Number 3008 making a stop at the racks.

In 1986 number 3008 was involved in a [derailment](#) that damaged the front end.

In February 1995 number 3008 and a Jordan spreader were involved in a derailment/roll-over incident.

It was rebuilt using number 3018s engineer's cab and returned to service on June 22, 1995.
