### Background and changes addressed

This packet is being proposed to allow noncrude oil tank vessels and barges with a storage capacity less than 500 barrels to obtain a streamlined plan instead of a standard Oil Discharge Prevention and Contingency Plan. This proposal amends the nontank vessel streamlined plan regulations to apply to noncrude vessels as well. The proposal includes onboard personnel and equipment requirements, as well as training and exercises for noncrude oil tank vessels and barges.

### Understanding the changes

Reading and understanding state regulations can be confusing. To assist you in understanding this draft, please note that state regulations are laid out in the following manner:

**Figure 1. Alaska Regulatory Numbering System**

In the following text, the proposed changes follow the formatting requirements of the “Drafting Manual for Administrative Regulations,” 20<sup>th</sup> Edition, August 2013, as promulgated by the State of Alaska Department of Law. The draft changes are indicated as follows:

Lead-in text explains the changes to the text that follows.

[CAPITALIZED TEXT IN BRACKETS] indicates current regulatory text proposed to be deleted.

**Bolded and underlined** indicates proposed new text that amends the regulation. When an entire section or subsection is new, it is only indicated by the lead in line.

[...] indicates unchanged chunks of regulatory text.
