Re: Reminder of Notice of Environmental Contamination

This letter is to remind you that contamination in soil and/or groundwater remains at the site known as Chignik Lake Tribal Council Old Tank Farm, Hazard ID 3786, located off Third Street between streets F and G. Records available to the Alaska Department of Environmental Contamination (ADEC) indicate that you are the current owner of the above-mentioned property.

The attached Notice of Environmental Contamination was filed with the Alaska Department of Natural Resources Records Office in 2015 and it will remain on your property deed until it is demonstrated to ADEC that contaminant concentrations in soil and/or groundwater are below the approved ADEC cleanup levels found in Title 18 of the Alaska Administrative Code, Chapter 75 (18 AAC 75). In addition, you are required to notify the ADEC if there are any changes in land use or ownership.

Alaska Statutes Title 34 outlines your responsibilities with regard to property transfers, which may include environmental disclosures and penalties for non-performance.

This site information is a matter of public record and is available from ADEC's online database at:
<http://dec.alaska.gov/Applications/SPAR/PublicMVC/CSP/Search>

If you have any questions regarding this site, please contact me at (907) 269-3083 or nathan.maxwell@alaska.gov and I will be glad to assist you.

Sincerely,

A handwritten signature in black ink that reads "Nathan Maxwell".

NOTICE OF ENVIRONMENTAL CONTAMINATION

As required by the Alaska Department of Environmental Conservation, Grantor, pursuant to 18 AAC 75.375 the Village of Chignik Lake and the Chignik Lake Traditional Council, Grantees, as the owner and operators of the subject property, hereby provides public notice that the property located at

Lot 11, Block 10, as shown on the official plat of U.S. Survey 4897, Alaska, Chignik Lake
Townsite

has been subject to a discharge or release of oil or other hazardous substances, regulated under 18 AAC 75, Article 3, revised as of April 8, 2012. This release is documented in the Alaska Department of Environmental Conservation (ADEC) contaminated sites database at http://www.dec.state.ak.us/spar/csp/db_search.htm under Hazard ID number 3786.

On August 23, 2001, several soil samples were collected from the surface soils at this site and contained elevated concentrations of diesel range organics (DRO). Petroleum contamination remains in the surface soil above the default migration to groundwater (MTG) cleanup levels established in 18 AAC 75.341, Method Two, Tables B1 and B2, Over 40 Inch Zone. To date, the site has not been characterized and/or cleaned-up to the satisfaction of ADEC. Therefore, institutional controls are required at this site to control exposure risks to contamination. These institutional controls consist of the following:

1. Any future change in land use may impact the exposure assumptions cited in this document. If land use and/or ownership changes, current institutional controls may not be protective and ADEC may require additional remediation and/or institutional controls. Therefore, the Owner(s) will report to ADEC to document land use as soon as the Owner(s) becomes aware of any change in land ownership and/or use.
2. Installation of groundwater wells at this site will require approval from ADEC
3. Any proposal to transport soil or groundwater off-site requires ADEC approval in accordance with 18 AAC 75.325. A "site" [as defined by 18 AAC 75.990 (115)] means an area that is contaminated, including areas contaminated by the migration of hazardous substances from a source area, regardless of property ownership. Attached is a site figure that shows locations of existing structures, and the approximate location of the property that is contaminated.
4. Movement or use of potentially contaminated soil in a manner that results in a violation of 18 AAC 70 water quality standards is prohibited.

Pursuant to 18 AAC 75.325(i)(1) and (2), DEC approval is required prior to moving soil or groundwater that is, or has been, subject to the cleanup rules found at 18 AAC 75.325-.370. At this site, in the future, if soil is removed from the site or groundwater is brought to the surface it must be characterized and managed following regulations applicable at that time. In the event of a land transfer, you must notify prospective purchasers of the contamination. The site will remain

active on the Contaminated Sites Database until contamination is addressed to the satisfaction of ADEC.

This NEC remains in effect until a written determination from ADEC is recorded that states that soil and groundwater at the site has been shown to meet the most stringent soil cleanup levels in method two of 18 AAC 75.340 and groundwater meets the cleanup levels in Table C in 18 AAC 75.345 and that off-site transportation of soil and groundwater is not a concern.

For more information on the subject site listed as *Chignik Lake Tribal Council Old TF* (File No. 2533.38.005), please see the ADEC Contaminated Sites Database viewable by the public at this link (http://dec.alaska.gov/spar/csp/db_search.htm).
