			Totals	**487**	**967,490**								

Vessels highlighted in gray in the above table have registered that they will not discharge wastewater in Alaskan waters in 2015.

[1] A large vessel has overnight accommodations for 250 or more passengers.

[2] Capacity is the number of lower berths and is calculated from Registration, Vessel Specific Sampling Plan, or Notice of Intent. Actual number of passenger aboard varies.

[3] Alaska water includes the Alexander Archipelago and extends 3 miles from the coastline. Only vessels that discharge into Alaska waters are required to meet wastewater sampling and reporting requirements.

[4] Assumes full capacity on every voyage

[5] Discharge allowed unless another ship is discharging at the Ore Dock
