RE: St. Elias Auto Center, ADEC Spill # 96-11-00-320-01
UST Fac. ID #536
No Further Remedial Action Required

Dear Mr. Sigler:

On October 29, 2001, the Alaska Department of Environmental Conservation (ADEC) received an October 22, 2001, Site Assessment Report, Site Investigation at UST Facility ID#536. Jason Ginter, with Smith Bayliss LeResche, Inc., prepared this report.

In addition, we have a November, 1996 report prepared by Woodward Clyde, and a December 30, 1997 report prepared by Smith Bayliss LeResche, Inc. All three of these reports cover the UST closure site assessment for the removal of 1500-gallon tank, and the associated piping.

Based on the information provided in these reports, no further assessment or cleanup work is required in association with the petroleum release reported at this facility (release identified by Spill #96-11-00-320-01), at this time. This decision is subject to any future ADEC determination that the cleanup is not protective of human health, safety, or welfare, or of the environment.

For future reference, all records for this facility have been routed for filing in the Juneau Office of ADEC, under the file name, "*St. Elias Auto Center, ADEC Spill #96-11-00-320-01, ADEC UST Fac. I.D. #536*".

Thank you for your cooperation in complying with the ADEC's UST closure, site assessment, release investigation, and corrective action regulations.

If you have any questions regarding this correspondence or any other aspect of this project, feel free to contact me at the Kenai Area office, or Mr. Bill Janes at the Juneau office, of ADEC.

Sincerely,

Paul Horwath
