Re: 2018 Groundwater Sampling Report
Wildwood Former Air Force Station Tank Farm FUDS – F10AK025105

Dear Ms. Flint:

The Alaska Department of Environmental Conservation (ADEC) has reviewed the *2018 Groundwater Sampling Report*, dated September 2018, for the Wildwood Former Air Force Station Tank Farm Formerly Used Defense Site – F10AK025105. The described field effort was completed in August 2018, and consisted of collecting water samples from 8 of 9 planned monitoring wells (MW-3, MW-4, MW-6, MW-11, MW-23, MW-24, MW-30, and AP-397). Well MW-16 was not sampled because of a thin layer of free product (0.03 feet). The samples collected from Wells MW-3, MW-4, MW-6, and MW-11 exhibited concentrations of diesel range organics (DRO) above the Table C groundwater cleanup level of 1.5 mg/l. This report is approved.

ADEC agrees with the recommendation for continued groundwater monitoring. If you have any questions or need any further assistance, you can contact me at 907-269-7691 or via email at joshua.barsis@alaska.gov.

Sincerely,

A handwritten signature in blue ink, appearing to read "Joshua Barsis".
