RE: Aviation Wholesale Supply; 2113 Merrill Field Drive, Anchorage, AK; Underground Storage Tank Release, Confirmation Sampling; Facility ID #2780, File #L55.300, Reckey #98210015907

Dear Mr. Erdmann:

Reference is made to our earlier discussions and correspondence, pertaining to the closure of a 3,000-gallon underground storage tank at the referenced facility. The Department had some concerns that were to be addressed with an additional investigation, utilizing two (2) soil borings at the site.

This investigation was done on May 7, 1999 and reports, covering the findings, were received from you on May 14 & 18, 1999. I have reviewed the information provided in these reports and find that the concerns of the Department have been satisfactorily addressed.

Based on the information you provided, including that contained in our project file for this site, no further action is required for clean up of the underground storage tank site. However, should contaminated soil or groundwater be discovered at this site in the future, an appropriate site assessment and cleanup will be required, in accordance with applicable State regulations.

Thank you for your coordination and cooperation with the Department on this project.

Sincerely,

Paul E. Pinard
