Re: Permit Extension Request
Air Quality Control Construction Permit AQ0083CPT06
Kenai Nitrogen Operations
Kenai, Alaska

Dear Mr. Simpson:

Agrium U.S. Inc. (Agrium) was issued Air Quality Control Construction Permit AQ0083CPT06 on 6 January 2015 for the proposed restart of a portion of its Kenai Nitrogen Operations (KNO) fertilizer operation in Kenai, Alaska. In a letter dated 4 March 2016, the Alaska Department of Environmental Conservation (ADEC) extended the deadline by which construction must commence by eighteen (18) months until 6 January 2018. In a second letter dated 3 October 2017, the ADEC extended the deadline by which construction must commence by an additional eighteen (18) months until 6 July 2019. Under separate cover, KNO is submitting an application to obtain a new Prevention of Significant Deterioration (PSD) Construction Permit to reflect certain design changes that have occurred to the project. KNO requests that ADEC extend the deadline to commence construction on Construction Permit AQ0083CPT06 until such time as ADEC has acted on KNO's request for a new PSD Construction Permit for this project.

If you have any questions regarding this information, please contact Ted Hartman of Agrium at (913) 302-7469 or Dave Jordan of ERM at (317) 706-2006.

Sincerely,

A handwritten signature in black ink, appearing to read 'FC Werth', written in a cursive style.
