

**ALASKA DEPARTMENT OF ENVIRONMENTAL CONSERVATION**  
**Division of Air Quality**  
**SITUATION REPORT**  
**AIR QUALITY ADVISORY**  
**Central Interior AK #2011-10**

**LOCATION(S) IMPACTED:** Fairbanks, North Pole, and immediate surrounding areas

**TIME/DATE OF UPDATE:** Monday, February 7, 2011 at 9:00 A.M.

**VALID TIME:** Valid Monday February 7 2011 at 9:00 A.M. until Monday, February 7, 2011 at 4:00 P.M.

**TIME/DATE OF THE NEXT REPORT:** Monday, February 7, 2011 at 4:00 PM.

**ADVISORY:** The current Air Quality Index in Fairbanks, North Pole and the immediate surrounding area is **UNHEALTHY for SENSITIVE GROUPS**. Meteorological conditions are causing poor dispersion conditions. Conditions will be reevaluated on Monday, February 7 at 4 PM. The primary pollutant for the current AQI is PM<sub>2.5</sub> Particulate.

**DEC advises anyone with respiratory illness or heart disease, the elderly, and children to limit prolonged exertion. See the table below for more guidance on the Air Quality Index categories and Cautionary Statements.**

**PUBLIC IMPACT:**

This is an area forecast, and as such is a general forecast for the Fairbanks and North Pole area. Pollution levels will vary depending on precise location, local emission sources, and wind flow patterns. Note that this advisory is based in part on particulate matter readings from the downtown areas of Fairbanks and North Pole and selected other local areas but may not be representative in your area. If you are sensitive to respiratory problems and experience any effects please follow the instructions of your physician.

Residents can take proactive measures to improve air quality by voluntarily reducing wood and coal burning while this air quality advisory is in effect. Residents who need to burn wood should ensure it is seasoned and practice smart burning practices.

State of Alaska Air Quality Control Plan provides the following guidance on wood smoke emission standards: A person may not operate a wood-fired heating device in a manner that causes (1) black smoke; or (2) visible emissions that exceed 50 percent opacity for more than 15 minutes in any one hour in an area for which an air quality advisory is in effect. (Reference: Department of Environmental Conservation, 18 AAC 50 Air Quality Control, Dec 9, 2010)

The following table is the Air Quality Index for Particle Pollution.

<b>AQI level</b>	<b>AQI Category</b>	<b>AQI Cautionary Statements</b>
0-50	Good	None
51-100	Moderate	Unusually sensitive people should consider reducing prolonged or heavy exertion.
101-150	Unhealthy for Sensitive Groups	People with heart or lung disease, the elderly and children should reduce prolonged or heavy exertion.
151-200	Unhealthy	People with respiratory or heart disease, the elderly and children should avoid prolonged exertion; everyone else should limit prolonged exertion.
201-300	Very Unhealthy	People with respiratory or heart disease, the elderly and children should avoid any outdoor activity; everyone else should avoid prolonged exertion.
Over 300	Hazardous	Everyone should avoid any outdoor exertion; people with respiratory or heart disease, the elderly and children should remain indoors.

**CURRENT OPEN BURN RESTRICTIONS:** The Fairbanks North Star Borough prohibits open burning in certain areas during the period from November 1 through the end of February. For information on open burning, please contact the Borough at 459-1312.

For information on this advisory, contact Michael Gravier with the Division of Air Quality at 907-269-7676.
