Name, Initials, Signature of Inspectors: _____

Name, Initials, Signature of Inspectors: _____

Name, Initials, Signature of Inspectors: _____

Comments: The operator must conduct daily sea surface monitoring while discharging to determine compliance with WQS, this permit conditions, and to document waste outside the mixing zone and onshore, observations of, or incidents involving, threatened or endangered species. A monthly photographic record must be maintained with each photograph given a unique identification number and matching description in this log. Clearly identify if animals observed are Steller sea lion, Steller's eider, spectacled eider, northern sea otter, or short-tailed albatross. (Note if injured or dead and probable cause.)

	Steller's eider	spectacled eider
