RE: No Further Remedial Action for Former Leaking Underground Storage Tank Site at Craig Taylor Equipment Company, 1733 Well Street, Fairbanks Alaska.

Dear Mr. Gadbury,

The Alaska Department of Environmental Conservation (ADEC) has reviewed a groundwater monitoring report (dated November 12, 1998) and a request for no further action dated November 11, 1998 prepared by Shannon & Wilson, Inc. Based on the information in these letters, ADEC finds that the above referenced site does not pose a significant threat to human health or the environment. As such, no further monitoring or corrective action is required at this site.

ADEC reserves the right to request further site assessment and remediation of contaminated areas should new information become available that suggests that contamination at this site may pose significant risks to human health or the environment.

Please do not hesitate to contact me with any questions or concerns. I can be reached directly at (907) 451-2183 or via e-mail at cadler@envircon.state.ak.us.

Sincerely,

Clint Adler
Environmental Engineer Associate
