Mr. Kevin Prange
North Slope Borough
3000 C Street, Suite 104
Anchorage, AK. 99503

Re: NSB Point Lay DMS Drum Storage Area

Dear Mr. Prange;

ADEC records show that new structures were built at the contaminated site known as the NSB Point Lay DMS Drum Storage Area before the nature and extent of contamination had been adequately characterized. Notes from a 2012 meeting between the NSB and ADEC Contaminated Sites Program (CSP) indicate that follow-up observation of the site was planned for summer 2013. ADEC CSP requests that NSB perform additional effort at this site including confirming whether contamination may be migrating from the site to the adjacent areas. We also request that the NSB provide a Conceptual Site Model for this site to assist in evaluating potential risks to human health and the environment.

Please notify ADEC CSP as to the borough's intentions in this matter. If you have any questions, I can be reached at (907) 269-7546.

Sincerely,

Keather McLoone
