

Fairbanks North Star Borough Air Quality: 2020/2021 Overview

Presentation to: FAST Planning Technical Committee

> Cindy Heil, Program Manager April 7, 2021

> > 1

Overview

- Implementation of the Air Quality State Implementation Plan (SIP)
- Status of 5% Plan/Serious Plan Amendment
- Reasonable Further Progress Report
- Air Quality this past winter
- DEC/FNSB 1st Annual AQ Report

Implementation of the SIP

- Serious SIP introduced requirements; most went into effect on January 8, 2020.
- DEC and FNSB Air Quality have been working to implement all the control measures.
- The Serious SIP's contingency measure was triggered on October 2, 2020 because the area failed to attain the standard by 12/31/2019.
- EPA recently proposed to accept portions of the Serious SIP, comment has period closed.

Status of 5% Plan/Serious SIP Amendment

- DEC met the statutory deadline submitted amendment to EPA prior to December 31, 2020 deadline.
- EPA is reviewing the SIP Amendment

Reasonable Further Progress (RFP) & Quantitative Milestone (QM) Report

RFP and QM Analysis Years

2017, 2020, 2023, 2026

- The RFP & QM Report is a technical document required every three years by the Clean Air Act
- Report must show progress and meet milestone goals
- Report is based on actual emissions from sources compared to estimated reductions from the SIP emission inventory
- Does not reflect monitored values at the air monitoring sites
- DEC submitted report to EPA prior to the March 31, 2021 deadline
- 2020 report does document that the area has met its RFP and QM requirements
- DEC will be posting the 2017 and 2020 RFP reports on its website soon

DEC/FNSB 1st Annual AQ Report

- Pleased to announce that DEC/FNSB will soon post the 1st Annual Air Quality Implementation Report at the same time as the RFP.
- Some data is presented by calendar year, and other data presented by winter season – November through March 31.
- Focuses on the air quality improvement efforts that have been going on in the area. This includes number of alerts called, letters sent, waivers issued, etc.
- Report also includes other air quality improvement projects underway or up-coming, including FAST Planning Projects and TAG.
- Intent is to publish this annual report by April 15 every year.
- The link to the web page where the report may be found
 is: https://dec.alaska.gov/air/anpms/communities/fbks-particulate-matter/

Air Quality this past winter

• Preliminary Data – 2020 monitoring data is formally certified and submitted to EPA on May 1st.

YEAR	201	201	2014	201	201	201	2018	2019	2020
