Re: Site Closure for SS005, Spill/Leak No. 4 at POL Tank Farm (Marine Terminal), Port Heiden RRS, Alaska

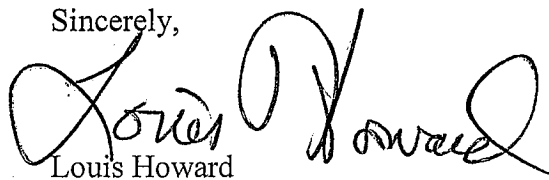

Dear Mr. Roth:

The Alaska Department of Environmental Conservation (ADEC) has received the above document via electronic email on June 19, 2009. The letter requests ADEC concur on the request for site closure of SS005 POL Tank Farm (CS Database Hazard ID 180) located in the Study Area known as the Marine Terminal area. ADEC concurs with the Air Force's request and will assign SS005 a "cleanup complete" status.

In accordance with 18 AAC 75.380 *Final reporting and site closure*, ADEC has determined that: (1) SS005 has been adequately characterized under 18 AAC 75.335 and has achieved the applicable requirements under the site cleanup rules, ADEC is issuing this written determination that the cleanup is complete, subject to a future ADEC determination that the cleanup is not protective of human health, safety, or welfare, or of the environment; or (2) the cleanup and applicable institutional controls are not protective of human health, safety, or welfare, or of the environment, ADEC will, as necessary to ensure protection of human health, safety, or welfare, or of the environment, require the Air Force to conduct additional actions at SS005 that meet the requirements of the site cleanup rules.

If you have any questions regarding this letter, please call me at (907) 269-7552.

Sincerely,

Louis Howard

Environmental Program Specialist
