*The transfer of the permit from Dry Bay Fisheries Dry Bay Plant to Mystic Salmon LLC Dry Bay Plant is granted.*

*Mystic Salmon LLC has continued coverage under the AKG520495 administrative extension to discharge seafood waste, as specified in the May 25, 2012 NOI.*

*Mystic Salmon LLC identified discharge of seafood waste is occurring at the following site (as requested in the May 25, 2012 Notice of Intent):*

Mark No.	Seafood processing waste discharge location name (Receiving Water Name or Operational Area Designation)	Latitude	Longitude

*The seafood processing waste discharged shall meet all the requirements as set out in the AKG520000 general permit including Part V.C.. Shore based Seafood Processors.*

The permit includes an **effluent treatment requirement** of grinding solid seafood processing wastes to one-half inch in all dimensions before discharge, an **effluent limit** to not discharge a volume or weight of seafood processing waste residues on a daily or annual basis which exceeds the amount reported in the permittee's NOI (Permit Part V.C.1.a), a **prohibition on the discharge** of

petroleum, hydrocarbons, oil and grease, and a narrative limit on the violation of Alaska Water Quality Standards (see Permit Part II). The permit requires that you develop and implement a **best management practices plan** that controls and reduces pollutant discharges at your site (see Permit Part VI.A). The permit requires that you submit an **annual report** on seafood processing activity, discharges, noncompliance, and process changes (see Permit Part VI.B). The permit requires that you conduct periodic monitoring of the sea surface, seashore, and seafloor in accordance with your type of facility (see Permit Part VI.C and D). We ask for your careful review of the various areas throughout the State of Alaska which are excluded from coverage by this APDES permit due to their characteristics as either special or impaired habitat.
