Re: Corrective Action Report and Conditional Closure Request at Pribilof School District Bird House #1 St. George Island Dated January 16, 2007

Dear Mr. Lindsay:

On February 16, 2007, the Alaska Department of Environmental Conservation approved a conditional closure request from the Pribilof Island School District for the heating fuel release at the site known as Bird House #1, St. George Island, Alaska. This conditional closure approval is also granted to NOAA, as the landowner. ADEC concurs that all corrective action has been completed to the maximum extent practicable for the site. This site will require a "Notice of Environmental Cleanup: Alternative Soil Cleanup Level and Limitation of Moving Soil Off-Site" be recorded along with the property deed as long as residual contamination remains above levels which would allow for unrestricted use. A copy of ADEC's conditional closure letter detailing institutional controls for the site and a copy of the January 16, 2007 Corrective Action Report (and all figures/maps), is on file with the Pribilof School District. This information will be provided to future landowners and/or leaseholders as a part of this conditional closure granted by ADEC.

Sincerely,

Louis Howard
