The fire was reported by Palmer 911 as a fire in the woods. Two Forestry engines, one Forestry Prevention, and Central FD responded. Upon arrival of Prevention they found three small spot fires at 0.1 acres smoldering in mixed hardwoods and grass. Personnel took action on the fire, containing, controlling, and placing it in monitor status. The cause of the fire is under investigation.

Air tankers worked for most of day boxing in the most threatened cabins with retardant. A crew was transported to the incident. Smoke jumpers worked on setting up hose lays and sprinklers assisted by the crew. A burn-out operation was done by the jumpers to improve structure protection. Resources needed to form a Type 3 incident were ordered. Hot shots and various overhead will arrive on 6/18. An additional shot crew is ordered for additional burnout operations and to allow the smoke jumpers to demobilize.

Resources on the fire utilized ASM A-4, T-260, T-47, T-52 and 2 National Guard Type 1 helicopters to limit fire spread on the north, west and east flanks of the fire. VFD engines provided structure protection for commercial/residential structures along the Sterling Highway. Cooper Creek Campground was evacuated during the morning shift and will remain closed to public use. Personnel continued to utilize aerial resources through the end of shift. A Type 2 short team has been ordered for the incident.

Today, 5 hotshot crews began establishing control lines. Fire personnel continued mopping up around structures in the Kenai Keyes subdivision, Feuding Lane, Zenith Street and Card Street. Fire exhibited extreme behavior in the afternoon, crowning, running, and spotting towards the Skilak recreation area. Recreationalists were evacuated from the Skilak Loop area by USFWS law enforcement officers as the fire approached. A USFWS engine started the sprinklers at the Skilak Guard RAWS Station in anticipation of the flame front. An air tanker used retardant to secure the station. Fire continued its march east and jumped Skilak Loop Road. Fire behavior moderated as the winds diminished. ICP was established at Sterling Elementary.

Single tree torching was observed throughout the burn period on the southern flank of the fire. The fire is hung up in sloughs and riparian areas on the north side of the fire. Water scooping aircraft were used to help prevent spotting to the south as fire activity picked up in the afternoon. One type 2 crew was inserted into the fire and another arrived and is remaining overnight at staging. The fire lines held with less than 20 acres of additional growth. Change in fire size is due to more accurate mapping.

Even with continued hot and dry weather, there was minimal growth in the fire perimeter today. The fire exhibited some group torching and isolated short crown runs in the interior. Fire personnel continued to defend structures and advanced fireline around the north, east and south flanks. Water handling equipment and hose lays were deployed, and mop up continued to secure safety of structures. The IMT held a public meeting to inform local residents on fire status. Decrease in acreage to more accurate mapping.

Cause: Lightning

Fire activity has intensified today due to low rh's, strong winds, and dry fuels in the area. Due to these combinations, the fire is extremely active and showing lots of resistance to bucket work and ground work. Fire behavior consists of creeping and smoldering in tundra and pockets of timber. The fire is mostly active in a spruce and hardwood mix on the west side, with single and group tree torching. There was a newly identified hotspot on the north line, inside the perimeter that became extremely active and is now a major concern for the fire. Personnel continued to suppress the interior problem areas with bucket work assistance by Helicopters 73HJ, 70NW, and 392NS. Plans for tomorrow consist of working the hot spot on the north side and securing the northern, interior perimeter along with multiple other interior hot spots.

	Name: <b>Healy Lake 2</b>		Cause: Lightning	

This is a running and crowning, lightning started fire. With the large size, cabin protection was planned with smoke jumpers along Healy Lake. 8 jumpers were deployed to work one area along the lake. The fire was heading over the ridge and was looking to merge with fire 313. As of 6/17 @ 00:30, 512311 Healy Lake 2, has been called administratively out due to merging with 313, and reporting will now be on 512313 starting 6/17.

Two Forestry engines were requested to respond by Chugiak FD for a report of multiple fires in the median. Chugiak FD had put them out before Forestry arrived but asked that they continue to patrol the area. When Forestry arrived they assisted to determine the cause which was from a vehicle. The fire was contained, controlled, and called out.

Air attack B-89 observed active fire on 314. Tankers with retardant were ordered and three single engine tankers, seats, were ordered. One load of jumpers deployed. The fire was boxed in with retardant and the seats knocked down the flames. The jumpers established a hose lay and will work toward the heat in the interior. The interior will require much work to control. Expected demobilization in a couple days.

Spot fires along the Cummings Road side of the Tanana River started in the early morning. Dozers, engines, tankers, and ground personnel worked all shift on containing and extinguishing the multiple spots. The fire behavior near Healy Lake was smoldering and creeping. This reduced the danger to structures and cabins. Good progress was made on the spot fires after a very long operational period.

Resources on the fire utilized ASM A-4, T-42, T-47, T-49, T-52 and Scooper T-260 to limit the fire spread on the north, west and east flanks. Tankers completed 14 total drops and utilized Scooper T-260 to the end of shift. A recon with helicopter 293LF provided more accurate acreage total. Bucket work with helicopter 307MH held the fire in check while VFD engines provided structure protection for commercial/residential structures along the Sterling Highway. Cooper Creek Campground remains closed to public use. Incoming resource will be used for direct line and hose lay construction. Planned transition to the Type 2 team will take place 6/19 at 1600.

Hotshot crews continued to establish control lines today with the assistance of 3 Dozers added for suppression. Other personnel on the line continued to mop up around structures in the Kenai Keyes subdivision, Feuding Lane, Zenith Street and Card Street. Fire behavior remained active today with single tree and group torching, short runs and spotting up to ½ mile. Critical resource needs are now 3 additional type 1 IHC and Bear Guards for crews out on the line. Crews burned out along the Skilak Lake road with the dozers constructing control lines in Division K. The evacuation of the Skilak Loop area remains in effect as crews continue suppression efforts. Air tankers continued to work the higher risk areas and hot spots of the fire. Tomorrow will be a transition day as the Washington State Type 2 Incident Management Team/Allbee will take over management of the incident.

Temperatures into the upper 80s and low RH values again tested the fire, which exhibited minimal perimeter growth. The fire was smoldering with some flames in black spruce and spruce/hardwood mix with isolated torching and group torching interior and in some areas along the perimeter. Crews and engines continued to work towards a 300' mop-up standard around structures within the perimeter. Progress was made securing the north, east and southern edges of the fire for a total of 5% containment. Plans for tomorrow include reducing the size of the TFR and evacuation area in conjunction with the borough EOC.

The fire was flown by detection aircraft 1010F. The fire is extremely active, and grew substantially to the southeast. One finger of the fire is actively burning north, but is not a concern at this time. The fire still poses no threat to the known sites in the area, and will continue to be monitored daily.

## Monitor

The fire was reported by Lime Village locals as a lightning started fire on the opposite side of the Stony River. A-4, T-49, and T-52 were diverted to this fire from a different fire in the area. A-4 reported the fire was 750 acres, 90% active, burning at a rank 4 with strong winds gusting to 30 mph. The head of the fire was burning at a rank 5 and per air attack it had a good chance of jumping the river. Do to bad weather the tankers were unable to take action on the fire. Later in the day helicopter 212HL tried to respond from Port Alsworth but was also unable to make it due to weather. Plans for tomorrow consist of flying the fire to see what kind of progress was made overnight, and establish a new plan of attack.

Private pilot reported this fire as a lightning caused fire that was 17 miles southeast of Sleetmute. J-63, T-52, T-49, and A-4 all responded. Due to higher priority fires in the area, the tankers and A-4 were diverted and did not take action. J-63 deployed six jumpers on the fire who sized the fire up to be 80 acres. A transfer of command took place later in the evening, and the jumpers were demobilized off the fire. Seventeen of twenty Helena Type 21A crew members were mobilized to the fire at 2338. The fire is currently smoldering but only holding heat in the root system of the trees, due to it spreading rapidly. Plans for tomorrow consist of securing the edge and working the interior heats. Three more crew members from Helena will be mobilized to the fire from Sleetmute in the morning.

Forestry received multiple calls about smoke in a valley near Mile 104 of the Old Glenn from Palmer 911 and private callers. One Forestry engine, helitack 973, and A/A 0AK responded. When A/A arrived on scene they found a 5 acre fire, rank 3, in spruce and open tundra. A/A ordered retardent, helicopter 2AT from Copper River, and the Mat-Su Short Squad. Personnel took action on the fire putting in a hoselay around the fire and utilizing helicopter 973 for bucket work and helicopter 2AT for shuttling personnel into the fire. Tankers dropped two loads of retardent to help box in the fire and were released as well as A/A 0AK.

Ground personnel continued to work on the perimeter securing the line 5 feet in and also securing any spot fires found. The tentative plan for the next operational period is to grid the fire and look for hot spots and also demobilize a few personnel around the end of shift.

Name: **Juneau Lake** Cause: **Lightning**

The northeast corner of the fire showed the most active fire behavior. Four Forest Service personnel continued with point protection on the cabins and then proceeded to lay hose to the fire and do some direct suppression. Two additional personnel flew up in a type 3 helicopter to deliver supplies and do a mapping/recon mission. The fire is now approximately 1500ft from the Juneau Lake cabin and still backing. A Type 2 IA crew is expected on scene tomorrow.

Name: **Card Street** Cause: **Human**

Hotshot crews continued to establish and secure control lines today with the assistance of the dozers. Personnel in Division A continued mopping up and patrolling around structures in the Kenai Keyes subdivision. Feuding Lane, Zenith Street and Card Street. Division D also continued mop up and worked on active fire in pockets of spruce in parts of the division. Division K continued to secure their control lines with some firing operations to tie the line together. Extensive plumbing and mop up was taking place in parts of the division as well. Burning operation in Division M were underway to tie control lines to the Boat Ramp Road off of Shilak Lake Road with plumbing and mop ongoing. Structure protection continues with the complexities of the Wildland Urban Interface which requires the skill of the Type 1 and 2 hand crews as the evacuation of the Kenai Keys subdivision remains in effect as crews continue suppression efforts. The transition Of Washington Incident Management Team 3 went well and was seamless and crews integrated well as the day progressed. The fire size is now estimated to be 7657 acres and was verified with a GPS flight by the Situation Unit Leader and Operations folks. Fire behavior was not as active as yesterday but isolated torching and short range spotting was observed by crews on the line in all divisions.

The fire behavior today was group torching, short crown runs and spotting to extremely dry conditions. Fire has burned for several days, even in bigger white spruce stands giving green heat into the black, increasing potential for increased spotting. Continue to secure the southern flank of the fire with pump and hose. Maintain helicopter utilization as emergency transport for crews on fireline and for bucket support to assist with regular spotting and short crown runs.

The fire activity was moderate today, observed group and single tree torching, uninterrupted backing fire front. The moderation of the fire activity was on the southern end western flank with minimal active on the eastern and northern end. The moderation of fire behavior was due to wind not being a factor today, although the recon and mapping mission had to be aborted due to extremely poor visibility. People were inserted in the permitted cabins and spike camp was resupplied. Tomorrow's mission consists of more structure protection, recon, and a mapping mission in preparing for a possible burn out operation.

Crews continued to work the problem areas in the interior of the fire, but due to weather and fuel conditions, the fire reportedly grew about 800 feet on the north. The north flank was 100% active, with shifting south and east winds produced from an overhead thunderstorm. The fire was 100% active and running in black spruce, with extreme spotting ahead. Operations will reassess the fire in the morning, and come up with a new plan of attack.

	Name: <b>Ruby Slough</b>			Cause: Lightning

At 2005 the fire was discovered by Air Attack 4NC. The coordinates were relayed to zone surveillance 4MN who then went to size it up. At 2025 4MN arrived over the fire. The fire was 30 acres in size, 100% active and creeping, backing, running and torching in spruce, grass, brush and mixed hardwoods. The fire plotted in a Full suppression management area approximately 5.4 NM southwest of Ruby. Winds were pushing the fire towards the northeast. Air Attack 4NC, T-260, J-63 and T-160 responded.

The fire was called into dispatch at 0917 by Flight Services. J-17 was dispatched to the fire and reported it to be 30 acres with a 50% active perimeter. Initial fire activity included creeping and backing in tundra. Creeks were observed to the west and north side of the fire. At 1555, surveillance aircraft 4MN did a recon of the fire and reported it to be 65% active with continued backing and creeping in tundra and a couple stringers of black spruce. The fire had grown to 200 acres and was moving at a rate of 10 chains per hour to the south/southwest. The fire plots in a Limited suppression management area and has been placed in monitor status.

 Name: **Card Street** Cause: Human

Crews continued to secure control lines today in Division A and continued mopping up and patrolling around structures in the Kenai Keyes subdivision, Feuding Lane, Zenith Street and Card Street. Division D also continued mop up and worked on active fire in pockets of spruce in parts of the division. Division K continued to secure their control lines with an extensive plumbing show of hose lays and completed an estimated two miles of plumbing in preparation for heavy mop up. Firing operations in Division M yesterday did not go as well as planned and will consider another attempt when the fuels dry out in a couple days. This will tie the control line to Skilak Lake. Structure protection continues with the complexities of the Wildland Urban Interface which requires the skill of the Type 1 and Type 2 hand crews but the evacuations have been lifted, allowing residents to return home. The fire size remains 7657 acres with the acres again verified with a GPS flight by the Situation Unit Leader and FBAN. Minimal Fire behavior today as the marine layer allowed for good humidity recovery overnight and also into the daytime as the sun was unable to break the cloud layer. Today's weather limited fire behavior to smoldering and creeping fire with an occasional single tree torching.

 Name: **Chisana River 2** Cause: Lightning

The fire was extremely active today, making a substantial push to the southwest consuming over 10,000 acres. Large runs are plotting up to a quarter mile, including over the Chisana River, with miles of continuous uninterrupted backing. We inserted 2 people to spike out at yet another permitted cabin. We mapped the fire at 29,889 acres and shuttled supplies to both spike camps. A transition took place today from a Type 4 to a Type 3 incident. Tomorrow, the mission includes more recon, structure protection, a mapping mission, and preparation for a possible burn out. We expect the fire to reach a couple of the permitted cabins in the next 24 to 48 hours.

Fire personnel were able to lay hose around the west side of the fire, connecting a series of lakes to a slough on the northern end of the fire. PSD operations were utilized to burn the west side of yesterdays slop over. The northern slop made a run to the northeast. Plans for tomorrow are to evaluate fire progression on the east side of the north slop, and plan for potential opportunities to guide the fire with PSD operations while utilizing natural water barriers. Current projected forecasts call for a north wind, which will ease the team with their burn operations. Nikolai crew was demobilized off the fire today.

McGrath residents reported smoke across the river from McGrath. H-16973 responded and reported the fire to be .75 acres flames not yet above the canopy. The helicopter began bucket work to knock the fire down. Two personnel were mobilized to the fire and reported it to be smoldering in hardwoods with winds 1-3 mph out of the northeast. Personnel will continue to suppress the fire throughout the evening.

The fire was reported by multiple locals in McGrath. T-10 was off McGrath enroute to a different fire and also called it in. It was reported as a lightning fire that had just started, burning in continuous black spruce with group tree torching. The fire was actively spotting, and had very little natural barriers around it. T-10 took action, along with T-101 out of McGrath and A-4 out of Galena. Helicopter 212HL responded with initial attack personnel, along with helicopter 16973 assisting with bucket work. Half of the Nikolai crew was mobilized, but due to lack of duty day on the aircraft the other half will have to be mobilized tomorrow.

A smoke was reported by a Forestry engine during their patrol. A half acre fire was located a short distance off the main road burning actively in black spruce. The engine crew worked to extinguish the flames. One dozer and a water tender assisted in suppressing the fire. Air attack and a retardant tanker were able to provide a full size up from the sky. Firefighters plan on full suppression by next fire operational period.

The fire was reported by detection aircraft 1010F as 60 acres, burning in tundra and black spruce with continuous fuels. The fire was located 3.5 miles south southwest of the town of Crooked Creek. Smoke Jumpers, A/A, and 2 tankers were requested to respond. There were no jumpers available in the state, and A/A and tankers were told to stand down for now. The Salt Lake City type 2 IA crew was mobilized into Crooked Creek to evaluate the situation before coming up with a suppression plan. The crew spent the evening reconning structures in the area, and putting together their plan. Tomorrow they will continue to do point protection for the town of Crooked Creek.

6/20: Fire was sized as 3-4 acres, in a swampy area, with structures threatened, but not immediately, there was 1/2 a mile between fire and structures with retardant line in between on the left flank. Resources on scene were Craig IHC, 6 smokejumpers, Anderson Fire Department's water tender and Nenana Fire Department. At midnight the fire was sized to be about 1200 acres, rank 3, making short runs between structures and the highway.

6/20: Fire was initially sized as 2 - 3 acres with black smoke, and structures in front at 1847. Forestry engines, jumpers, Craig IHC, tankers, White Moutina T2IA, Fairbanks 1, Lead Plane 5AK, responded to fire. Due to air tankers running out of flight time, they returned to their bases before midnight. At 2341 LP 5AK reported that the fire had grown to 1500 acres, was a rank 6, with one structure being hit by fire.

6/21: Consisted of extended air tanker support with firefighters on the ground doing structure protection.

Crews continued to secure control lines today in Division A and continued mopping up and patrolling around structures. Division D also continued mop up and worked on active fire in pockets of spruce in parts of the division. Division K continued to secure their control lines and continued working their extensive plumbing show of hose lays and completed and use that two miles of hose for heavy duty mop up. Operations is still considering another attempt to burn when the fuels dry out in a couple days to tie the control line to Skilak Lake. Structure protection continues with the complexities of the Wildland Urban Interface which requires the skill of experienced hand crews and with the evacuation lifted most residents have returned home. Better mapping puts the fire size at 7352 acres. Minimal Fire behavior today as the marine layer remained over the fire allowing for good humidity recovery overnight and also into the daytime as the sun was unable to break the cloud layer. Today's weather limited fire behavior to smoldering and creeping fire with an occasional single tree torching.

The fire was moderately active today, making a push toward the north east consuming roughly 6000 acres. The moderate activity was due to precipitation over the fire vicinity. Small runs group torching and continuous backing front were observed today. We established structure protection around additional perimeter cabin, resupplied Chisana with supplies from fixed wing, and had successful mapping and recon mission. Tomorrow's mission includes more structure protection on permanent cabin, recon, preparation for a possible burnout, and a mapping mission.

Fire was flown on the morning of 6/21, spotting was observed a quarter to one mile off of the perimeter. On the even recon flight, fire behavior had increased. Fire was observed torching in single and cluster trees, and was moving through scrub birch and brush on ridgeline. Will continue to monitor with daily recon flights and plans are being formulated for suppression options. (Fire acreage decreased to do more accurate mapping.)

The fire was flown by detection aircraft 1010F. The fire was reported to be 7500 acres, 75% active on perimeter, with 7-10 foot flames and continuous fuels. The fire appeared to be moving in direction of a cabin to the SE. The main portion of the fire had already moved past the cabin and it is currently protected by several creeks. Due to limited resources and higher priority fire no action was taken. The fire will remain in monitor status.

A pilot reported a fire 7-10 miles outside McGrath. H-16973 lifted from McGrath to get eyes on the fire. The fire was reported to be 5.1 acres in mixed hardwoods and spruce. Single tree torching on the east half and continuous fuel in a thick canopy. The helitack load was set down 1/2 mile from the fire and the helicopter began dropping water on the fire. The bucket work was effective and they were able to get a perimeter around the fire. Helitack load was demobilized off the fire and a transfer of command took place. Remaining personnel continued to work on the fire late into the evening and will commence operations in the morning.

The fire was reported by Togiak residents as a tundra fire a couple of bends upriver of Togiak. The report was flown by detection aircraft N-249CP and found approximately 14.4 miles out of Togiak. The fire was reported to be burning on the west side of the river in the grass and continuous fuels. The fire perimeter was 100% active. There are several camps approximately 3 miles east of the fire. The fire was burning in a favorable direction away from the camps. Due to higher priority fires and limited resources no further action was take. The fire will continue to be monitored.

Aircraft and personnel worked throughout the day to try to save the town of Nulato. By early afternoon, the fire had spotted across both the Nulato River road and the dozer line. As the tankers tried to knock down the head, and personnel extinguish the spots, it was discovered that the fire had spotted into Nulato. Crews were able extinguish the spots in Nulato, however a spot fire was able to establish itself on the other side of the structures and began to run up the hill, basically surrounding Nulato by fire. Aided by the arrival of a T1 crew securing existing barriers and performing burn out operations, the town of Nulato was secured for the night. The airstrip will be temporarily closed while the fire moves through that area.

 Name: **Juneau Lake** Cause: Lightning

A cloud layer has continued to assist by encouraging minimal fire behavior. However, temperatures have increased and RHs have dropped somewhat today, causing single tree torching on interior islands. This trend is expected to continue tomorrow with additional clearing of the marine layer perhaps causing some increased activity on the interior of the fire. The Lolo T2IA continued with direct line construction from the anchor point on the NW corner dragging line south, and working from rock to rock. One type 3 helicopter continued to assist with crew and supply shuttles. Acreage increase is due to more accurate mapping.

Crews on the Stetson Fire are currently building control line up to the top of the fire on the south flank. The line will take at least another day due to the dirty burn along that flank. Continued statewide resource sharing of two T3 helicopters and aerial supervision. Closures are still in effect for the Cooper Creek Campground and Stetson Creek Trail. The fire behavior is creeping with a few smokes and single tree torching on interior green islands. Temperatures were up 10-15° and RHs were down about the same.

 Name: **Card Street** Cause: Human

Crews in all divisions continued their work today as they have for the past two days with significant progress in mop up, gridding, patrolling and securing all control lines. Fire behavior picked up a bit today as the sun broke through the receding marine layer and things warmed up quicker than anticipated. Fire behavior is expected to increase over the next couple days due to warming temperatures, lower humidity's and a slight increase in wind over the fire area. This will result in a potential for single and group tree torching along with the possibility of creeping fires carrying more than the past couple days. The concerns with the buildup index becoming high to extreme and the same for the drought code. That will contribute to the increase in the indices which could become problematic in areas of the fire. Operations is still considering another attempt to burn and as the fuels dry out in the coming days the possibility becomes more optimistic to tie the control line to Skilak Lake. Structure protection continues with the complexities of the Wildland Urban Interface.

There was torching and spotting with increased activity compared to last shift, even with today's minimal winds over the fire. Paracargo to support the fire personnel was received. There was no growth today. Personnel are mitigating hazard trees, working toward containing the Eastern flank. Ther plan for next shift is to continue working along the North and South edges to secure the Eastern flank, and relocate the spike camp from H-1 to H-15 to be closer to the work site.

The fire was moderately active today, making a push toward the north east consuming roughly 6000 acres. The moderate activity was due to precipitation over the fire vicinity. Small runs group torching and continuous backing front were observed today. We established structure protection around additional perimeter cabin, resupplied Chisana with supplies from fixed wing, and had successful mapping and recon mission. Tomorrow's mission includes more structure protection on permanent cabin, recon, preparation for a possible burnout, and a mapping mission.

The Chena Crew was demobilized to Fairbanks due to mandatory days off. Kalskag crew pulled hose from along the western interior line so that it could be redeployed for structure protection. Due to current and forecasted conditions, this fire will continue to move beyond current control lines. Due to lack of available resources a change of strategy is happening and all efforts will be focused on structure and village protection from now on.

The fire was flown by zone aircraft N114MN at 1606 and reported as 10,000 acres, 95% active with group torching and a continuous crown fire. An old burn scare is doing a good job of hold the fire on the north side, but with nothing to halt its growth on the east side, it is expected to continue increasing in size. The fire will remain in monitor status.

BD 840AK flew the fire and H-361EH was utilized for bucket work near the fire's perimeter. Resources continued burning out pockets of unburned fuel to clean up yesterday's burnout operations. Crews extinguished small spots within Nulato and continue to strengthen the black line around town. Weather observed was clear skies but smoky most of the day with moderate fire behavior of group and single tree torching occurring as the fire grew to the North today, pushing it away from Nulato. The fire is estimated at 1200 acres. The airstrip will be temporarily closed while the fire moves through that area.

 Name: **Stetson Creek** Cause: Lightning

The Stetson Fire is 60% contained. A high pressure area has moved over the incident raising daytime temperatures and lowering humidities. This has increased the potential for increased fire activity. Crews are working multiple spots on the SW corner of the fire and will spend part of the next operational period lining spots, finishing line on the north flank and continuing with mopup to meet forest turnback standards. The projected significant demobilization is expected 6/27/15.

6-22-15

Crews in all divisions continued their work today as they have and made good headway in mop up, gridding, patrolling and securing all control lines. Fire behavior did pick up today as predicted today with early cloud cover burning off by mid-morning. Fire behavior is again expected to increase over the next couple days with the warming trend with continued temperatures in the mid to upper 70's, lower humidity's and a slight increase in wind over the fire area. This will again result in a potential for single and group tree torching along with the possibility of creeping fires carrying more over the next couple days. Concerns remain with the buildup index becoming high to extreme and the same for the drought code. Indices will continue to rise incrementally which may become problematic in areas of the fire if conditions continue to change. The attempt of pulling off a burning operation was not successful and scrubbed as fuels did not hit prescription and decided not to make a mess and eliminate options for tomorrow. Structure protection continues with the complexities of the Wildland Urban Interface.

The fire received paracargo today to support personnel. The inversion created ideal conditions for crews to progress around the east flank. Line was secured around the eastern flank as well. The road to the boat launch was improved for future use. Tomorrows goals are to secure the north side of the fire and continue mopping up.

Crews continued to mop-up and grid. Resource Advisors assessed suppression damage in Division G. The Mat-Su Borough completed their preliminary damage assessment today, estimating 55 lost homes, 44 damaged, and 338 affected properties. An open-house was held at the Willow Community Center allowing interaction between firefighters, cooperators, and the public. Resources continue to demobilize. Six crews are scheduled to be released on 6/24. A transition back to a local Type 3 organization is being planned for 6/27.

Detection aircraft 1010F flew the fire and reported that the fire made a significant run due to a north-northwest wind that pushed it onto a ridgetop. The fire was 3 miles away from Chuathbulak, with continuous fuels between the town and the fire. Helena crew were being shuttled to Chuathbulak to provide point protection, but had to turn around due to bad weather. Towards the end of the night the fire was receiving heavy precipitation, and will be monitored tomorrow.

The fire was flown by detection aircraft N-249CP. The fire was 3000 acres, burning across level terrain in grass and 100% active. The detection ship reported structures on an island 1 mile away but the fire was not burning in the direction of the structures. Due to higher priority fires and limited resources no further action was taken. The fire will continue to be monitored.

The fire was flown by an IC out of Aniak at 1400. The fire was 100% active with a north wind running the fire towards the Kuskokwim River. There was no impact from the thunderstorm the night before and the fire was backing into tundra on the northern perimeter, and mixed hardwoods and spruce to the south. The fire was again flown around 1900 and was reported to have made a significant run to the south in the mixed spruce and hardwoods. Fuels normally resistant to fire are burning actively, and the fire had bumped up against the river. Salt Lake City Type 2 IA crew was mobilized into Aniak, along with the Kalskag crew to help begin site protection for the community.

Fire is being managed by Staats` IMT2. They reported fire growing in all directions but most of the spread is toward the southeast. They will continue with point source protection. The fire is currently 5.5 miles from the nearest native allotment which contains structure development. The fire is 9 miles away from the center of the village of Tanana, and several power lines corridors within that 4 mile distance.

The fire was reconned via helicopter to update acreage and fire behavior. The fire continues to grow mostly through creeping. The large number of people necessary to set-up protection around values at risk poses a logistics challenge when supplies move via truck and then by boat or helicopter. A type 2 incident manage team will take over the fire on 6/26. The team organization will assist in making support of field personnel go smoother. The cabins nearest the fire are being protected first. Establishing protection around Healy Village is becoming an equal priority with special consideration being given to archaeological sites.

**P0JS17** Legal: 005N 004W 12 S Out Date:  
 #312 Owner: USFS Unit: AKCGF-Chugach National Forest  
 Name: **Juneau Lake** Cause: Lightning

Warmer temperatures and lower RHs resulted in some single tree torching on the interior of the fire today, but increasing clouds and moisture are expected to significantly minimize fire behavior starting tomorrow. The Lolo type 2IA crew continued with mop up on the west and southwest corner of the fire. A type 2 and type 3 helicopter were utilized for bucket work and for crew and supply shuttles. Significant demobilization of resources is expected to begin before the end of the weekend.

 #306 Owner: County Unit: AKAKS-Kenai Peninsula Borough  
 Name: **Stetson Creek** Cause: Lightning

The Stetson Creek Fire is 65% contained. The fire behavior today was minimal and creeping. The incident continued sharing the aerial supervision and Type 3 helicopter. Mopup operations will be continued in the next operational period and rehab of control lines will continue where needed. The closure order is still in effect for the south half of Cooper Creek Campground and Stetson Creek Trail.

 Name: **Card Street** Cause: Human

Crews in all divisions continued their work today as they have and continue making headway in mop up, gridding, patrolling and securing all control lines. Fire behavior did pick up today as predicted with early cloud cover burning off by mid-morning. The forecast for tomorrow is for a 30% chance of rain but no chance for a wetting rain and this will result in minimal fire behavior. With that forecast in mind Operation went for the burning took the chance to pull off the burning operation today as the fuels did hit prescription and were quite successful with their efforts. The operation was successful in that they were able to tie the control lines together and bring the black line down towards the old burn and the lake. This will secure those control lines and bring a comfort level to everyone on the fire. Structure protection continues with the complexities of the Wildland Urban Interface.

 Name: **Tanana Slough** Cause: Lightning

Smoke layer aided suppression activities with low-moderate fire activity. Fire personnel received paracargo to support fire needs. Road to boat launch was improved by using machinery. Three aircraft flew over Dot Lake staging creating the need for flight restrictions above the fire area to mitigate safety. Crew will continue securing north side of the fire coming from the east and west and mopping up edges.

J-63 was launched to recon the fire and potential threat to the Tripod Flats Cabin 5 miles east of the fire, winds were out of the northwest. At 1629 J-63 was over the Tripod Flats next to the cabin and reported there was too much smoke to commence jump operations. West winds are predicted, posing a continued threat to the Tripod Flats cabin as the fire continues to grow. An additional structure was identified further east in the path of the fire with predicted west winds. Cabin protection sprinklers remain in place on the Old Woman cabin and shelter and the fire will be flown again tomorrow. At this time the fire remains in monitor status.

 #628 Owner: Tribal Unit: AKVLN-The Kuskokwim Corporation  
 Name: **Red Devil** Cause: Lightning

The fire was reported at 0330 by a local resident of Red Devil to be ½ mile away from town, and being pushed towards them. All locals were contacted and aware of the fire, and had an evacuation plan set in place. By 0900 the fire had subsided, and was still the same distance away from the town. 2 personnel boated from Crooked Creek to assess the fire and determine what kind of action would be best suited to take place. J-09 responded from Fairbanks, and Helena T2IA and Chevak #2 were both mobilized into Red Devil. Upon arrival, it was determined that J-09 did not need to take action, and they were returned to McGrath. Later in the evening the winds switched out of their favor resulting in T-49, T-47 and BD-131 all responding from Palmer. The tankers dropped one load of retardant both on the south side of the village. No evacuation took place, and the fire will continue to be monitored throughout the night. Plans for tomorrow consist of all fire personnel providing structure protection throughout Red Devil.

On 6/25/15 The Alaska Green Team took operational control of the fire. Due to smoke conditions a large area of the fire was not visible till late in the afternoon. Fire behavior was observed to be smoldering and creeping on the north side, single tree torching on the southern flanks. Late in the afternoon, group tree torching was observed. Dozers started working on re-establishing old fuel breaks on the ridge above Two Rivers School. The Roosevelt IHC began putting in saw lines from the dozer line into the Little Chena drainage. Plans for next operational period are: IHC's will continue saw lines and Type 2 crews will work to improve contingency lines. Dozers will continue re-establishing the fuel breaks and Type 2 crews will support the dozer operations. In Division 2 the structure branch: work will continue with structure protection and evaluation.

 #292 Owner: Tribal Unit: AKCIN-Cook Inlet Region, Incorporated  
 Name: **Card Street** Cause: Human

Crews in all divisions continued their work today as they have and continue making headway in mop up, gridding, patrolling and securing all control lines. Fire behavior did pick up today as predicted today even with the cloud layer moving in. The forecast for tomorrow is for a 35% chance of wetting rain and this will result in minimal fire behavior and will again give firefighters a good opportunity to gain ground on mop up. With the weather predicted to be the same for the next few days crews will be able to tie the control lines together and continue mopping up and securing all control lines. This continued work will allow firefighters to meet their objectives in a timely manner. Mop up and patrolling around the structures continues Structure protection continues with the complexities of the Wildland Urban Interface. No other significant activity on the fire today. The fire size grew as a result of the burning operations and with another GPS today confirmed that the fire remains 8841 acres.

65.0 Acreage Change Since 06/24

**JT7S** Lat: **60:58:34.2** Status: U/U Acres: **80.0** Option: **FULL**  
**504624** Lon: **161:01:10.8** Start Date: 6/24/15 Area: **SWS**  
 Legal: 010N 066W 8 S Out Date:  
 #624 Owner: Tribal Unit: AKVLN-Kokarmiut Corporation  
 Name: **Mishevik** Cause: Lightning

The fire was flown by H-392NS. They reported the fire to be 80 acres, in tundra and mixed hardwoods, 50% active, creeping and smoldering. The fire had west winds 5-10 miles an hour. The town of Tuluksak is seven miles away from the fire, but there are multiple water sources between it and the town so it is not considered threatened. The fire will remain in monitor status.

The fire was called in early in the morning as smoke in the area. Butte FD responded and located the fire. One Forestry engine and one Prevention responded at the beginning of shift and tied in with Butte FD. They found at 0.3 acre fire smoldering in leaf litter and mixed hardwoods. The Mat-Su IA Squad was requested to assist and the engine and Prevention were released. The fire was contained, controlled, and placed in monitor status. The cause of the fire is still under investigation.

Fire personnel continued to provide site protection around the town of Red Devil. At 1845 it was determined that action needed to take place on two active spots. T-55, T-52, and LP-0AK all responded from Palmer. Due to bad weather T-52 was unable to take action, but T-55 was able to drop two loads of retardant. Due to the fire receiving light rain last night, crews were able to implement a direct attack strategy that will continue to be the strategy from here on out.

 #547 Owner: State Unit: AKAKS-Alaska DNR Other  
 Name: **North Aniak** Cause: Lightning

The IC and Operations met with the community of Aniak to discuss future plans, and listen to their concerns. The biggest concern was multiple structures across the river from the town, that are in a direct path with the fire. Plans for tomorrow will consist of continuing to prep the town of Aniak, as well as fly to the structures across the river and start plumbing those for protection. A recon flight happened this morning and it was reported that the fire was moderately active today, but made significant growth yesterday evening.

Continued use of aerial and ground resources to protect the threatened towns of Nulato, Koyukuk and structures along the Yukon River. Firefighters will work to keep the fire west of the Koyukuk River and north of the Yukon River. The fire perimeter is 100% active with isolated group torching. Firefighters continue constructing hose lay, saw line, fuel breaks, and will possibly be burning out if necessary. Firefighters will attack and mop-up all spot fires within the outskirts of Nulato. Due to the threatened status of the village of Koyukuk firefighters anticipate constructing a saw line and hose lay in a natural slough barrier southwest of Koyukuk.

 #384 Owner: BLM Unit: AKAND-Anchorage District Office  
 Name: **Old Woman** Cause: Lightning

4MN flew a recon over the fire and observed the fire perimeter 60% active, smoldering, creeping, backing and torching. The fire has steadily burned to the east and is approximately 2.75 miles from the Tripod Flats Cabin and is roughly 30,000 acres. There is no threat to the Old Woman cabin and shelter at this time with no smoke showing on the western perimeter of the fire. Structure protection remains in place on all three cabins. Burn out operation plans have been established and will be implemented if necessary.

 Name: **Iditarod River** Cause: Lightning

Fire personnel continued to secure a line around Iditarod and prep structures for site protection. At 1700 it was determined that J-01 should respond from McGrath to provide structure protection for two occupied cabins in the area. J-01 deployed four jumpers, and they will continue to clear fuels around the structures.

 Name: **Card Street** Cause: Human

Crews in all divisions continued their work today as they have and continue making headway in mop up, gridding, patrolling and securing all control lines. The forecast for tomorrow is for a 35% chance of wetting rain and this will result in minimal fire behavior and will again give firefighters a good opportunity to gain ground on mop up. With the weather predicted to be the same for the next few days crews will be able to tie the control lines together and continue mopping up and securing all control lines. Mop up and patrolling around the structures continues Structure protection continues with the complexities of the Wildland Urban Interface. Crew began pulling hose and equipment off the line today and that will be the plan for the next few days. Rehab has begun on the dozer lines and other areas of the fire. The fire size remains 8876 acres.

 Name: **Medicine Creek** Cause: Lightning

The fire was flown by detection aircraft 1010F. The fire was reported to be at 80 acres, 6.1 miles north of the village of Medfra. The fire had spread up the hill to the ridge top, and the north flank was smouldering. The fire was putting up smoke but also taking some rain. There is also a large mining encampment three miles due north west of the fire. The fire had hit a ridge and laid down, it was not moving in the direction of the mining camp. Due to limited resources and higher priority fires no further action was taken. The fire will continue to be monitored.

All resources and operations have been moved to Fire 513393.

Daily Report From: 06/26

5,779.0 Acreage Change Since 06/25

**JS7Z** Lat: **65:16:00.0** Status: **U/U** Acres: **30,000.0** Option: **LIMITED**  
Lon: **156:13:00.0** Start Date: 6/19/15 Area: **GAD**  
**PDJ7SZ** Legal: 002S 013E 33 K Out Date:  
# 340 Owner: USFWS Unit: AKKUR-Koyukuk National Wildlife Refuge  
Name: **Dulbi River** Cause: Lightning

4MN flew a recon over the fire and observed the fire perimeter 50% active, smoldering, creeping, and backing with single tree torching. A cabin was identified in the fire area. There is no active fire around the cabin and no threat at this time. Fire 340 and Fire 539 are close to joining. The fire remains in monitor status. Acreage will be updated accordingly.

This was reported as a fire in the ditch on the side of the road. Two Forestry engines, Prevention, and Butte FD responded. Upon arrival of one Forestry engine and Prevention they found an escaped burn barrel fire smoldering at 0.1 acres. The other Forestry engine was released and the personnel on scene took action on the fire containing and controlling it.

Name: **Iditarod River** Cause: Lightning

Cooler weather helped moderate the fire, however the fire did make short runs at multiple times through-out the day. Fire personnel continued prepping around the occupied cabins, and also around the town of Flat. When the weather allows, a burn out operation will take place around the cemetery. Pumps and hose were slung into Flat today from Iditarod, and fire personnel will now be able to finish establishing hose lay around Flat. Four jumpers were demobilized from the fire.

Crews in all divisions continued their work today mopping up, gridding, patrolling and securing all control lines. The forecast for tomorrow calls for a 10% chance of wetting rain which will continue minimal fire behavior giving firefighters more opportunity to meet their suppression objectives. Mop up and patrolling around the structures is ongoing and Structure protection continues with the complexities of the Wildland Urban Interface. Crews continued pulling hose and equipment off the line today and back hauling everything back to the ICP and this will be the plan for the next few days. Rehab has begun on the dozer lines and other areas of the fire. The fire size remains 8876 acres. We have had several resources re-assigned over the past few days and we will continue to right size the incident personnel to meet the needs.

The fire transitioned from ICT1 to ICT3 at 0700 on 6/27. Personnel will continue to work towards 100% containment while ensuring protection of stuctures within the fire perimeter. The north division completed gridding today and the north zone was placed into patrol and monitor status. The south division continued to mop up berm rows and isolated interior heat. The planned actions for the next operational period is to continue patrolling the North Division, continue mopping up berms and interior heat in the south division, and keep the structure group patrolling during the night.

Moderate fire behavior was observed with creeping ground fire. Isolated crown torching was observed on all sides of the fire, with the highest concentration of heat on the northern end of the fire. Showers and high relative humidity limited the activity of the fire. Plan for next operational period is to continue point protection and to monitor the progress of the burn toward management action points.

4MN flew recon over this fire today. Updated acres to 24,134. They also deduced that this fire and Fire 340 have burned together, thus updating both of the fires acres, respectively. Fire 539 has a 50% active perimeter, with light, variable winds. Observations also included creeping, backing, single torching, and 5-10 ft flame lengths. Additionally the fire is active with backing and flanking with isolated group torching. The fire is fuel driven with most of the activity in heavier fuel concentration. The fire remains in monitor status. Acreage will be updated accordingly.

4MN flew recon over this fire today. Updated acres to 56,687. They also deduced that this fire and Fire 539 have burned together, thus updating both of the fires acres, respectively. Fire 539 has a 50% active perimeter, with light, variable winds. Observations also included creeping, backing, single torching, and 5-10 ft flame lengths. Additionally the fire is active with backing and flanking with isolated group torching. The fire is fuel driven with most of the activity in heavier fuel concentration. The fire remains in monitor status. Acreage will be updated accordingly.

The fire exhibited slightly more fire behavior today due to weather conditions in the area. The fire had multiple active fingers, and interior heat was still being observed in many locations. The Nondalton Type 2 Crew was mobilized into place, and personnel will continue ground suppression efforts. Tentative plans for tomorrow consist of combining ground suppression efforts with aerial efforts.

Fire had minimal fire behavior with smoldering, creeping in surface fuels and occasional torching in black spruce. Extensive areas along the fire perimeter and within the interior contain heat but did not produce active burning. Light showers occurred in the early morning with afternoon temperatures in the low 60's and relative humidity in the 70% range. Strategic objectives are to (1)Protect all subdivisions, communities, residences, businesses, and associated infrastructure within and adjacent to the fire area. The Himalaya, Haystack Hill, and Hayes Creek subdivisions are located to the south along the Elliot Highway. The Tatalina subdivision and Community of Joy are located to the north along the Elliot Highway. (2)Reduce/negate impacts to the Elliot Highway. The highway is the only transportation corridor for critical supplies to corporations and communities to the north. (3)Protect infrastructure along the Alyeska Trans-Alaska Pipeline.

Previous days precipitation over the fire has limited the access into the fire area. Due to unsafe roads and trails crews were kept out of the fire area until conditions could improve. The area of the fire is a natural nesting area for eagles and falcons. Smoke impacts to the communities of Pleasant Valley, Two Rivers and the Chena Hot Springs Road remain a concern.

IMT2 (Hutton) Significant smoke shading minimized area fire behavior. Fire behavior was isolated heat confined to the heavy dead and down fuels. Firefighters have made significant progress continuing to secure containment lines. The heavy smoke shading prohibited safe aerial crew shuttles. The T2IA crew will continue to mop-up areas of heat and patrol for spot fires across containment lines. Firefighters will assess and prepare structures along the Yukon River northeast of the fire.

Weather concerns today were cool temperatures and high humidity again today, 68 degrees with humidity at 50%. Tomorrow highs are forecasted to be 75 degrees with 35% humidity. Continued warming expected for Monday with temperatures forecasted near 77 degrees and humidity at 33%. The Type 2 team's life, safety, and health threats are dead and down fuels, limited vehicle access to the fire, low visibility (fog) and smoke, structures in remote locations. Tourist and fire traffic on Highway 3 which is adjacent to the fire area. Wet road conditions, some roads are native surfaced wildlife.

Crews continued their work today patrolling and securing all control lines. The forecast for tomorrow calls for a 10% chance of wetting rain which will continue minimal fire behavior giving firefighters more opportunity to meet their suppression objectives. Crews patrolling around the structures remain aware of structure protection within the Wildland Urban Interface. Crews continued pulling hose and equipment off the line today and back hauling everything back to the Incident Command Post and this will be the plan for the next few days. Rehabilitation has begun on the dozer lines and other areas of the fire. The fire size remains 8,876 acres. Several resources have been re-assigned over the past few days and personnel will continue to right size the incident personnel to meet the needs. Anticipate the release of additional crew over the next couple days.

 Name: **North Aniak** Cause: Lightning

Fire personnel continued to assess structures in Aniak, plumbing and prepping for site protection. Crews worked in conjunction with personnel from fire 546 to provide structure protection to multiple structures across the river, and in the direct path of the fire.

Fire bosses and A/A flew fire's 547 and 229 until 2200.

4MN flew this fire today with the following observations. The perimeter is 20% active, smoldering, backing, running, and group torching. The fire is stringing its way between lakes and wetlands on the south and SW portions. Fire is backing aggressively through black spruce to the north and NW. East perimeters were too smoky to accurately observe. J-66 responded and deployed a total of six smokejumpers on three cabins today. Smokejumpers worked to assess and prepare structures for potential burnout operations if necessary. H-361EH delivered supplies to support structure protection preparation and demobilized two smokejumpers and two firefighters.

Low fire behavior with smoldering, creeping in surface fuels and occasional torching in black spruce. Extensive areas along the fire perimeter and within the interior contain heat with limited active burning. Considerable sunshine and reduced area smoke contributed to temperatures in the low 70's and relative humidity in the 30 to 40% range.

Isolated interior group tree torching. Continued progress on containment lines will secure the area of the fire adjacent to the town of Northway. If significant fire growth occurs, the fire may impact the Alaska Highway and additional residences. A structure assessment is currently on-going and will determine the status of additional threats to safety if significant fire growth occurs. The plan for the next operational period is to continue to secure area around threatened structures, identify and assess future threats to private property and structures. Continue to mop up and rehabilitate line on north and northeast sides of fire.

Crews continued their work today patrolling and securing all control lines. The forecast for tomorrow calls for a chance of wetting rain which will continue minimal fire behavior giving firefighters more opportunity to meet their suppression objectives. Personnel continue patrolling around structures and in other divisions of the fire. Personnel continue pulling hose and equipment off the line and backhauling everything to the ICP; this will be an ongoing task for the next few days. Rehab has begun on the dozer lines and other areas of the fire. The fire will transition to a Type 3 fire on Thursday, July 2nd.

 Name: **Chisana River 2** Cause: Lightning

Fire activity increased this afternoon with warmer, drier conditions. Moderate fire activity was observed on all sides of the fire, with the largest concentration of heat on the northwest side of the fire. The plan for the next operational period it to continue monitor status using aircraft and evaluate potential fire movement toward point protection areas.

4MN flew recon on this fire today and observed the following. Currently has a 60% active perimeter, with a light and variable wind. The fire is backing and flanking in all directions except for the east, where it is hung up on the Little Mud. FWS Field Camp 63 38.36 x 158 01.78, is about five miles south. Fire will easily spread to within one mile before it hits a large oxbow lake and some spruce/hardwoods fuels, which is surrounding the field camp. Aerial Observer estimates two days to the lake.

4MN flew recon on this fire today and observed a 30% active perimeter, with smoldering, creeping, backing, and group torching characteristics. Fuels involved were black spruce on a flat rolling terrain. The fire is backing and flanking in all directions, except N/NE, where a creek drainage (Little Mud) has held it up.

4MN observed this fire with a 40% active perimeter, with smoldering, creeping, backing, running, torching, and continuous crowning. Fuels burning involve black spruce, and spruce/hardwood mix. There is a pocket of activity on the south end of the fire backing into an old burn scar in the hills. Most of the NE corner of the fire is a continuous crown fire moving to the NE.

4MN flew this fire today and observed a 50% active perimeter with smoldering, creeping, backing, and group torching. Fuels involved are grass and a hardwood mix. Winds were light out of the S/SW, on a flat terrain. The fire is stringing itself between lakes and wetlands to the S/SW, and will likely join fire 565. It is backing to the west, and to the north is mostly being checked by a series of lakes. 6/29

 Name: **Yukon Creek** Cause: Lightning

4MN flew this fire today and observed a 50% active perimeter with smoldering, creeping, backing, and group torching. Fuels involved are grass and a hardwood mix. Winds were light out of the S/SW, on a flat terrain. The fire is stringing itself between lakes and wetlands to the S/SW, and will likely join fire 565. It is backing to the west, and to the north is mostly being checked by a series of lakes.

 #249 Owner: USFWS Unit: AKINR-Innokko National Wildlife Refuge  
 Name: **Innokko River** Cause: Lightning

4MN flew recon over this fire today and observed an 80% active perimeter, with smoldering, creeping, backing, running, and group torching characteristics. Fuels were burning in a spruce/hardwood mix on a rolling terrain, with winds out of the SW. The fire has spread north and east along a ridge between the Innoko River and Sucker Creek. It could threaten cabins if it crosses Sucker Creek.

Daily Report From: 06/29

The fire was flown by detection aircraft 909AK. The fire was only five percent active on the perimeter and only the west side was showing any heat. The fire had winds out of the south, two to three miles an hour. No resources currently threatened.

Fire activity picked up later in the day.

Fire bosses and A/A flew fire's 547 and 229 until 2200.

Crews were mobilized to the fire to provide point protection. Incident commander confirmed all personnel and equipment were in place and crews were actively working both flanks of the fire. Approximately 100 acres on the interior of the fire was showing heat, as well as the fire edges. There were thunder storms in the area but the fire was not receiving much rain. The crews will continue to work the fire edges and provide protection on known sites.

There was a new start within the Aggie Creek TFR. The Great Basin T2 IMT mobilized one of the type 3 helicopters to respond and their A/A. The fire had low fire behavior with smoldering, creeping in surface fuels and occasional torching in black spruce. Extensive areas along the fire perimeter and within the interior contain heat with limited active burning. Mostly cloudy conditions, reduced area smoke and contributed to temperatures around 70° and relative humidity in the 40% range.

Much of the fire perimeter is inaccessible by vehicle with long travel times on foot. There are multiple communities and structures as well as railroads, transmission lines, and highways which the fire has the potential to impact. Strategic objectives include point protection and direct attack around structures. Using natural barriers where feasible, otherwise constructing line to flank and contain the fire. Using direct attack where and when it can be done safely. And continuing to use air support to assist in suppression operations.

 Name: **Card Street** Cause: **Human**

Crews continued their work today patrolling and securing all control lines. The forecast for tomorrow calls for a chance of wetting rain which will continue minimal fire behavior giving firefighters more opportunity to meet their suppression objectives. Still patrolling around the structures and in other divisions of the fire and others continued pulling hose and equipment off the line and back hauling everything to the ICP and will be an ongoing task for the next few days. Rehab has begun on the dozer lines and other areas of the fire. The fire size remains 8876 acres. We have had several resources re-assigned over the past few days and we will continue to right size the incident personnel to meet the needs. We anticipate the release of additional overhead over the next couple days with the remainder of WAIMT being released on Thursday July 2nd. Ground Hog Day today!!!!!!

Structure protection is still in progress at this time as work progresses towards 100% containment of the fire. Personnel will continue work upon rehabilitating dozer lines and patrolling the area, with continuous mop up focusing upon interior heat sources and separating berms. Plans are to transition the incident into Type 4 Thursday morning.

 Name: **Yukon Creek 2** Cause: Lightning

4MN observed this fire with a 40% active perimeter, with smoldering, creeping, backing, running, torching, and continuous crowning. Fuels burning involve black spruce, and spruce/hardwood mix. There is a pocket of activity on the south end of the fire backing into an old burn scar in the hills. Most of the NE corner of the fire is a continuous crown fire moving to the NE.

4MN flew this fire today and observed a 50% active perimeter with smoldering, creeping, backing, and group torching. Fuels involved are grass and a hardwood mix. Winds were light out of the S/SW, on a flat terrain. The fire is stringing itself between lakes and wetlands to the S/SW, and will likely join fire 565. It is backing to the west, and to the north is mostly being checked by a series of lakes. 6/29

4MN flew recon over this fire today and observed a very active perimeter, with smoldering, creeping, backing, and running characteristics. Fuels involved are tussock tundra, and brush on flat, rolling terrain. Report dictates a very active fire continuing to gain in size, a tundra gobble if you will. This fire has also consumed #402 and #404.

 Name: **Innokko River** Cause: Lightning

4MN flew recon over this fire today and observed an 80% active perimeter, with smoldering, creeping, backing, running, and group torching characteristics. Fuels were burning in a spruce/hardwood mix on a rolling terrain, with winds out of the SW. The fire has spread north and east along a ridge between the Innoko River and Sucker Creek. It could threaten cabins if it crosses Sucker Creek.

Crews will continue to go direct on the fire where accessible. Structure assessment has been completed along Chena Hot Springs Road and fire personnel are working with Borough Officials to finalize evacuation plan. Crews will remain spiked out to reduce transport time and maximize effort. A cooler weather pattern is allowing resources to take direct action on the fire line and increase our containment objectives to 100%. Fire resources will provide local IA response upon request.

4MN flew this fire today during their detection flight, and observed some isolated torching on a flat terrain, burning in a spruce/hardwood mix, resulting with the south and west perimeters concurrently burning in said fuels with low intensity. The east side is readily backing into fuels with a higher content of black spruce. There are pockets of heat around the whole perimeter. Active fire growth on the west side of the fire backing into the wind with isolated group torching. The remaining flanks of the fire are less active, primarily backing with flanking fire in continuous fuels. Successful placement of smokyjumpers near a remote cabin for structure protection; another group of smokyjumpers was unable to jump into their area due to poor visibility. Firefighters will assess needs for structure protection along the Yukon River from the village of ruby to the Nowitna River. An attempt to place smokyjumpers near a remote cabin for structure protection will be attempted if visibility allows.

Today's fire behavior was minimal with smoldering, and creeping in surface fuels and occasional torching in black spruce. Extensive areas along the fire perimeter and within the interior contain heat with limited active burning. Cloudy conditions, and dense smoke contributed to temperatures around 60° and relative humidity in the 70-75% range.

4MN flew a detection mission on this fire today and observed a 70% active perimeter, with smoldering, creeping, backing, and single torching characteristics. There appeared to be moderate activity around the south and east edges of the perimeter. Moderate fire growth on the west side of the fire backing into the wind with isolated group torching. Other sides of the fire are less active, primarily backing with flanking fire in continuous fuels. Structure protection along Poorman Road will continue.

 Name: **Beaver Creek** Cause: Lightning

The fire was flown by detection aircraft 1010F, who determined that fire 661 and 609 did not in fact merge into one fire. The fire was reported to be 500 acres and 5% active on the south end. The fire was smoldering and creeping in black spruce and had burned across a large stream. No resources threatened. The fire will continue to be monitored.

4MN flew recon over this fire today, and observed a 20% active perimeter, with creeping, running, and isolated torching. Fuels being consumed are a spruce/hardwood mix, with winds 5-10 mph out of the west. Most of the fire's activity is on the upper 1/3 of the ridgetops, where it is being exposed to the west winds.

## Monitor

These fires are currently in monitor status. Monitoring schedules are based on defined timeframes, but are dependent on available resources, and weather conditions. When monitoring occurs, information will be updated.

Daily Report From: 07/01

0.0 Acreage Change Since 06/29

**JS8U** Lat: **65:47:19.8** Status: **U/U** Acres: **52,000.0** Option: **LIMITED**  
 Lon: **157:37:37.2** Start Date: 6/19/15 Area: **GAD**  
 Legal: 005N 006E 33 K Out Date:  
 # 359 Owner: USFWS Unit: AKKUR-Koyukuk National Wildlife Refuge  
 Name: **Three Day** Cause: Lightning

4MN flew the fire today and noted, much of the fire looks to have gotten rain yesterday and is showing little activity. The fire perimeter is 10% active with isolated torching. There is a pocket of heat at the eastern tip and another at the northeastern corner of the sand dunes where it is moving through an old burn scar. The western flank continues to back through spruce and spruce/hardwood fuel. The fire remains in monitor status.

Prevention responded to a report of an out-of-control brush fire in Kenai. Prevention tied in with Kenai Fire Department who also responded. The fire occurred on a vacant lot and appeared to be human-caused. Fuel type was mature white spruce. Spot check on the duff layers determined it was dry down to 8 inches. Fire was suppressed and placed in monitor status.

Fire behavior has moderated due to elevated humidity and cooler temperatures. The fire will continue to use aerial and ground resources to protect the town of Nulato and Koyukuk as well as structures along the Yukon River. Firefighters will work to keep the fire west of the Koyukuk River and north of Yukon River.

Crews will remain at spike camps to reduce transport time and maximize effort. A cooler weather pattern is allowing resources to take direct action on the fire. Structure assessment has been completed along Chena Hot Springs Road and fire personnel are working with Borough Officials to finalize evacuation plan. Fire resources will provide local IA response upon request.

The fires showed low to moderated growth today under partly cloudy skies and moderate to high winds. Single tree, group torching, and backing downslope spread was observed as well as short to moderate crown runs. Strong and gusty winds increased all fires easterly push, both on the north and south flanks of all fires. The fires have backed for several days and west strong winds helped burn out fingers of unburned fuel. Isolated areas along the perimeter exhibited 6-8' lame lengths with black spruce single and group tree torching. Smoke was heavy in the morning in the Tanana area with a slight improvement midday. The smoke prevented recon flight until mid to late afternoon which were limited to the south perimeter of the Tonzitna fire. It is expected there will be moderate fire growth on all 8 fires within the protection area. The Jackson and Tozitna fires merged today.

Note: Staats` IMT managing 9 fires: The Blind River, Spicer, Tonzitna, Harper Bend, Hay Slough, Bering Creek, Moose Point, Jackson, and Kokrine fires. These are referred to as the Tanana Area Fires.

The infrared A/A was released. Acreage was increased due to the inclusion of GPS data from the spot fire in Div. T. Rain fall of 0.8 to 1.4 inches was recorded over the fire area mitigating fire behavior. Hoses and pumps were removed from spot fires. The need for keeping hoses and pumps in place for values at risk protection was evaluated for some Divisions. Backhaul of trash and no longer needed materials was a priority.

The fires showed low to moderated growth today under partly cloudy skies and moderate winds. Single tree, group torching and backing downslope spread was observed. The fires have backed for several days and west strong winds helped burn out fingers of unburned fuels. Smoke was heavy in the morning in the Tanana area with a slight improvement midday. The smoke prevented recon flights until mid to late afternoon which were limited to the south perimeter of the Tozitna fire. It is expected that fire growth will be moderate on all 8 fires within the protected area based on Modis data. Reports received from project managers involved in constructing that Tanan Road from Manley in the area of the Hay Slough fire indicated active fire behavior which caused construction work to be halted and workers to evacuate the area. A public meeting was attended by 30+ residents for the fire updates and the status of protection activities. A safety team from the Multi-Agency Coordinating Group arrived and has been briefed by the Incident Commander.

Note: Staats` IMT managing 9 fires: The Blind River, Spicer, Tonzitna, Harper Bend, Hay Slough, Bering Creek, Moose Point, Jackson, and Kokrine fires. These are referred to as the Tanana Area Fires.

Divisions A and M continue to mop up and patrol. Personnel reconned the fire in Helicopter 212TH and found a few smokes, mostly by Skilak Lake and the southern area by Kenai River. About 5% of the fire will be left in monitor status; this is the area along Kenai River and Skilak Lake, and much of it burned in the 2014 Funny River Fire.

 Name: **Sockeye** Cause: Human

Structure protection continued today in certain areas of the fire. Emphasis on the north end of the fire was placed upon patrolling and rehabilitation of lines. On the southern end of the fire mop up continued with the breaking up of berms and monitoring of hot spots. The removal of structure protection will continue as crews finish up the final stages of mop up.

4MN flew recon over this fire and observed a 5% active perimeter with smoldering, and creeping behavior. Fuels involved are black spruce and tundra. The fire has received precipitation, on the middle 1/3 of a rolling, flat terrain. Appears to be a dirty burn with a few areas of heat holding in the hardwoods. Some spots continue to creep along the perimeter.

 Name: **Stuyahok River** Cause: Lightning

4MN flew recon over this fire today and observed a 10% active perimeter with creeping, and isolated torching characteristics. Fuels being consumed were black spruce, tundra, and a hardwood mix. Observer reports an increase in acreage. Interior pockets of heat continue to smolder and creep. It appears the fire received precipitation which in turn has slowed the growth potential. Some areas on the perimeter are smoldering.

4MN flew recon over this fire today and observed a 50% active perimeter with smoldering characteristics on a flat, rolling terrain. Fuels being consumed are black spruce, tundra, and a hardwood mix. The fire is 9 miles to the NW, burning to the south of Camp Creek Airstrip. It is smoldering in isolated areas within the fire perimeter. There are pockets of heat in the thicker hardwood mix, and observer reports a low spread potential with cooler temps and recent precipitation. The fire is held in check with numerous oxbows and sloughs limiting the spread potential even more.

## Monitor

Count: 261

Acres: 1,921,673.7

Acreage Change: 553,312.4

These fires are currently in monitor status. Monitoring schedules are based on defined timeframes, but are dependent on available resources, and weather conditions. When monitoring occurs, information will be updated.

4MN flew recon over this fire today, and observed smoldering and creeping behavior on the fire. Fuels being consumed were black spruce, white spruce, tundra, tussock tundra, and a hardwood mix. Fire is burning on the lower 1/3, valley bottom and rolling terrain. The fire is hung up in rolling hills of hardwood mix and tundra. It's burning away from the Yukon River. Some pockets of unburned fuel remain between the fire edge and the Yukon River, and will potentially back down to the river if conditions turn favorable.

The fire exhibited more active fire behavior including group torching, active crownfire and an active groundfire. Active air operations with H-74H and H-4KA continue, including insertion of smokejumpers and helitack personnel for structure protection, cargo shipments to remotely place firefighters and trash backhaul as necessary. Smokejumpers and helitack personnel will continue to assess and construct structure protection needs on remote cabins. Firefighters travelling the Yukon River in boats are assessing structure protection for structures along the river.

Aggie Creek air attack's 1327 update: 80% of the line in Division Tango is holding. The fire did jump the retardent line in 2 spots and increased it's size to 400-500 acres, with a south wind on the fire moving Division Tango to the north with slop over and one spot by the pipeline, hitting it with helicopters where they can. Fire's perimeter will increase and nothing was threatened at the time of update. At 1552 4NC reported that there was isolated single tree torching in Division Victor, and torching in Alpha. The team is focusing on Division Victor and the needs in Division Alpha working to the west.

All fires are consuming large area of fuels today and significant acreage increase are expected once aerial observations are made or updated IR data is received. Moderate to strong East winds occurred under sunny skies. Single tree, group torching and backing downslope spread was observed as well as sustained crown runs. Flanking fire was exhibiting intermittent crown runs as well. The Spicer fire may merge with the Tozitna fire.

Due to observed fire behavior on the Hay Slough fire and predicted weather, a module boated into an area to do structure protection on a cabin inland east of the Tanana River. River operations were put on high alert as the threat to structures increased near the Moose Point, Kokerine, Blind River, Bering, Hay Slough, and Harper Bend fires. All crews were pulled back to protect structures along Site Road with the increase in fire behavior. The fire crossed both dozer lines. Long range spotting was observed.

The smoke was heavy in the Tanana area through the morning hours with slight improvement by midday. Large fire growth all around the Tanana area will likely cause visibility to reduce to .25 miles.

Note: Staats` IMT managing 9 fires: The Blind River, Spicer, Tonzitna, Harper Bend, Hay Slough, Bering Creek, Moose Point, Jackson, and Kokrine fires. These are referred to as the Tanana Area Fires.

 #668 Owner: USFWS Unit: AKINR-Innok National Wildlife Refuge  
 Name: **Wapoo** Cause: Lightning

4MN flew recon over this fire today and observed smoldering, creeping, and single torching characteristics, with winds predominantly out of the east. The fire is burning the green pockets out, and the perimeter appears to be picking up slowly with the strong east wind. Consumable fuels include black spruce, white spruce, tundra, grass, spruce/hardwood mix, and brush.

#619 Owner: USFWS Unit: AKINR-Innokko National Wildlife Refuge  
Name: **Little Mud River** Cause: Lightning

4MN flew recon over this fire today and observed 2% active perimeter, with smoldering, creeping, backing, and some isolated torching. Fuels being consumed are black spruce, white spruce, tundra, grass, and a spruce/hardwood mix. Observer states that the fire has spotted across the Little Mud River. Majority of the smokes are interior of the fires edge, and the green islands are smoldering.

4MN flew recon over this fire today and observed some smoldering and creeping characteristics, with black and white spruce, tundra, grass, and a spruce/hardwood mix of consumables existing. The fire has not advanced within the interior pockets, and a couple of spots on the perimeter are smoldering. The fire is staying west of the North Fork of the Unalakleet.

There is no projected incident activity except for potential new starts. Most of the critical fire perimeter has established containment lines and there are some interior smokes. As the warming and drying continues Monday, this may provide some critical fire weather. The incoming T3 team shadowed the current T2 team from 0700 on.

**PDJS7J** Legal: 006N 020W 21 F Out Date:  
 # 333 Owner: Tribal Unit: AKDYN-Doyon, Limited  
 Name: **Spicer Creek** Cause: Lightning

Fire behavior decreased due to cloud cover, heavy smokes, and very little wind. Single tree, group torching, and backing downslope spread was expected due to the very high Canadian Fuels Indices. It is possible the Spicer fire has merged with the Tozitna fire. They are unable to confirm due to the heavy smoke and no recent IR data. The Blink River and Bering Creek fires continue to grow and move down stream.

Crews in the Tanana area continued to enhance structure protection along the Site road and tested and improved the water handling systems. A structure protection water handling system was put in place and the pump left to run at the Gerland Cabin on the Yukon River. Blind River fire was approximately 1 mile away to the east. One structure on the Tanana Riever was plumbed and run late yesterday, No structure losses as of this operational period. Several Native allotments were burned over along both the Yukon and Tanana Rivers. We have not assessed these yet due to the heavy smoke. River operations were put on high alert as the threat to structures increased near the Moose Point, Kokrine, Blind River, Bering, Hay Slough, and Harper Bend fires. The Hay Slough fire crossed the Manley to Tanana Road near the construction project in the vicinity of milepost 34.

Note: Staats` IMT managing 9 fires: The Blind River, Spicer, Tonzitna, Harper Bend, Hay Slough, Bering Creek, Moose Point, Jackson, and Kokrine fires. These are referred to as the Tanana Area Fires.

An IR flight was conducted via helicopter. One hot spot was discovered along the winter trail and on the south side of the river. A second recon flight was scheduled later in the shift to document more on the hot spot. The second flight observed another interior smoke. The interior smoke presented potential to consume 200 acres if the conditions proved right. Currently the fire was smoldering and creeping.

All structures along the river in the direct line of the fire have been prepped. The fire was getting active on the west flank due to strong eastern winds and will most likely bump into the river tonight. The fire was also flown by detection aircraft 1010F. They reported the fire to be 50% active at the head going westward though the north side of the fire had cooled down with isolated active portions in the black. The fire will continue to be monitored.

The fire was reported by detection aircraft 909AK who reported that it was 80 acres, smoldering in tundra, and less than 10 percent active. Fuels were continuous between the fire and the town of Kwethluk, with less than a mile distance between them. Helicopter 70NW was launched from Aniak to provide bucket work, and helicopter 210MA was also launched from Aniak with a squad of helitack. The IC reported that the fire received a heavy amount of rain, and was very inactive in the evening. Tentative plans for tomorrow are to mobilize a crew into place to help suppress the fire.

Fire is burning adjacent to the town of Northway. Resources have been focused on the north end of the fire nearest to threatened residences. As temperatures rise and RH levels drop over the next several operational periods, burn intensity on the southern third of the fire may increase. Indirect and direct line to be cut in wetter areas while using natural fire breaks such as creeks and ponds. Point protection will be placed to protect threatened structures.

Fire is torching and backing. All all burn out operations along the line around Hughes were completed. Completed the burn around the cemetery on the north side of town. Mopped up the burn lines. Engaged in structure protection on the south side of Hughes. Mobilization of a crew from Allakaket, was not completed due to poor visibility.

Fire is being managed and monitored as part of the "Hughes Fires". The Blacktooth, Southern Rockies, and Flaming Gorge Wildfire Modules are all on scene.

Fire behavior increased with partly cloudy skies, single tree, group torching and backing downslope spread was expected due to the very high fire indices. Heavy smoke prevented resources from getting a good recon flight early in the day.

Tozitna fire spotted across Bear Creek north of the Tanana airport. Air attack and a scooper were used to slow the fire spread followed by bucket drops which held the fire in hardwoods. Fire in the area of the burn scar along Site Road spotted across the road. The fire will be monitored through the night as it approaches Management Action Point #1. The east end of Tozitna fire has pushed out to the southwest and spotted across Site Road 1/4 mile south of H-30. Crew burned out about 400 acres in the No Name Creek area. On the Hay Slough fire the fire in the Boulder Creek area moved to the northwest and within one mile of a structure. A repeater was installed to give the Boulder Creek Group communications with the Incident Command Post. The Bering Creek Fire moved close to the Repeater site today. The Helitack crew wrapped and lined Repeater #4. A crew from the Moose Point Group and helitack crew searched for a Fish and Wildlife cabin in the far interior from the confluence of the Yukon River and Bering Creek.

Note: Staats` IMT managing 9 fires: The Blind River, Spicer, Tonzitna, Harper Bend, Hay Slough, Bering Creek, Moose Point, Jackson, and Kokrine fires. These are referred to as the Tanana Area Fires.

All the fires within the complex were surveyed via helicopter using an IR probe. Growth was discovered in Div. D, fire 386. The fire continued to creep and smolder. The type 2 team demobilization was ongoing. The local area will assume command when the team leaves. An appropriate downsized management plan is in development.

The fire was discovered by modis dots. Recon aircraft 1010F flew the fire and discovered a 175 acre fire, 100% active in tundra and black spruce with continuous fuels. The fire was crowning, torching and running at the head and creeping at the flanks with eight foot flamelengths. There is one cabin located approximately seven miles to the southeast that is not immediately threatened. The fire will remain in monitor status.

4MN flew recon over the fire observed the fire has a couple of spots across Dulbi Slough. The whole fire received precipitation. Numerous areas along the perimeter continue to smolder especially in the area of spruce/hardwood mix. The south end of the fire has reached a 2004 burn scar that will likely limit future spread to the south. There is still substantial heat and potential for growth in the southwest corner. Utilized H-32AT in demobilizing 2 firefighters off Cabin 1. Dropped four smokejumpers on Huntington Cabin for structure protection. The fire is 2 miles to 2-1/2 miles NNE of the cabin, currently working on building a helispot.

Due to heavy smoke on 7/6/15 it was difficult to accurately track fire growth, aerial operations were halted and satellite infrared detection did not detect any heat signature after 1400 hours local time. If initial observations are correct, three large fires east of Poormans Road and west of the Nowitna River burned together creating one fire approximately 200,000 acres. Fire use aerial and ground resources to protect the villages of Nulato and Koyukuk as well as structures along the Yukon River. Keep the fire west of the Koyukuk River and north of the Yukon River. Firefighters continue to find heat and will mop-up around the town of Nulato.

Fire is burning adjacent to the town of Northway. Resources have been focused on the north end of the fire nearest to threatened residences. As temperatures rise and RH levels drop over the next several operational periods, burn intensity on the southern third of the fire may increase. Indirect and direct line to be cut in wetter areas while using natural fire breaks such as creeks and ponds. Point protection to be placed to protect threatened structures.

Fire behavior was moderated with isolated torching and backing observed. During the next shift resources will work to hold and improve lines on east ridge and around the town of Huges. Mop-up and burnout operations will continue, Fire growth is expected to slow down due to successful point protection efforts on the west side along Koyukuk River and the town of Hughes.

Fire is being managed and monitored as part of the "Hughes Fires". The Blacktooth, Southern Rockies, and Flaming Gorge Wildfire Modules are all on scene.

Strong winds from the SE to the SW between 0100-0400 greatly increased our fire perimeters this morning. Moderate to extreme fire behavior occurred. The remainder of the day fires were backing and flanking with short crown runs. Heavy smoke and cloudy weather prevented the team from flying to determine how many acres burned; acreage increases are expected to be significant based on the observations of River Branch personnel on the river corridor fires and the limited IR data we received. One boat was damaged and out of service during river operations today.

On the River Branch 18 allotments have been confirmed as burned over after last night's wind event however no structures along the Yukon and Tanana Rivers have been impacted by fire so far. The Hay Slough fire made a 3 mile run and burned around 3 mining operations but no structures were lost. The Boulder Creek Group observed major fire spread due to the strong wind as well.

In the Tanana area the Tozitna and Spicer fires have burned together and will be monitored from the ground to locate the perimeter east and west of the Site Road. The fire is approximately 1 mile north of Manangement Action Point #1 and .2 miles from the northern most structure on the Site Road. An indirect dozer line is being pushed in from the Site road going east towards Mission Creek Drainage.

Note: Staats` IMT managing 9 fires: The Blind River, Spicer, Tonzitna, Harper Bend, Hay Slough, Bering Creek, Moose Point, Jackson, and Kokrine fires. These are referred to as the Tanana Area Fires.

Abajo and HC3266 Wildfire Modules on scene.

Fire behavior was minimal with creeping and smoldering reported. 5-10% of the perimeter was active. The fire will continue to back eastward towards structures and the Elliott Highway. The fire was 1/5 miles west of the highway at last observation. During the next operational shift resources plan to implement the fire plan if favorable conditions develop or if fire poses an imminent threat to structures. They will expand the structure protection area. Also they will integrate new resources and in-brief and support incoming Type 2 IMT.

Fire behavior was minimal with backing, smoldering, and creeping reported. Resources will continue to work to hold and improve lines around the village of Hughes and the cemetery. Mop-up 200' in and along firelines. Structure protection will also continue. The fire will also be reconned to get a look at the fire activity on the east side.

Fire is being managed and monitored as part of the "Hughes Fires". The Blacktooth, Southern Rockies, and Flaming Gorge Wildfire Modules are all on scene.

Name: **Spicer Creek** Cause: Lightning

The west end of the Spicer Fire had active crown fire runs in the afternoon. Moderate to extreme fire behavior was seen on the southwest flank of Spicer Creek. The fire is pushing up against the Tozitna river. Fire continues to back and flank south towards Tanana Village. The active southern edge of the fire north of Tanana measures 49 miles in length. Hay Slough, Harper Bend, Blind River, and Bering showed moderate growth.

In the Tanana area the fire burned down to the northernmost cabin along the Site Road. Crews wet the structure and burned out around it. It was not damaged. One small spot was picked up south of the Bear Creek and secured with bucket work. Smoke cleared enough by early afternoon to get a critical GPS track on the south perimeter of the Spicer Creek. One allotment was burned over but no structures were involved. The fire has approached within 1/4 mile of Management Action Point #1. Air operations were active today with missions including recons, bucket work, and communications support for repeater sites. For the next operational shift the plan is to continue to improve the indirect dozer line being placed north of Mission ridge to increase chance of stopping fire spread towards the Mission Hill residences. Crews will continue prepping and testing the structure protection water handling systems in preparations for when the Spicer Creek fire moves close to the town of Tanana. Getting GPS tracks is a priority.

On the River Branch some support structures were secured on one allotment. Two allotments were burned over by the Blind River fire. The fuel reductions by crews working the Blind River fire prevented two structures from burning.

Note: Staats` IMT managing 9 fires: The Blind River, Spicer, Tonzitna, Harper Bend, Hay Slough, Bering Creek, Moose Point, Jackson, and Kokrine fires. These are referred to as the Tanana Area Fires.

Fire is burning in a remote area and all known points of protection in the vicinity have been prepared and or plumbed. Management points have been identified on the north and south ends of the fire to trigger management response to protect adjacent communities in the event of fire spread. There are currently no anticipated threats to life and safety.

Fire activity will be mostly low this evening. Fire spread potential is expected to be low tomorrow, with surface fire in the grassy marsh flats and creeping/smoldering within the black spruce and mixed hardwood.

48 hours: Low fire spread potential is expected over the fire area due to cooler temperatures and passing (wet) storms.

72 hours: Although drier conditions are expected Thursday and Friday, low fire spread potential is expected to remain.

Construct dozer line on ridge top heading southwest of H30. Utilize aviation resources to delay fire from approaching ridge with dozer line construction to protect subdivision to the South.

Construct handline from G/T Break to Tatalina River to protect Alyeska Trans-Alaska Pipeline and Elliott Highway infrastructures to the north.

Mop-up and hold containment lines to secure perimeter and protect the Alyeska Trans-Alaska Pipeline, Tatalina, Globe Creek and Elliott Highway corridor, and Wickersham area facilities.

Local Fish and Game resource flight personnel reported a smoke south of Gakona on the Copper River. Forestry and helicopter 9EV responded to the location and found a quarter acre fire burning in black spruce. Helicopter provided bucketwork and an engine crew mopped up. Suspected cause is lightning. While responding to the fire, Forestry personnel assisted with a rescue of two persons who had been lost in the area for several days.

Name: **Coco Creek** Cause: Lightning

Eight smokejumpers worked through the night to suppress this fire. Due to windy conditions, they experienced extreme fire behavior which resulted in a slop over Coco Creek. Aircraft were ordered to assist with the suppression activity. Resources were able to halt forward progression of the fire. Jumpers will continue to secure fire perimeter.

The fire was flown by detection aircraft 1010F who reported that the fire was mostly smoldering in the timber stringers along the drainages. Multiple smokes were observed on the Southern perimeter, along with multiple smokes in the interior. 2 areas of heat were observed on the Western perimeter and one area of heat was observed on the Eastern perimeter. The fire will remain in monitor status.

## Monitor

Count: 261

Acres: 3,116,162.8

Acreage Change: 120,298.9

These fires are currently in monitor status. Monitoring schedules are based on defined timeframes, but are dependent on available resources, and weather conditions. When monitoring occurs, information will be updated.

Containment objectives for the Tetlin Hills have been met as of end of shift 7/25/15. Observed fire behavior continues to be minimal, with smoldering and isolated single-tree torching in the interior. Upper Tanana crew continues to grid for hotspots and pull hose lays. Challenges on the incident include fire-weakened timber along containment lines and erratic winds due to increasing thunder cell activate in the area. Planned demobilization date for the line personnel is 7/28/15, barring significant changes in the fire behavior. Suppression repair work is in the planning stage.

At approximately 1845 on 7/26 KKS personnel returning home after work came across an excessive amount of smoke near Mile 14 of the Kenai Spur Highway. Investigation revealed a contractor with approximately 30' diameter, 12' high pile of slash burning in extremely heavy winds. The contractor obtained general permit from local fire department, but not from Division of Forestry. The burn pile was outside of the parameters of the burn permit. Kenai Fire Department was requested to respond and assist in extinguishing the fire. Prevention followed up on 7/26.

The Black Hills Wildland Fire Module is working in the Nowitna River drainage to set up sprinkler system and complete structure protection on remote cabins on the east side of the fire. A few more operational shifts are anticipated to complete this work. Plans are for protection of structures and allotments along the Yukon and Nowitna Rivers. This fire is managed as one of the "Ruby Area Fires".

 Name: **Kobe** Cause: Lightning

Two crews spiked out on Kobe. Crews that were spiked out to facilitate continuous and cohesive gridding of the west side of the Kobe incident will be flown out today. The other two crews were brought in by bus to grid and mop up heat in the Kobe subdivision to help support the engines. Transition from type 3 to type 4 will occur tomorrow.

Multiple hot spots were detected along the west edge of Bear Creek. Crews made progress with sawlines and hose lays and mopping up many locations with significant heat. Plan is for crews to secure the direct line between Site Road and Bear Creek were firefighters addressed these hot spots and mopped up. Patrol will continue along the Site road and rehab needs will continue along the dozer lines. Boat patrols on the rivers continued monitoring fire activity on river banks and doing backhaul of equipment for possible use in other areas. All resources assigned to this incident are suppressing the fires referred to as the "Tanana Area Fires".

The Black Hills Wildland Fire Module is working in the Nowitna River drainage to set up sprinkler system and complete structure protection on remote cabins on the east side of the fire. A few more operational shifts are anticipated to complete this work. Plans are for protection of structures and allotments along the Yukon and Nowitna Rivers. This fire is managed as one of the "Ruby Area Fires".

Moderate fire behavior was observed with short crown runs and group torching. Weather conditions could moderate the fire behavior. Mopup of the direct handline on the north side of the fire continued. Plan to continue with point protection on structures and allotments along the Poorman Road. The Black Hills Wildland Fire Module is assigned to the incident. All resources on the "Ruby Area Fires" are assigned to this incident and fire #533.

The observed fire behavior shows minimal activity with some creeping and smoldering in timber. No fire growth is expected and only the interior pockets are expected to continue to burn until significant precipitation arrives. Recent precipitation has minimized fire threat to values at risk in the fire area. The plan is for point protection and to monitor areas of concern. Personnel on incident are also managing the Hay Slough Fire #446.

The fires were less active than the previous day with moderate fire activity within the interior perimeters. Light showers were received across the area. Multiple hot spots were detected with the infrared camera along the west edge of Bear Creek. Crews mopped up the hot spots. Plan is for crews to secure the direct line between Site Road and Bear Creek where firefighters addressed these hot spots and mopped up. Patrol will continue along the Site road and rehab needs will continue along the dozer lines. Boat patrols on the rivers continued monitoring fire activity on river banks and doing backhaul of equipment. The jumpers and hotshots on the north end of Spicer Creek Fire on the Tozitna River will complete the structure protection operation. All resources assigned to this incident are suppressing the fires referred to as the "Tanana Area Fires".

	Name: <b>Everwell Place</b>			

Prevention responded to a report of a large column of smoke in the area of Everwell Place. Upon arrival, personnel found an extremely large illegal debris burn pile. The pile consisted of wood, plastic, and urethane materials. Central Emergency Services also responded. Fire was contained, controlled, and turned back over to the landowner.

The observed fire behavior shows minimal activity with some creeping and smoldering in timber. No fire growth is expected and only the interior pockets are expected to continue to burn until significant precipitation arrives. Recent precipitation has minimized fire threat to values at risk in the fire area. The plan is for point protection and to monitor areas of concern. Personnel on incident are also managing the Hay Slough Fire #446.

The fires were less active than the previous day with moderate fire activity within the interior perimeters. High humidity and cool temperatures continue to moderate fire behavior. Multiple hot spots were detected with the infrared camera along the west edge of Bear Creek. Difficult access to fire's edge continues to slow mop-up. The crews secured the containment line between Site Road and Bear Creek where firefighters are pulling hose lines and water pumps. Patrol will continue along the Site road and repair work on the dozer lines has temporarily stopped due to equipment issues. Boat patrols on the rivers continued doing backhaul of equipment. The jumpers and hotshots on the north end of Spicer Creek Fire on the Tozitna River completed the structure protection operation. All resources assigned to this incident are suppressing the fires referred to as the "Tanana Area Fires".

Moderate fire behavior was observed on the NE and E flanks with localized areas of extreme fire behavior. The Trail Creek /Tip Creek fire made a 7,000 acre run to merge into the Big Creek fire. There is a moderate threat to structures. Planned activities are for protection of structures and allotments in the community of Ruby and along the Ruby/Poormans Road to the headwaters of the Nowinta River. Protection continues north along the Nowinta River to the Yukon, and west along the Yukon River to the village of Ruby. All resources on the "Ruby Area Fires" are assigned to this incident and fire #479.

Moderate fire behavior was observed on 7/30. Fire activity is anticipated to be minimal with creeping and smoldering, with good overnight humidity recoveries. Planned activities are for protection of structures and allotments in the community of Ruby and along the Ruby/Poormans Road to the headwaters of the Nowinta River. Protection continues north along the Nowinta River to the Yukon, and west along the Yukon River to the village of Ruby. The Bruno Creek Fire exhibits minimal threat potential. All resources on the "Ruby Area Fires" are assigned to this incident and fire #533.

 #456 Owner: State Unit: AKAKS-Alaska DNR Other  
 Name: **Baker** Cause: Lightning

The observed fire behavior shows minimal activity with some creeping and smoldering in timber. No fire growth is expected and only the interior pockets are expected to continue to burn until significant precipitation arrives. Recent precipitation has minimized fire threat to values at risk in the fire area. The plan is for point protection and to monitor areas of concern. Personnel on incident are also managing the Hay Slough Fire #446.

Two hot shot crews were inserted to mop up hot spots that spread the length of one and a half miles on the Bear Creek edge from the mouth of the creek. Crews on the Bear Creek to Site Road containment line dismantled the north spike camp and pulled hose lays. Rehabilitation is on-hold due to equipment issues and wet soil. Crews on the Site Road and Mission areas felled hazardous trees along Site Road and also continued to pull hose lays. The River group continued to check equipment set up for structure protection along the Yukon and Tanana Rivers and to back haul unneeded equipment. The Bible Camp was dismantled. A recon flight was scheduled for 7/30. All resources assigned to this incident are suppressing the fires referred to as the "Tanana Area Fires".

The fire was flown by 9VS today. The fire exhibits active behavior with single tree torching, backing and flanking. Fire remains active due to dryer conditions. Throughout the day smokejumpers continued to evaluate the area for point protection opportunities. Smoke did hinder visibility and hampered some efforts to assess threats. Perimeter mapping and aerial observation will continue for the next operational periods.

Observed fire behavior is moderate with creeping and smoldering with the fire activity increasing in the NE portion. Fire continued to spread to the north along the Koyukuk at Long Bend moving towards Fish Creek, and on the SE portion along Indian Creek. Plans are to provide point protection for Hughes and adjacent values at risk along the Koyukuk River corridor and monitor fire spread and activity on the Isahultila #471 fire. Allotment protection north of Hughes has increased the need for river travel and personnel. This fire is part of the "Hughes Fires" and will be managed and monitored along with fire #471.
