

Alaska Department of Environmental Conservation State Revolving Fund Program

ADEC awards \$400,000 low-interest wastewater system planning loan to Anchorage Water and Wastewater Utility for the Eagle River Wastewater Treatment Facility Plan

ANCHORAGE - The Alaska Department of Environmental Conservation (ADEC) announces the award of a \$400,000 low-interest loan to the Anchorage Water and Wastewater Utility to update and replace the prior facility plan for the Eagle River Wastewater Treatment Facility.

This project will achieve a number of benefits, including the following:

- Review current and future conditions of the treatment facility
- Ensure compliance with the facility's discharge permit
- Minimize potential for future pollution events

ADEC is authorized by state law to issue loans to borrowers for eligible wastewater system infrastructure projects, including planning and design projects. Administration of the loan is through the ADEC State Revolving Fund program under the authority of the Alaska Clean Water Fund.

The loan from the Alaska Clean Water Fund for this project carries a finance rate of 1.5% payable over 20 years. The Alaska Clean Water Fund is capitalized annually by a grant from the Environmental Protection Agency. The Clean Water State Revolving Fund programs operate around the country to provide states and communities the resources necessary to maintain and improve the infrastructure that protects our valuable water resources nationwide.

If you would like more information about this project, please contact Susan Start at (907) 269-7437 or susan.start@alaska.gov.
