RE: Request for Confirmation of Completion of Corrective Action
Two-Party Agreement Site 4, Active Landfill, St. George, Alaska

Dear Mr. Lindsay:

The Alaska Department of Environmental Conservation (the Department) received the above document in a December 2003 meeting with National Oceanic and Atmospheric Administration (NOAA). The Department has reviewed the information and, in accordance with Paragraph 59 of the Pribilof Islands Environmental Restoration Two Party Agreement, confirms that no further corrective action is required at this specific site known as the Active Landfill (site 4).

The Department is basing its decision on the most current and complete data provided by NOAA. The Department reserves its rights, under: 18 AAC 75 Oil and Other Hazardous Substances Pollution Control regulations, 18 AAC 60 Solid Waste regulations and AS 46.03 to require NOAA to perform additional investigation, cleanup, or containment if subsequent information indicates that: 1) additional contamination remains at the site which was previously undiscovered, which presents an unacceptable risk to human health, safety, or welfare, or the environment; or 2) the information provided was invalid, incomplete, or fraudulent.

Please contact me with any questions or concerns at (907) 269-7552.

Sincerely,

Louis Howard
Project Manager
