

MG3 and MG9 Fees
Department of Environmental Conservation Air
Quality Control Regulations
18 AAC 50
As Amended through September 7, 2022

The owner or operator of an MG3 or MG9 permit shall pay fees as follows:

1. Permit Administration Fee under 18 AAC 50.400(c)(1). Fee is due with submission of application.

(c)(1) If the department prepares a new or revised general operating permit or a new or revised general minor permit, the department will determine the cost of that permit by multiplying the number of hours the department spent to develop the permit by the hourly rate of salary and benefits of the department employees who developed the permit, and by adding to the resulting amount any other direct costs. This cost will be divided by the number of permittees who receive or are expected to receive the permit to determine the permit administration fee.

As of September 7, 2022, the Permit Administration Fee for an MG3 permit is \$2,792.

As of September 7, 2022, the Permit Administration Fee for an MG9 permit is \$2,792.

2. Annual compliance review fee under 18 AAC 50.400(d).

The Department will bill the annual compliance review fee in accordance with 18 AAC 50.420.

(d) The permittee, owner, or operator of a stationary source shall pay fees for a stationary source that is not classified as needing a Title V permit as follows:

(2)(A)(ii) for construction, operation, or relocation of an asphalt plant described in 18 AAC 50.502(b)(1), permit type MG3, the annual compliance fee is \$1,386; and

(2)(B)(ii) for construction, operation, or relocation of a rock crusher described in 18 AAC 50.502(b)(3), permit type MG9, the annual compliance fee is \$737.

3. Emission fees as billed and specified under 18 AAC 50.410(a) - (b).

The Department will bill the emission fees in accordance with 18 AAC 50.420.

18 AAC 50.410. Emission fees. (a) *For each period from July 1 through the following June 30, the permittee, owner, or operator shall pay to the department an annual emission fee based on the stationary source's assessable emissions for that year for each stationary source that is subject to a permit under this chapter. The emission fee is assessed per ton for total tonnage projected, as reported on a per pollutant basis. All total projected tonnage will be billed emission fees.*

(b) *Except as provided in (c) and (g) of this section, emission fees will be assessed as follows:*

(1) *for a stationary source required to obtain an operating permit under AS 46.14.130(b), an emission fee rate of \$84.29 per ton, that will be allocated to the clean air protection fund under AS 46.14.260;*

(2) *for stationary sources not subject to (1) of this subsection but otherwise required to obtain a permit under AS 46.14.130, the emission fee rate of \$17.70 per ton; the amount will be allocated to the emissions control permit receipts account under AS 46.14.265.*
