Narrative: Forestry and VFD engines responded to a reported smoke at the Eklutna Lake camping area. A/A was launched to get a quick sizeup of this fire and of any potential structures and resources threatened. On arrival this fire was burning about 10.0 acres of Black Spruce in a light wind with active spotting. The Forestry engine arrived and crewmembers set up a pump and hoselay to knock down one active area on the east side to prevent further spread onto NCA land. The I.C. and 3 other crewmembers will remain over night to monitor this fire and extinguish spot fires with Fedcos/hoselay and handtools.

Narrative: Ground personnel continued to extend and secure dozer containment lines. Efforts were supported by CL-215's in the morning. As the weather warmed, water drops became ineffective and the CL-215's were released. The fire escaped the line in the late afternoon and air tanker T-55 worked with ground crews to regain the line using retardant drops. This effort was augmented with bucket drops from 392NS.
 The fire made a major blow out late in the day. Personnel were forced to retreat. Equipment along the road made a run to safety. All the dozer line was lost. Air attack assisted in guiding the evacuation supported by the two CL-215's. All personnel were safely evacuated. Pogo provided services for personnel on the eastern side of the fire. The rest of the personnel were housed in Delta Junction. The road within the fire was closed.

Narrative: A camper near Healy Lake reported a lightning strike which grew into a fire. Helitack aboard N16973 was dispatched. The fire was sized-up at 50-100 acres and very active. Retardant, air attack, jumpers, and CL 215's were ordered. Helitack concentrated on structure protection. Incoming IHC crews Plumas and Tahoes were spiked at DAF for transport in the morning to replace SMJs. The fire was hit hard and long with retardant and water with the expectation of aiding ground forces with containment.

Narrative: There were observed runs in various locations south of the fire. Runs through black spruce with flame lengths to 75 feet, column climbing to 10,000 feet were reported. Long range spotting ahead of the fire up to ¼ mile was seen. Flanking in other areas was reported with low to moderate spread. Extreme fire behavior was observed until 0100 hours. The column over the south end of the fire built and collapsed several times, accelerating fire growth. The Snake River crew was inserted into a residence west of the Bearpaw River. Chena and Denali held burn out operations on the East and West side of Mucha Lake with severe wind shifts and speed for cabin protection. Personnel continued to hold burn operations near a cabin southeast of the fire area along the Kantishna River. Plans are to continue to secure and mop up near structures and an allotment 7 miles south of the mouth of the Toklat. Narrative: The fire made a significant run to the northwest today. Observed fire behavior included running surface fire, active crown fire, backing crown fire, and spotting. The fire blew out all control lines and crossed the access road into the fire. Personnel pulled back to safety zones. All personnel were flown out of the fire area by helicopter and plan to retrieve an engine and ATV's if fire activity minimizes enough for safe retrieval by morning. The fire size is a conservative estimate, as smoke made accurate mapping difficult. Two type 2 crews arrived late today, with 2 type 2 crews ordered for delivery tomorrow.

Narrative: Fire spread was moderated by weather patterns and smoke inversion. A radio tech was delivered to H-40 to repair a problematic radio repeater. An order of tactical supplies for structure protection was received at the residence 3 miles west of the the Bearpaw River. Chena and Denali crews held burn out operations on the east and west side of Mucha Lake. Other crews continued to hold burn operations near the cabin southeast of the fire area along the Kantishna River. Crews also continued to secure and mop up near structures and an allotment 7 miles south of the mouth of the Toklat River. Personnel continued to assess and prep structures on the west side of West Twin Lake. East Twin Lake resources remained in place for structure protection and initiated burn operations around structures. Local boats were hired to assist with logistics while helicopter use was limited due to smokey conditions. The current acreage is based on a 5/30 infrared flight interpretation (+27,040).

Narrative: The fire made a significant run during burnout operations when wind from the SE picked up from 2-3 to 21 mph. Personnel and crews were pulled from line during the run and were inserted into a safety area. Air tanker use was hampered by steep canyon walls and thick smoke. Extreme fire behavior was observed as the head moved to the north 1 mile. The fire spread mostly in the bottom of the valley, but is also under brush and hardwoods moving up canyon walls. The fire is 0% contained, but crews are working this evening to hold the Northeast corner of the fire to prevent it from spreading towards the north end of lake. Acreage increased by 996 acres.

Narrative: Fire behavior was reported to be increasing with a head moving towards the west. Deweys cabin, Farewell Airstrip and Bear Creek Cabin are at risk. Fire activity increased up the Post River drainage and to the North along the Kuskokwim River. There is still a threat of the fire jumping the Kuskokwim River and posing a threat to a cabin on the East side. An attempt to utilize retardant to pretreat and protect values at risk was made, but it not successful. Heavy smoke caused flying conditionS to become IFR and reduced visibility to 1/4 mile. Narrative: Fire spread moderated by weather patterns and smoke inversion. Smoke lifted allowing for the accomplishment of backlogged aviation missions. Attempted burnout operation on East Twin Lake, weather limited success. Lifting of smoke allowed observation of south flank of fire, confirming that fire #128 and #241 had grown together. Inserted Gannett Glacier crew into structures 1 mile west Bear Paw, to begin structure protection preparations. Plan to hold lines and spot fires around Mucha Lake with indirect sawline and hoselays around the cabins. Resources at structures 6 miles North of the Bearpaw River will monitor the fire's southerly progression and prep residences. Snake River IHC and Gannett Glacier crew will continue to prep residences in the Bearpaw river area for structure protection and burn out operations. (+6595 acres).

Narrative: The fire was flown by 1010F. Along the Kuskokwim the fire has backed into the river causing most all available fuel (spruce) except for a few pockets of spruce/hardwood mix to burn. At choke point across from Rhone Baumgartner's cabin the point hasnt burned, it also is spruce/hardwood mix. The perimeter from the Kuskokwim around to the Farewell Strip shows a few areas and pockets of smoke (smoldering and creeping). From Farewell Strip up Sheep Creek the fire as burned to the East Bank and is holding, the main spread continues up Sheep Creek into the mountains. (+25,545)

Narrative: At 0915 the fire was reported to UYT Dispatch by FWS personnel conducting surveys in the area. The report was a 100 acre fire burning in tundra near Canvasback Lake.

At 1108 zone IA Helicopter N36PF responded to the fire and personnel determined proper coordinates and relayed size-up information. The fire was approximately 200 acres in size, creeping in tundra along the north and east perimeters and backing to the west and south also in tundra. Flame lengths were 2-3 feet and winds were out of the west at 10-15 mph. A FWS cabin site was located and assessed as well as an allotment south of the fire. N36PF conducted one fuel cycle of bucket drops to the southern perimeter of the fire.

At 1522 eight smokejumpers were delivered to the fire and reported the fire to be over 300 acres in size. The fire was smoldering and backing a little bit along the southern perimeter. There were two small columns of smoke along the northern perimeter where the fire was burning through some black spruce stringers. The jumpers and 2 helitack personnel from FYU began allotment and cabin site protection measures. The current objectives are to keep the southern perimeter of the fire from spreading towards the FWS cabin and allotment.

Narrative: Zone surveillance in N309VS flew the fire and reported a 40% active perimeter, with smoldering, creeping, and group torching. The fire's proximity to a cabin along the Nowitna River triggered the dispatch of jumpship N117BH, air attack N688TM, and water tanker's T-267 and T-262. Smokejumpers were deployed and aerial resources used water drops to cool down the eastern flank of the fire. The smokejumper's worked throughout the shift to complete structure protection around a cabin and cut line for a future burn-out. The fire was mapped at 8589 acres. (+7783)

Narrative: Aerial Surveillance Module A-4, lead plane BD-129, and 3 CL-215's (Water Tankers) T-201, T-204, T-267 were dispatched to prevent the fire from impacting power lines, to utilize natural barriers to hinder the fire's movement and keep it on the south side of the Salchaket Slough to meet agency objectives. The Intertie power line was shut down in order to complete aerial operations. The power was promptly turned on once operations were completed. Zone surveillance aircraft will continue to be used to assess future planning needs. At last report (20:01) the fire had a 10% active perimeter, smoldering and creeping with isolated and single tree torching. Flame lengths were 1-5 feet with most of the activity on the far east flank of the fire. Observations were taken under 100% cloud cover with light precipitation and winds out of the south/southwest at 5-7 mph. (+1491)

Narrative: At 1039 the decision was made to send a load of smokejumpers to the fire for allotment protection. Smokejumper aircraft Jump-63 deployed Patton +7 to the area of the allotment. Helicopter N510EH delivered supplies ordered by the smokejumpers at the fire. At 1450 the fire was flown by zone surveillance aircraft N9011N. The fire had an estimated increase in size of 1,000 acres and was spreading to the north and east. The fire had spotted north of the Little Black River and had burned parts of two allotments. By 1841 smokejumpers had conducted a 1/4 mile long burnout on the northwest side of one allotment tying in a small lake to the Little Black River. The smokejumpers spent the remainder of the shift mopping up and cleaning the burnout.

Narrative: The fire crossed a contingency line into an allotment north of the fire. Two loads of smokejumpers were deployed. Hotshots, smokejumpers, and five CL-215 water-scooping aircraft were able to stop the fire's spread into the allotment. Significant runs to the northeast, group torching, and smoldering behavior were observed. The Stebbins Type 2 crew was demobilized and the Chena IHC was ordered, but had not arrived at the fire. Tomorrow, firefighters will begin direct attack on the fire's edge threatening the allotment to the north and the fire's edge to Moose Creek Slough. (+2290)

Narrative: At 1610 a call was received by Fort Yukon station from a resident of Birch Creek Village who reported seeing a column of smoke 10 miles outside of the village. Smokejumper aircraft Jump-63 was diverted from a mission to fire 646 to this fire for an updated report.
 At 1636 Jump-63 personnel reported west winds, causing the fire to move eastward, and it was putting off a lot of smoke.
 At 1816 the fire was flown by zone surveillance aircraft N9011N. Under 100% cloud cover and west winds at 10-20 mph, and the fire was 20% active, running to the east with intermittent crowning in spruce fuels, with 20 foot flame lengths. The southern edge of this portion was backing to the south towards an old burn. There appeared to be an approximate +100 acre increase in size. The FWS cabin on Canvasback Lake was not being threatened and was secure.(+250.5 due to digital mapping)
