

Survey for MG3 and MG9 Permittees

ADEC Air Quality is working to improve the MG3 and MG9 permits. Among our goals, the Department hopes to make a clear, user-friendly, relatable document and seeks input from the users/permittees to accomplish this. Please, take some time to complete the survey below, we value your input. This is an informal survey, at this point used in the development of a potential permit. Your answers will in no way be used to determine compliance status or be used against you in any compliance enforcement case.

Please, use additional sheets if necessary.

1. Are our MG3/MG9 permits easy to understand/interpret? Why, or why not? Are there any topics (e.g. non-road engines) that we can clarify or improve?
2. Where would you like to see improvements in the permit terms or conditions?

<input type="checkbox"/> Reporting?	<input type="checkbox"/> When (or where) to do monitoring like VE observations?
<input type="checkbox"/> Record keeping?	<input type="checkbox"/> VE observation schedule?
<input type="checkbox"/> Periodic stack testing obligations?	<input type="checkbox"/> Other (describe below)?
3. What is the most useful part of the MG3/MG9 permits for you? How could we use this similarly to improve other parts of the permit?
4. Please suggest how we might simplify or modify MG3/MG9 permits.
5. If our monitoring, recordkeeping, and reporting requirements are difficult to follow, how can we improve them?

Survey for MG3 and MG9 Permittees

6. If we included a checklist, table, or a specific section in the permit summarizing all monitoring, recordkeeping, and reporting schedules, deadlines, etc., would you find that beneficial? How about pre-formatted reporting forms? If you have forms or tracking materials that you have developed or found useful, feel free to include those with your response.

7. Does a different semi-annual reporting period work better for you (e.g., a four month winter (off-season) report and an eight month summer report, etc.)?

8. If we had electronic reporting available with standardized forms, would you use it?

9. What else can we do to help you?

Please send completed survey to Amy Hemenway, ADEC Air Permits Program, 410 Willoughby Ave Suite 303, PO Box 111800, Juneau, AK 99811 or amy.hemenway@alaska.gov.

Thank you for your time.
