Re: Site Closure Report, White Alice Communications Site OT001, Beaver Creek Radio Relay Station, Alaska

Dear Mr. Johnston:

The Alaska Department of Environmental Conservation (ADEC) Contaminated Sites Program received a copy of the above referenced document on September 9, 2015. The comments that the ADEC submitted on the draft version of the report have been adequately addressed. The ADEC concurs with the information and conclusions presented in the report, and the site will receive a "Cleanup Complete" designation on the Contaminated Sites Database, subject to the following standard conditions.

Standard Conditions

1. Any proposal to transport soil or groundwater off-site requires ADEC approval in accordance with 18 AAC 75.325. A "site" [as defined by 18 AAC 75.990 (115)] means an area that is contaminated, including areas contaminated by the migration of hazardous substances from a source area, regardless of property ownership.
2. Movement or use of contaminated material in a manner that results in a violation of 18 AAC 70 water quality standards is prohibited.

This determination is in accordance with 18 AAC 75.380 and does not preclude ADEC from requiring additional assessment and/or cleanup action if future information indicates that this site may pose an unacceptable risk to human health or the environment.

If you have any questions regarding this letter, please contact me at (907) 269-3077 or jessica.morris@alaska.gov.

Sincerely,

A handwritten signature in blue ink, appearing to read "Jessica Morris".
