and mopping up the area around H-20 and the slopover in the 2010 Eagle Trail fire scar. An information officer visited the community of Tanacross and was able to answer questions and provide current information. Upper Tanana #2 and the Forest Service R10 crew worked for Tok Area on fire 666 and initial attack.

NIROPS Infrared detected significant heat and perimeter growth on the eastern edge of the fire this morning. MODIS confirmed the activity and showed additional growth to the northeast in the afternoon. A well-developed column was visible from Tok, and from the Taylor and Alaska Highways. An information officer hiked in to the Bible camp at 4 Mile Lake on the Taylor Highway and was able to answer questions and provide current information. There is no threat to the camp or other values at this time.

Name: **Crater Creek** Cause: Human

Dry site conditions, active fire spread in a variety of fuel types, lack of natural barriers and rugged local terrain have increased the fire complexity to a Type 3 incident. The fire suppression strategy has been modified from extinguishing the fire, to halting the fire's progression to the east. Fire behavior today was smoldering and creeping with short runs of 5-10 foot flame lengths in dead and down fuels. The fire is currently burning in a large topographic bowl which is creating erratic winds and difficulties for anchoring and safely inserting crews. Minimal water resources on the fire and on site weather today warranted the need for Scoopers 264, 267, T-52, T-55, Air Attack and 35E. A temporary fuel site was established in Venetie and a fuel bladder was set up in Fort Yukon. Venetie is the staging area for the fire. Helicopters 361EH and 508EH are supporting the fire out of Fort Yukon. Of the total five crews assigned to this incident, three were staged off-incident as new strategies and safety considerations are implemented. The Chevak #2 and Arctic Village crews will be transported on 8/8 to the fire.

Several showers from isolated cells, sawyer work, and the Venetie # 2 crew have contributed to the 100% containment of this incident. Mopping up of all visual smokes, continued gridding of the green, and the clearing out of unburned fuels will continue to be operational priorities over the next two burning periods.

Fire personnel on detection ship N114MN reported a 40% active perimeter at 1812. Fire behavior was smoldering and creeping with single tree torching in black spruce and tundra. There our two fingers coming off the west flank of the fire on a flat slope. Winds were out of the east 5 mph with a 80% cloud cover and no precipitation. Four smokejumpers are still engaged in cabin protection and successfully completed a burnout around the cabin during the operations shift.

Fire personnel on detection N309VS ship reported a 22% active perimeter at 1613. Fire behavior was creeping and running with single tree torching. The north end of the fire was showing the most activity with 3-5 foot flame lengths spreading to the north. Some activity was also observed on the east side. Winds were out of the south 10-12 with a 20% cloud cover and no precipitation. On the fire's western edge, 4 smokejumpers continue to secure structures and burnout operations on the southeast side of the cabin. Smokejumpers continue to secure the line around the cabin.

Firefighters continued to monitor containment lines around the fire. Personnel patrolled the Chena River by boat. Areas of concern in the Impact area were patrolled and monitored from the air, and the fire continued a slow eastward advancement in to the Glacier Creek drainage. Initial plans were established for a potential burnout to check the fire's southward progression on the east side of the impact area. Military training exercises on the ground and air were coordinated with incident personnel. A TFR remains in place.

Yesterday, driven by strong southeast winds, the fire made a narrow, 100 acre, one mile-long run to the northwest beginning just east of the existing containment line in Section 24 on Division Z. NIROPS IR detected numerous heat sources along the northern edge and additional acreage gain at the northeastern edge of the fire. In the morning, helicopter buckets were used to check growth on the finger in Section 24. In the afternoon, an attempt was made to walk two dozers in to tie existing line into the old burn in order to prevent additional growth to the west toward Tetlin Corporation lands, the Taylor Highway, and 4 Mile Lake. The dozers were unable to access the ridge and returned to the highway for demob. Delta #2 will be flown in to H-12 tomorrow to begin securing the area. Decrease in estimated acreage due to more accurate mapping.

Yesterday the fire made a large run to the ridge to the north and west. Cloud cover and elevated humidities dampened fire behavior today, and the fire is smoldering in tundra on the ridge and backing down the slopes to the northeast. In Division T, Delta #2 met containment objectives in the vicinity of H-30. Fire activity along the Tanana River was minimal. In Division W, Yukon continued securing and mopping up the area around H-20 and the slopover in the 2010 Eagle Trail fire scar. Upper Tanana #2 was flown in to Mansfield Village to reinstall structure protection at sites in the Village and around the lake.

Fire personnel on detection ship N114MN reported a 40% active perimeter at 1723. Fire behavior was single, isolated and group torching in black spruce. The west flank of the fire is between the break in the hills and the flats. The fire is not very active on the north portion but there are a few spots with minimal growth. There is a big finger that ran to the west in sections 23, 22 and parts of section 21, 20 and 19. The run is four miles to the west and one mile wide burning in black spruce. The fires west edge is approximately 3.5 NM from the Circle Hot Springs Airport. Winds were east 5-10 mph and 70 degrees with no precipitation. The fire remains in monitor status.

Fire personnel on Husky 40HU reported running, single and isolated torching in white spruce, willow, and brush at 1600. The fire was burning on a flat aspect with winds out of the east southeast 10-20 mph 78 degree temp and a 22% RH with no precipitation. The fire was responding to very dry and windy conditions. The perimeter along the western edge was showing the most activity with ground and aerial torching. The eastern perimeter was showing new growth burning adjacent to the old 2010 fire scare. The fire remains in monitor status.

The fire was flown by aircraft 1010F at 1400. Multiple smokes were observed with one smoke in particular on the southwest corner that was putting up a decent smoke column. Fire activity on the southwest was showing active flames, but burning directly into an already critically burnt area. The east side of the fire was backing into the wind which was coming out of the valley and pushing downriver. At 2000 aircraft 1010F flew the fire again and reported that the winds had shifted more towards the south. The fire was no longer backing towards the creek, but more parallel to the creek at that time, and exhibiting some isolated torching. The fire was receiving light precipitation, and is no immediate threat to structures, allotments, or Lime Village. Due to predicted winds, the fire will continue to be monitored through-out the day tomorrow.

Dry site conditions, active fire spread in a variety of fuel types, lack of natural barriers and rugged local terrain are creating problems for control. The fire suppression strategy has been modified from extinguishing the fire to halting the fire's progression to the east. Helicopters 361EH and 508EH are supporting the fire out of Fort Yukon. The Chevak #2 and Arctic Village crews were transported to the fire. Critical resource needs are a Type 1 Crew, 2 Type 2IA crews, a Type 2 Helicopter, 2 CL-215s, Air Attack, the 12 smokejumpers currently on the fire and Plans unit leader. The terrain and fuels are dictating the use of suppression crews at this time. Fire behavior observed was creeping and smoldering with short runs with 1-3 foot flame lengths in dead and down timber.

The fire continued to advance east in to Glacier Creek Drainage on the east side of the Impact Area. Activity was observed over widespread areas of the fire in unburned islands, and re-burn was observed in the black. Threats to existing containment lines remain a concern; and monitoring a challenge around the large fire. Various military sites in and around the Impact Area remain threatened. Aerial and ground-based military training exercises are requiring extensive coordination. AA-9AK and Scoopers 264 and 267 responding to a flare up that threatened containment in Divs M. Fire personnel will mop up the area on 8/9. A TFR remains in place.

Division T staffed the DOT Overlook Lookout and the Tower Lookout. A 1/4 acre slopover just west of H-30 was knocked-down with buckets. In Division W, Yukon and Gannett Glacier continued securing and mopping up the area around H-20 and the slopover in the 2010 Eagle Trail fire scar. Upper Tanana #2 made good progress plumbing the structures in Mansfield Village. The northeast flank of the fire continues to back down the ridge west of H-18. The fire burned northwest toward the ridge in Sections 32 and 29, and developed a large convection column. Divisions T and Q were relatively quiet along the Tanana River, exhibiting creeping, smoldering fire behavior with occasional torching. The eastern edge of the fire was relatively active in the vicinity of H-20 and the slopover in the old burn.

Strong southerly winds fanned the fire throughout most of the day. A DOF engine observed a large sheared off column advancing through continuous black spruce at the north end. Multiple isolated runs to the north off the east flank were also observed. Acreage gain not reflected as the fire was not flown today.

FS LEO responded to a report of a fire along the Glacier Hwy. Upon arrival FS LEO notified FS Fire personnel and reported a fair amount of a smoke drifting on to the highway. Engine 533 responded and FS personnel commenced suppression action with the use of pumps and hand tools. At 1700 FS personnel determined this fire to be contained.

The Chena IHC was reassigned to Fire 117 for structure protection. Six smokejumpers were demobed for higher priority fires. The fire grew to the west and northwest. Crews held line in DIVS Z and continued to construct line in DIVS A and Y to construct direct line to support the CL215s. Firefighters will continue to construct and hold line.

Fire personnel on NPS ship 191 reported a 60% active perimeter at 1030. Fire behavior was smoldering and backing with isolated torching in black spruce, tundra, tussock tundra, and hardwood mix. Direction of spread was to the north in the flats. Winds were to the south 30 mph with 90% cloud cover and no precipitation. Four smokejumpers were demobed off the fire with helicopter 920 and replaced with a 5 person squad. Fire personnel continue to secure the line around the cabin.

Temperatures and humidity moderated fire activity due to a heavy inversion and trace precipitation. Smoke reduced visibility, limiting flight opportunities and aerial monitoring until late in the shift. The evening fire behavior was observed as open flame backing actively in green hardwood stands. Continued monitoring will be essential to evaluate trigger points for future suppression efforts. Part of the Midnight Sun IHC mopped up areas of heat near containment lines in Division M. The remainder of the crew prepped military assets and tested hydraulics at multiple locations in Division B. Engines patrolled Quarry and Brigadier Roads in Division C. Various military sites in and around the Impact Area remain threatened, and aerial and ground-based military training exercises are requiring extensive coordination. An incoming Airspace Coordinator will facilitate airspace issues between the incident and military beginning 8/10. The Midnight Sun IHC will demob 8/10. A TFR remains in place.

The fire is now being managed by a Type 3 organization. The Alaska Type 1 Team has been ordered for 8/9/13. The fire has escaped military restricted area, threatening numerous structures and state timber units. Observed fire behavior was running, spotting and torching. The fire has moved out of old growth timber and into open tundra, spruce and hardwoods. The fire is wind driven. Large growth is expected as weather conditions remain hot, dry and windy. Pioneer Peak IHC and 8 smokejumpers were deployed for cabin protection. Firefighters will continue to do site protection and to utilize air resources to slow the spread north. Chena IHC were reassigned to this fire.

Delta #2 made good progress today securing the west side of the finger in Section 24. Buckets were used to support the crew and knock down heat at the northern tip of the finger. Cloud cover obscured the fire during the early AM NIROPS IR mission and no data was returned. The fire continues to creep uphill on the northeast corner. There was no column today, but considerable smoke is drifting towards Chicken.

(Crew names reflected on Moon Lake Incident.)

NIROPS IR detected large areas of intense fire and creeping growth along the northeast portion of the perimeter. The fire was monitored in 4GW at 1730 under 60% cloud cover with SW winds at 5 mph. The fire was 20% active, creeping upslope to the northeast in fireweed and tundra in a 2004 burn, and backing into the wind on the south end, creeping in the 2004 burn.

A passing aircraft reported a smoke just off the Alaska Hwy. Two engines and helio 212HL were dispatched. Helitack was deployed. Due to very deep burning, 212HL assisted suppression with bucket work. ATVs with Fedcos were also sent to the fire. Preliminary investigation indicates ignition from an equipment source such as an ATV exhaust. The fire was worked until midnight. The IC plus two stayed on scene overnight and will resume suppression in the morning.

The fire grew to the west and northwest. Crews held line in DIVS Z and continued to construct line in DIVS A and Y to construct direct line to support the CL215's. Firefighters will continue to construct and hold line. This fire is staffed with 5 Type 2 crews and several overhead. Lack of resources hindering line construction progress.

Temperatures and humidity along with a trace of precipitation moderated fire activity during the morning hours. The fire actively crept through hardwood stands and remained active throughout the day, accelerating when the inversion lifted. Gusty winds occurred over the fire area and increased fire behavior in the Stuart Creek drainage. Division M remained staffed with resources who cut out and mopped up hotspots along the fires edge. Aerial resources were utilized for recon and bucket work on hotspots with potential to threaten line containment. Division C patrolled Quarry and Brigadier Roads and monitored fire progression in the Stuart Creek drainage. Resources also tested site protection and water shuttling methods on military assets. Various military sites in and around the Impact Area remain threatened. Aerial and ground-based military training exercises are requiring extensive coordination by the IMT and military contacts. The Midnight Sun IHC was demobed and were replaced by the North Star Fire Crew. A TFR remains in place.

The fire is now being managed by an Alaska Type 1 organization. The fire has escaped military restricted area, threatening numerous structures and state timber units. Observed fire behavior was running, spotting and torching. The fire has moved out of old growth timber and into open tundra, spruce and hardwoods. The fire is wind driven. Large growth is expected as weather conditions remain hot, dry and windy. Pioneer Peak IHC and 8 smokejumpers were deployed for cabin protection. Firefighters will continue to do site protection and to utilize air resources to slow the spread north. There are two hotshot crews, 2 Type 2 crews, 3 engines and several overhead assigned to this fire.

In Division W, Palm IR was flown in the morning. No heat was located. Yukon and Gannett Glacier continued mopping up in the area around H-20 and the slopover in the 2010 Eagle Trail fire scar. Upper Tanana #2 completed plumbing the structures in Mansfield Village and made good progress securing structures to the north and east across the lake. Divisions T and Q were unstaffed. The Yukon T2IA crew is scheduled to be released at end of shift 8/11.

The Caribou Creek Fire was called into Fairbanks Area by a local pilot 1 hour after sizing it up as 1/2 an acre. Upon arrival A/A reported it as 100 acres. Six hours later, with 3 tankers and 2 scoopers working the fire and 6 smokejumpers deployed, the acreage was updated to 400 acres. Federal mining claims, a historic dredge and cabins are threatened. Due to other large high priority fires in the area one of the IC's major concerns is getting resources requested including crews and helicopters.

Crews mopped up 300` in DIVS Z from H20 to H10 and continued to construct line in DIVS A. Firefighters will continue to construct and hold line. This fire is staffed with 5 Type 2 crews and 26 overhead. The fire is in a big bowl with steep terrain causing erratic winds. Fire fuel type is not conducive for immediate progressive suppression. The steep terrain and dry fuels are dictating the use of suppression crews at this time. Lack of resources hindering line construction progress.

Warmer and drier conditions led to increased fire activity. Division M resources mopped up hotspots along the fire edge. Aerial resources were utilized for recon and bucket work on hotspots that threatened containment. Division C patrolled Quarry and Brigadier Roads, and monitored fire progression in the Stuart Creek drainage. Resources also tested site protection and water shuttling methods on military assets. Widespread fire activity within un-burned islands, some of which are near containment lines, remain a concern. Hardwoods continue to exhibit 1`-3` flame lengths with continuous active flame fronts in the leaf litter, and re-burn in previously burned areas has been observed regularly, consuming the entire tundra mat. With 70 miles of perimeter, aerial observation and timely IR data remains essential in identifying threats to containment, and essential for deploying our limited resources to the highest priority. Various military sites in and around the Impact Area remain threatened. Aerial and ground-based military training exercises are requiring extensive coordination by the IMT and military contacts. A TFR remains in place.

Today the ransition to Type 1 Team occurred at 0800 hrs. Improved visibility and reduction of wind velocity allowed for utilization of aviation resources. ICP, helibase and staging area constructed/established. The fire has escaped military restricted area, threatening numerous structures and state timber units. Observed fire behavior was running, spotting and torching. The fire has moved out of old growth timber and into open tundra, spruce and hardwoods. The fire is wind driven. Large growth is expected as weather conditions remain hot, dry and windy. Pioneer Peak IHC and 8 smokejumpers were deployed for cabin protection. Firefighters will continue to do site protection and to utilize air resources to slow the spread north. There are two hotshot crews, 2 Type 2 crews, 3 engines and several overhead assigned to this fire.

In Division W, Palm IR was flown in the morning. No heat was located. Yukon and Gannett Glacier continued mopping up in the area around H-20 and the slop over in the 2010 Eagle Trail fire scar. Upper Tanana #2 completed plumbing the structures in Mansfield Village and the structures to the north and east across the lake. Divisions T and Q were unstaffed and will continue to be monitored by air.

Crews mopped up 300' in DIVS Z from H20 to H10 and continued to construct line in DIVS A. Firefighters will continue to construct and hold line. This fire is staffed with 5 Type 2 crews and 26 overhead. The fire is in a big bowl with steep terrain causing erratic winds. The fire fuel type is not conducive for immediate progressive suppression. The steep terrain and dry fuels are dictating the use of suppression crews at this time. The fire is very reliant on helicopters for supplies and potential emergency medivacs and critical to maintaining field resources. Today, 2 crews continued to mop up Div Y, 2 crews will continue to mop up Div A. Incoming ICT3 will shadow Tuesday before taking over fire on 8-14. Bears have become a nuisance around camp and on the fireline. Difficult steep terrain will continue to be a safety concern for the type 2 crews. (There are 5 Type 2 crews and several overhead that are being shared with fire #475- Joint Lake.)

The observed fire behavior was isolated and group torching, runs through black spruce, active backing, and creeping and smoldering in open areas of tundra. Numerous resources have been ordered to assist with cabin protection. A critical need for this fire is 1 Type 2 helicopter for Medivacs and operations. A transfer of command to a Type 2 Team ( IC Dan Dallas) was completed at 2200. There are 125 people on the fire, that includes 3 type 2 crews, a strike team of engines and several overhead.

Name: **Stuart Creek 2** Cause: Human

Higher humidity values kept fire activity moderate, however extremely dry fuels continued to support fire growth. Division M resources mopped up hotspots along the fire edge. Division C patrolled Quarry and Brigadier Roads, and monitored fire progression in the Stuart Creek drainage, where the fire is approaching Glacier Creek, an identified trigger point for potential aerial firing off of South Camera Road. Engines monitored site protection and continued water shuttling to support hydraulics protecting military assets. Widespread fire activity within un-burned islands, some of which are near containment lines, remain a concern. Hardwoods continue to exhibit 1`-3` flame lengths with continuous active flame fronts in the leaf litter, and re-burn in previously burned areas has been observed regularly, consuming the entire tundra mat. With 70 miles of perimeter, aerial observation and timely IR data remains essential in identifying threats to containment, and essential for deploying our limited resources to high priority areas in a timely manner. Various military sites in and around the Impact Area remain threatened. Aerial and ground-based military training exercises are requiring extensive coordination by the IMT and military contacts, and continues to be a challenge. A TFR remains in place, and was modified on 8/12 to accommodate military training and civilian air traffic.

Improved visibility and reduction of wind velocity allowed for utilization of aviation resources. The fire has escaped military restricted area, threatening numerous structures and state timber units. Observed fire behavior was running, spotting and torching. The fire has moved out of old growth timber and into open tundra, spruce and hardwoods. The fire has been principally wind driven. Large growth is expected as weather conditions remain hot, dry and windy. The fire is approximately 1.4 miles from the Tanana River as the closest threat. The Type 1 and Type 2 crews will be utilized to supplement and reinforce structure protection areas. Engines will patrol the north side of Tanana and Delta Rivers within the subdivisions. There are 2 Type1 crews, 5 Type 2 crews, 6 engines, 5 dozers, 1 Type 3 and 1 Type 2 helicopter, and several overhead assigned to this fire.

Name: **Caribou Creek** Cause: Human

The Caribou Creek Fire continued to see fire growth. Modis imaging shows fire growth not seen yet by the IC, who estimates the fire has seen an increase of possibly 700 acres. Limited availability of resources have shifted the fire strategy to point protection only at this time. Personnel on the fire will continue to set up point protection on existing structures, as well as continue to be inserted by boat. Helicopter 212TH will sling needed supplies to the ICP. There has been continued concern from property owners in the area and multiple TFR incursions, all of which are being addressed at this time. During the next operational period, once conditions allow for a recon by the FMO and IC, further tactics will be assessed. Fire activity has moderated since the weather change has moderated the winds in the fire area. (+700)

The fire continues to creep uphill on the northeast corner and north central in Sections 16 and 15. In Section 24 where the crew is working, the fire is smoldering and creeping with occasional single tree torching. Delta #2 continued to secure and hold the west side of the finger in Section 24. Bucket support was not possible due to heavy smoke inversion. (Crew names are reflected on Moon Lake incident.)

Divisions T and Q remained relatively quiet along the Tanana River and in the area around H-30, exhibiting creeping and smoldering fire behavior with occasional single tree torching in the interior. The northeast flank of the fire continues to back down the ridge west of H-18 with 2` flame lengths and group tree torching observed. In Division W, Gannett Glacier continued mopping up in the area around the slop over in the 2010 Eagle Trail fire scar. Upper Tanana #2 was prepositioned at Mansfield Lake to protect values at risk. Divisions T and Q were unstaffed and will continue to be monitored by air.

Firefighters will continue to construct and hold line. The fire is in a big bowl with steep terrain causing erratic winds. The steep terrain and dry fuels are dictating the use of suppression crews at this time. The fire is very reliant on helicopters for supplies and potential emergency medivacs, and to maintaining field resources. Today Div Y was mopped up and gridded 300' from H-10 to H-30, Div A was mopped up to 300' from the perimeter below H30 and some interior smokes were extinguished. No smokes were showing in Div Z. Difficult steep terrain will continue to be a safety concern for the type 2 crews. Bears have become a nuisance around camp and on the fireline. This fire is staffed with 98 persons.

The observed fire behavior was creeping and smoldering with a moderate rate of spread in the black spruce. Multiple structures and the community of Circle Hot Springs are threatened by the fire. The weather is unseasonably warm and dry with high winds. Also, the fuels are abnormally dry. Today fire personnel constructed indirect line for protection of Circle Hot Springs. Critical needs for this fire include 1 Type 3 helicopter (PSD qualified) for Medivacs and anticipated PSD operations, an IHC, or 14 smokejumpers to assist with firing operations. Critical resource needs are based on anticipated burnout operation which is critical to meeting management objectives. Hot, dry conditions and numerous structures threatened. There was minimal fire growth to the southeast today; fire will be GPS'd and have a better acreage update for tomorrow. This fire is staffed with 192 people, that includes 6 type 2 crews, a strike team of engines and several overhead.

Today's observed fire behavior was creeping, ground fire and torching. The fuels are timber (grass and understory) white spruce and tundra. The crews worked on sawline construction and continued the hoselay from where the jumpers left off a couple of days ago. The fire is very reliant on helicopters for supplies and potential emergency medivacs and critical to maintaining field resources. There are 43 persons staffing this fire.

(Crews on this fire may be named on the Crater Lake Incident.)

Name: **Stuart Creek 2** Cause: Human

Higher humidity values, calm winds, and an inversion layer kept fire activity moderate, however extremely dry fuels continued to support fire. Division M received an additional handcrew, and mopped up hotspots along the fire edge. Division C patrolled Quarry and Brigadier Roads, and monitored fire progression in the Stuart Creek drainage, where the fire continues to approach Glacier Creek, an identified trigger point for potential aerial firing off of South Camera Road. Engines monitored site protection and continued water shuttling to support hydraulics protecting military assets. Widespread fire activity within un-burned islands, some of which are near containment lines, remain a concern. On 8/14, a crew will be inserted in to H-14 in Division R to secure perimeter and mop-up an area of concern near the helispot. Hardwoods continue to exhibit 1`-3` flame lengths with continuous active flame fronts in the leaf litter, and re-burn in previously burned areas has been observed regularly, consuming the entire tundra mat. Aerial observation and timely IR data remains essential in identifying threats to containment. Various military sites in and around the Impact Area remain threatened, and the military will remove some values in Division B on 8/14. A TFR remains in place.

The fire has escaped the military restricted area and is burning on State Full Protection Land. Fire has moved out of old growth timber and into tundra, spruce, and hardwood mix. Much of the perimeter remains sheltered in both hardwoods and spruce understory. Continued growth is expected as long as weather remains hot, dry and windy. Occasional backing was exhibited along the southwestern and western perimeters with an increase in wind velocity after the inversion lifted. Smoke is having an impact on community and aviation resources and access to homes/residences. State timber units threatened along eastern edge of fire area. Areas of burned timber are falling into jack-strawed remnants. There continues to be potential for crossing the Tanana and/or Delta Rivers, primarily on the north end of the fire. Little organized movement occurred as fire remained under inversion until 1300 hrs today. US Air Force "Red Flag" Exercise is continuing flight operations. This fire is staffed with 347 persons.

The fire personnel continued to prep structures for point protection; a recon of the fire was done by the FMO and IC. The fire had short ground runs and isolated group torching. During the next operational period, personnel will continue to shuttle supplies and identify other resources to protect. Homeowners continue to call with concerns of the fire area and their properties.

Crews finished mopping up areas of concern on the eastern flank of the fire and containment objectives for the all divisions have been met. Gannett Glacier was repositioned to the Tetlin Junction Ridge Fire to help secure areas of concern. Resources remain in place at Mansfield Lake Village. All other resources were pulled off the fireline and the fire is now unstaffed and will be monitored daily by air. The fire along the northern perimeter continues to back down the ridge west of H-18 with 2ft flames and single tree torching.

(Crews listed here are currently staffing Tetlin Ridge)

 Name: **Sandless Lake** Cause: Lightning

The fire was observed on 08/13/2013 by N309VS at 1540. Fire behavior was reported at a 20% active perimeter creeping, backing and running with single tree torching. The majority of fire activity was on the north and east side of the fire. Fire continues to back into the wind which is burning in black spruce and tundra. On the eastern flank of the fire, the fire was backing and running with occasional group torching. Due to poor visibility, observer was unable to accurately map the west and southwest portion of the fire. The fire remains in monitor status.

|               | Name: <b>Tabert Lake</b> |                    | Cause: Lightning            |                        |

Acreage is an estimate as accurate mapping along the eastern and northeastern perimeter became impossible due to smoke and fire intensity. Fire behavior was rank 4 and 5 in continuous black spruce. T-264 and T-267 along with AA 35E made numerous drops along the east flank of the fire late in the burning period as fire behavior began to moderate. Later, scoopers were able to make effective drops at the head of the fire. A request has been made for scoopers to work the fire again in the morning, early in the burning period. Another mapping mission will be coordinated as well. The eastern expansion of the fire is moving it closer to trigger points for structure protection measures and the community of Lake Louise, which lies east of the fire .

Name: **Crater Creek** Cause: Human

Today the fire behavior was creeping and smoldering. The fire is in a big bowl with steep terrain causing erratic winds. The steep terrain and dry fuels are dictating the use of suppression crews at this time. Difficult steep terrain will continue to be a safety concern for the type 2 crews. Bears have become a nuisance around camp and on the fireline.

The observed fire behavior was creeping and smoldering with a low rate of spread in the black spruce. Multiple structures and the community of Circle Hot Springs are threatened by the fire. The weather is unseasonably warm and dry with high winds. Also, the fuels are abnormally dry. Today fire personnel constructed indirect line for protection of Circle Hot Springs. There was minimal fire growth today.

An area of heat threatening containment was spotted in Division R, near the Chena River, during an aerial recon on 8/13. The division was re-staffed with a crew, who worked with helicopter bucket support to secure the area. A crew continued gridding and mop-up in Division M. Various military sites in and around the Impact Area remain threatened. Extreme fuel moisture indices are continuing to promote re-burn in deep duff layers, and extensive mop-up is required. IR (infra red) flight is scheduled for the night of 8/14. Evaluation of the IR data will aid in determining future resource allocation and staffing needs for the incident. Acreage increase will be calculated 8/15. A TFR remains in place.

Today a strong inversion and heavy smoke were observed until 1200. Continued growth can be expected as weather remains hot, dry and windy. Backing was exhibited along the southwestern and western perimeters with an increase in wind velocity from the west. The most significant fire behavior was along the east flank, northeast corner and Rainbow Lake, with single tree torching and short runs observed with steady wind from the west.

The fire personnel continued to prep structures and ferry supplies and equipment. 50% of the identified structures have been prepped as of end of shift today. The fire continued to have isolated torching and creeping fire with 3-5 foot flame lengths. During the next operational period personnel will continue to prep structures for point protection.

The fire made a significant run to the southeast driven by strong northwest winds gaining 4000 acres and now has the potential to threaten values along the Alaska Highway. Dense smoke from fires to the north hampered aviation operations. The handcrews made good progress securing the northwest corner of the fire.

Smoke was reported to Fairbanks Area at 0547 by a local reporting that a neighbor had a berm pile that was smoldering. Prevention responded and reported a small spot in hardwoods, mixed spruce, and some grasses burning in the duff. Prevention emptied his tank on the pile and a couple hours later an engine responded, worked it and called it contained and controlled, leaving the fire in monitor status.

Crews continued to grid and mop-up in Divisions M and R. Division C continued to monitor fire in the Impact Area and support military site protection. Scoopers were used to knock down areas of re-burn in Division A. IR (infrared) flights remain a priority to identify threats to containment until significant precipitation is received. Excess resources (OH and crew) were made available for reassignment. A TFR remains in place.

Today a light inversion and smoke were observed until 1200. Continued growth can be expected as weather remains hot, dry and windy. Backing was exhibited along the southwestern and western perimeters with an increase in wind velocity from the west. The most significant fire behavior was along the east flank, northeast corner and Rainbow Lake, with single tree torching and short runs observed with steady wind from the west.

The fire had low growth today. There was isolated group torching with spotting to 100 yards, creeping ground fire with 1-2 foot flame lengths. Personnel completed the structure protection on 13 cabins that face imminent threat. Tomorrow they will assess 22 cabins to the southwest. TCC will demob on 8/16 along with other resources.

Back-country access to the Granite Tors, Mastodon Creek, Mist Creek and South Fork trails opened to the public today. Division C resources continued to monitor fire in the Impact Area and support military site protection. Helicopter bucket work was done to suppress areas of re-burn in Division R. IR is scheduled for early am 8/17. The fire received trace precipitation on 8/15. A TFR remains in place.

Today a light inversion and smoke were observed until 1100. Continued growth can be expected as weather remains hot, dry and windy. Backing was exhibited along the western flank with northwest winds. There were areas of isolated tree torching along the southeast perimeter with smoldering in hardwoods. The most significant fire behavior was along the east flank, northeast corner and Rainbow Lake, with single tree torching and short runs observed with steady wind from the west. A TFR remains in place.

The east side of the fire remained relatively inactive today. Elsewhere most of the activity was on the northwest side of the fire. Fire behavior was backing with pockets of spruce torching to rank 3 when clouds cleared and the fire was exposed to sun. Site assessment continued, utilizing Lake Louise VFD boats and 1 DOF engine.

The fire made a substantial run in the afternoon. The fire behavior picked up rapidly and became plume dominated. A 3/4 mile wide fire vortex was observed burning out a one mile long drainage in a matter of minutes ripping full trees from the ground roots and all and lifting them hundreds of feet into the air.

The structure protection group with the aid of Tok Area initial attack resources plumbed and prepped structures along the Alaska Highway.

Later in the evening the column collapse caused visibility along the highway to diminish. DOT signs were put in place.

Gannett Glacier T2IA used helicopters with buckets to support burnout operations of indirect control line in the northwest corner of the fire while Upper Tanana #2 continued to mop-up.

Today's observed fire behavior was creeping and smoldering with a low rate of spread. Several structures and the community of Circle Hot Springs are still threatened by this fire. Line has been prepped for future burnout operations in DIV T and are awaiting favorable burning conditions. Structure assessments continued. A TFR remains in place.

Today's fire behavior was creeping, backing, smoldering, isolated torching, and re-burning of previously burned areas. Division B/C resources continued to monitor fire in the Impact Area and support military site protection. Helicopter bucket work was done to suppress areas of re-burn in Division R. A TFR remains in place.

Today a light inversion and smoke were observed until 1100. Continued moderate growth can be expected until fire weather indices decrease with precipitation. Areas of backing fire continued along the western flank with northwest winds. There were areas of isolated tree torching along the southeast perimeter with smoldering in hardwoods. A TFR remains in place.

Numerous resources arrived to support the forecasted potential for large fire growth, including overhead and engines released from, or on loan from other fires in the interior. An operation to construct indirect dozer line on a ridge along the border between state land and Tetlin Corporation land began yesterday. Engine crews and hand crews continued with structure protection preparation efforts along the Alaska Highway. The fire began receiving scattered showers in the early afternoon and steady, widespread rain in the early evening.

The fire is being managed by a type 3 organization managing several fires in the Tok area. The fire has been contained on the western, southern, and eastern portions of the perimeter and is being allowed to spread naturally on state land to the north. The fire has shown very little activity in the past week. It was flown today and smoldering in the hardwood litter on the northern perimeter was observed.

Much of the perimeter remains sheltered in both hardwoods and spruce understory. Expect limited growth until fire weather indices increase. Creeping and smoldering throughout the fire area today due to high Duff Moisture Code (DMC) and Drought Code (DC) values. Mop-up remains difficult due to extremely dry deep duff layers. Crews continued to secure the northern most section of the fire to protect Whitestone as well as other values at risk to the north.

Rain fell on the fire through most of the day and fire behavior was minimal with only smoldering observed. Fog at 3000 feet prevented aircraft from flying the fire. Planning for cutting sawline to the repeater site across the ridge on the border of Tetlin Corporation land was completed and implementation will begin on Monday. The engine taskforce on loan returned to the Mississippi fire and the second taskforce demobed at end of shift having completed structure preparations. Two helicopters and associated aviation personnel were demobed and full demob is tentatively planned for the end of the week.

Much of the perimeter remains sheltered in both hardwoods and spruce understory. Expect limited growth until fire weather indices increase. Creeping and smoldering throughout the fire area today with isolated pockets of slash burning interior. Single tree torching was also observed. Mop-up remains difficult due to extremely dry deep duff layers. Crews continued to secure the northern most section of the fire to protect Whitestone as well as other values at risk to the north. The fire received intermittent precip.

Partly sunny skies allowed for an aerial reconnaissance flight of the fire yesterday and smoldering was observed on portions of the southeastern fireline. Having completed containment objectives, fire personnel in Division Z were removed from the line. A squad of Gannett Glacier worked to line and secure a NFWS repeater and to construct a medium helispot for access in case another drying trend occurs. All structure protection equipment was pulled and backhauled from along the Alaska Highway. Upper Tanana #1 demobed. All remaining crews will demob on Tuesday will full demobed planned for the end of the week.

Several smokes were observed, primarily in the interior. Natural barriers, the retardant line on the east side of the fire and wet weather are currently inhibiting further growth and activity. Site assessments by boat along the shores of Little Lake Louise, Louise, Susitna and Tyone Lakes are completed and the fire was demobed. During the next shift site assessments along the road system will continue.

Much of the perimeter remains sheltered in both hardwood and spruce understory. Expect limited growth as fire weather indices have decreased. Creeping and smoldering throughout the fire area. Duff Moisture Codes and Drought Codes remain high. Mop-up remains difficult due to extremely dry deep duff layers. Fire received significant precipitation and high relative humidities.
