Re: Sunny Chevron Service  
ADEC Spill #1989-23-00-082-01, UST Facility I.D. #0413  
ADEC Approval to Decommission Monitor Wells

Dear Mr. Carroll:

On May 11, 2004, the Kenai Area Office of the Alaska Department of Environmental Conservation (ADEC) received the May 11, 2004 Groundwater Monitor Well Sampling #4 report for the above referenced facility. The report was submitted by Rozak Engineering on your behalf.

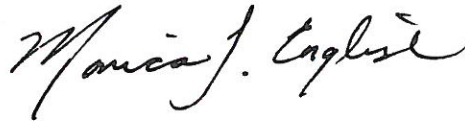

Based on the information provided in this report, and all historic information provided to the ADEC for this facility, we concur with your consultant's recommendation to terminate groundwater monitoring and decommission all monitor wells associated with this project.

The monitor wells must be decommissioned in accordance with departmental guidelines as outlined in the August 26, 1992, document titled "Recommended Practices for Monitoring Well Design, Installation, and Decommissioning". It is our understanding that a short report will be submitted to this office by your consultant once the decommissioning activities are completed.

For future reference, all records of this facility have been routed for filing in the Kenai Area Office under the file name, "Sunny Chevron Service – Homer, ADEC Spill #1989-23-00-082-01, ADEC UST Facility ID #0413".

Thank you for your cooperation in complying with the ADEC's UST release investigation and corrective action regulations. If there are any questions regarding this determination, please feel free to call me at (907) 262-5210, extension #229.

Sincerely,

Monica English  
Environmental Specialist
