

Title V Operating Permit Minor Revision Approval Checklist

Instructions: Permittee fill out the following three boxes

Permittee	
Stationary Source	
Permit Number	

Does the new proposed term or condition:	YES	NO
Allow avoiding a requirement of AS 46.14 or 18 AAC 50?		
Allow significant changes to existing monitoring, recordkeeping or reporting requirements?		
Require or change a case by case determination of an emission limitation or standard?		
Seek to establish or change a permit term or condition?		
Allow a Title I Modification?		

Does the old term or condition establish:	YES	NO
Compliance with ambient air quality standards concentration or visibility requirements?		
Conditions for trading emission increases or decreases at the stationary source?		
BACT, LAER, MACT or ice fog requirements?		

If all answers are "NO" the proposed changes qualify for a minor permit revision. Please note final permit modification will not be issued until after EPA's 45 day review of the permit or until EPA has notified ADEC that they will not object to issuance of the permit modification.

Provide citation of new requirements made applicable under this revision:

List by condition number any condition revised or rescinded by this revision.

Please mail form to both:
