Re: Robair Bethel Airport UST removal and resultant contaminated soils

Mr. Christopher Hawe,

Because the department is unable to locate the file relative to this loss a response, as requested by Gilfilian Engineering, cannot adequately be addressed. The department will consider that this letter represents a "no further action" determination for the Robair location and the appropriate notification will be made in the contaminated sites data base.

The department reserves all it's rights to reopen this file should additional contamination be located that is representative of this loss.

Sincerely,

Ray Dronenburg
Site Project Manager
