

**ALASKA DEPARTMENT OF ENVIRONMENTAL CONSERVATION**  
**Division of Spill Prevention and Response**  
**Prevention and Emergency Response Program**

**SITUATION REPORT**

**INCIDENT NAME:** Deadhorse Used Oil Spill

**SITREP #:** 2

**SPILL NUMBER:** 08399914401

**LEDGER CODE:** Requested

**TIME/DATE OF SPILL:** Management staff at the Caribou Inn discovered the spill on May 23, 2008 at 1:00 PM and the spill was reported to ADEC by CCI on May 23, 2008 at 3:09 PM.

**TIME/DATE OF SITUATION REPORT:** 3:30 PM on May 28, 2008

**TIME/DATE OF THE NEXT REPORT:** As the situation warrants.

**TYPE/AMOUNT OF PRODUCT SPILLED:** Unknown type and unknown amount. The initial report from CCI estimated 20 gallons of what appears to be used oil on water; and potentially 200 gallons released. The spill area is tundra wetland, covered with snow removed from a gravel pad.

**LOCATION:** Behind the Caribou Inn in Deadhorse.

**CAUSE OF SPILL:** A 2,500-gallon aboveground storage tank was moved by Deadhorse lease holders during the past winter season and temporarily staged near the Caribou Inn. The tank was staged upright, but during the breakup the tank rolled off and sheared the vent, releasing its contents to the wetlands. Detailed investigation into the cause is ongoing.

**POTENTIAL RESPONSIBLE PARTY (PRP):** Unknown at this time, ADEC is investigating the ownership of the tank.

**RESPONSE ACTION:** CCI, a North Slope spill response contractor, continues bird hazing tactics, monitoring absorbent boom and pads in the wetlands; and have recovered 85 barrels of oily water, and 50 cubic yards of oiled gravel and snow, using six oil spill responders and two equipment operators. Approximately 15 cubic yards of oiled snow and gravel is remaining in the wetlands. Oiled snow and gravel is temporarily stored in a containment cell constructed adjacent to the release on the gravel pad. The source was controlled when the tank was righted from the careening position. A partial analytical profile of the used oil determined there were no halogenated compounds that would limit disposal option concerns; however, further testing is required to determine possible disposal options.

ADEC has a representative on site monitoring the cleanup, bird hazing, and investigating tank ownership.

The remaining analytical tests required to determine oil profile is expected to be completed early next week.

**SOURCE CONTROL:** The source was controlled when the tank was moved and stabilized.

**RESOURCES AFFECTED:** ADEC estimated that approximately 20,000 square feet area of wetland tundra vegetation was affected by the spill.

**FUTURE PLANS AND RECOMMENDATIONS:** ADEC is investigating the tank ownership and other leads to assess the responsible party. A vacuum truck is scheduled to remove the remaining oiled snow and gravel from the wetlands.

**WEATHER:** Mostly cloudy. Areas of fog in the morning, possible snow flurries, with high temperatures around 40°F. Light winds.

**UNIFIED COMMAND AND PERSONNEL:**

Incident Commander: John Lervig, CCI  
 F.O.S.C.: Carl Lautenberger, EPA  
 S.O.S.C.: Ed Meggert, ADEC  
 Field S.O.S.C. Wesley Ghormley, ADEC

**FOR ADDITIONAL INFORMATION CONTACT:** Ed Meggert, ADEC, 451-2124

Photographs and other spill information are available for viewing at: <http://www.state.ak.us/dec/spar/perp/index.htm>

**AGENCY/STAKEHOLDER NOTIFICATION LIST**

This SITREP has been distributed via email to the Governor's office, Senator Stevens' office, ADF&G, ADNR, SECC, USEPA, USDOJ, NMFS, USFWS, USFS and NOAA in addition to the following.

STATE AGENCY	NAME	SENT VIA	ADDITIONAL INFO	TELEPHONE	FAX
