DEC Hosting 2011 Pipeline Leak Detection Technology Conference

(JUNEAU, AK) – The Alaska Department of Environmental Conservation (DEC) is hosting a Pipeline Leak Detection Technology Conference September 13 and 14, 2011 at the Sheraton Hotel in Anchorage, Alaska.

The objective of the conference is to better manage environmental risk through identification and potential use of new pipeline leak detection technologies and practices. The Conference will provide vendors, scientists, and research and development entities the opportunity to discuss pipeline leak detection technologies and related practices, and have them reviewed and appraised by DEC.

The conference will include presentations from experts familiar with:

- Vapor Detection Technology;
- Liquid Sensing Solutions;
- Meter-Based Solutions and Related Practices;
- Fiber Optic Technology; and
- Pipeline Leak Detection Meter Technology and Related Practices.

A pipeline leak detection technology users group panel will discuss the challenges faced when selecting leak detection systems. Question and answer sessions will be held following the presentations.

Registration for the conference is free, but is required by Friday, September 9. Please print and bring the registration confirmation page to the on-site check in.

For more information, or to register for the conference, visit:
