RE: Notice of No Further Action
Site Name : Paxson Lodge
Site Location : Mile 185 Richardson Highway
Facility ID No. 1938, Event ID No. 0033

Dear Mr. Brown:

The Alaska Department of Environmental Conservation (ADEC) Fairbanks Office has recently completed a review of the file and recent report associated with the sampling effort at the Paxson Lodge. Based on our review of the project file, and the information and analytical results provided by your consultant, the ADEC finds that the referenced site and stockpiled soil pertaining to the former location of one 5,000-gallon diesel, two 5,000-gallon gasoline, and one 2,000-gallon gasoline underground storage tanks, do not pose a significant threat to human health or safety, or the environment. The Department has, therefore, determined that no further remedial action or sampling is required for these underground storage tank locations and the resultant stockpile that was managed on an adjacent property.

The ADEC reserves the right to require additional site assessment, monitoring, remediation, and/or other necessary actions at the Paxson Lodge, located at 185 Mile Richardson Highway, should new information become available that suggests that contamination at this site may pose threat to human health or safety, or the environment. Please contact me with any questions or concerns directly at (907) 451-2166 or e-mail me at John_Carnahan@envircon.state.ak.us.

Sincerely,

John Carnahan
Environmental Specialist
ADEC Site Project Manager
