

This portion of the list reflects some of the general information about the system on the SNC List.

Office	Staff	RMW Service Area	Estimated New SNC Score	System Information
Southcentral/ANC	DRAKE, HANNAH	YKHC	406	A WATER SYSTEM / AK22XXXXX (C / Population 158)
Southcentral/ANC	DRAKE, HANNAH	YKHC	140	A WA
Southcentral/ANC	EDMUNDS, DAVID	No RMW	106	A WATER SYSTEM / AK22XXXXX (NC / Population 27)
Northern	WILLIAMS, ELLEN	DEC	102	A
			101	A WATER SYSTEM / AK22XXXXX (C / Population 215)

**Drinking Water Program Office and Staff:**  
 These columns list the Drinking Water Program office and staff person your system is assigned to. If you have questions please contact the staff member listed here. A current contact list is available at the bottom of the SNC List.

**System Information-** System Name, Public Water System Number (PWSID), Federal Type, and Population Served

**Estimated New SNC Score-**  
 After reviewing what violations the PWS has RTCd, this number reflects the score of the remaining violations.

**RMW Service Area-** Name of organization providing RMW services to water system

This portion of the list is considered the “meat and potatoes” of the SNC List. The colored columns identify the rule (or rules) the system has violated, the number of violations each system has received, and the point value the violation is worth. Violations are in one of three point groups; 10 points for the acute health based violations, 5 points for non-acute health based violations, and 1 point for monitoring and reporting violations.

**Point Group of Violation**

10 Point			5 Point							1 Point									
TCR	SW	Nitrates	TCR	SW	Nitrates	Arsenic	Stage 1	LCR	IOC	TCR	SW	Arsenic	Stage 1	LCR	IOC	VOC	SOC	CCR	PN
37										3	25		4						
26					1		5				67	1	13			1			
25				1			13				7		9						
25					1						19		8						
23								2											
13					1		9			1	17		8	2					
11										3	64								
										45	55		4						

Indicates the Number of Violations the system has received in that point group . **IT IS NOT THE SCORE.**

*In this example the system has 37 “10-point” violations for SW, 13 “5-point” violations for Nitrate, and 26 “1-point” violations for SW*

Rule system was issued violation for

This portion of the list is considered one of the most important of the SNC List because it provides the information to be able to understand the numbers reflected in the previous section of the list. The comments are generated by Drinking Water Program staff each quarter.

GENERAL STATUS COMMENTS – This column defines a system’s major compliance problems causing the SNC status. The estimated new score is also listed here.

KNOWN HARDWARE PROBLEMS COMMENTS– This column notes hardware problems the Drinking Water Program has been made aware of contributing to SNC status.

General Status Comments	How to Return to Compliance	Known Hardware Problems Comments
System inconsistent with submitting monthly operator reports that meet SW requirements on turbidity and chlorine residual monitoring. Estimated new score = 29	Submit monthly OP report w/ consistently adequate turbidity and chlorine data. Maintain EPRD monitoring & reporting of below .20 mg/L and required daily number of samples. Collect Nitrate in 2010.	No known hardware problems.

HOW TO RETURN TO COMPLIANCE– This column explains what steps need to be taken for the system to Return to Compliance (RTC). Under the New RTC criteria most violations will be RTCd after one successful sampling period.
