Mr. Tom Harris
Alaska Village Initiatives
1577 C Street, Suite 304
Anchorage, Alaska 99501

RE: Ft. Yukon Alaska Commercial Company (ACC) Marina, Reckey 94310132602
Approval of Final Cleanup Report/Site Closeout

Dear Mr. Harris:

The Alaska Department of Environmental Conservation (DEC) has completed review of the *Ft. Yukon AK Closure Report 1998 Field Season*, dated March 23, 1999, submitted by Alaska Village Environmental Services, and the supplemental confirmation sample results which were collected on July 9, 1999, prepared by Alaska Village Environmental Services, dated September 15, 1999, and received by the department on October 27, 1999. The final report and supplemental samples have adequately met the requirements specified in 18 Alaska Administrative Code (AAC) 75.380, and is therefore approved.

As demonstrated in the final report, Alaska Village Initiatives has treated the petroleum hydrocarbon contaminated soil by in-situ enhanced bioremediation. The appropriate soil cleanup levels for this site were determined to be 18 AAC 75.340, method one, level B. Soil cleanup levels for all contaminants of concern have been met. Groundwater is not present due to permafrost and therefore was not impacted by petroleum hydrocarbons. Therefore, there is no need to monitor groundwater or impose institutional controls at the site.

DEC has determined that the cleanup is complete. This determination is subject to a future department determination that the cleanup is not protective of human health, safety, or welfare, or of the environment. If, in the future, additional contamination is found to be present that was not addressed in this action, cleanup will be required.

If you have any questions about this site, please do not hesitate to contact me at 269-7664, or Anne Marie Palmieri, of my staff, at 766-3184.

Sincerely,

Ron Klein
Section Manager
