

Chapter 75 Housekeeping Summary of Changes

#	Section (18 AAC 75.###)	Summary of Change	Reason for Change
1.	025(a)	Inclusion of exploration facility and production facility.	Updated to clarify that transfer requirements apply to exploration and production facilities
2.	025(j)	Creation of sub-paragraphs and editorial changes incorporating exploration and production facilities.	Provide clarification on transfer requirements and that the regulations are applicable to exploration and production facilities.
3.	066(d)(2)	Deleted “overfill” from the description of a spill containment system.	Clarify the spill containment system requirement.
4.	066(e)(2)	Deleted “overfill” from the description of a spill containment system.	Clarify the spill containment system requirement.
5.	066(g)(2)	Deleted “overfill” from the description of a spill containment system and minor update.	Clarify the spill containment system requirement and clarify the regulations.
6.	066(i)	Created new subsection to provide clarification of shop-fabricated tank regulatory requirements.	To provide clarity on the applicability of regulatory requirements based upon the storage capacity for shop-fabricated tanks.
7.	080(m)(1-2)	Divided the requirements into sub-paragraphs 1 and 2 to separate the external protection requirements for piping located outside a sufficiently impermeable deck onboard a marine structure and at a soil-to-air interface.	Updated to make the regulation easier to use.
8.	205(b)(3)	Established time frame limitation for financial responsibility application submissions for nontank vessels.	To establish the earliest time that an application can be submitted.
9.	405(b)	Deleted the October 16, 2016 implementation date related to the Article 4 regulation package.	Implementation date has passed.
10.	408(c)(1)	Deleted the October 16, 2016 implementation date related to the Article 4 regulation package.	Implementation date has passed.

Chapter 75 Housekeeping Summary of Changes

#	Section (18 AAC 75.###)	Summary of Change	Reason for Change
11.	408(c)(3)	Deleted the October 16, 2016 implementation date related to the Article 4 regulation package.	Implementation date has passed.
12.	408(c)(7)	Deleted the October 16, 2016 implementation date related to the Article 4 regulation package.	Implementation date has passed.
13.	408(c)(8)	Deleted the October 16, 2016 implementation date related to the Article 4 regulation package.	Implementation date has passed.
14.	410(a)	Deleted the October 16, 2016 implementation date related to the Article 4 regulation package.	Implementation date has passed.
15.	415(c)	Inserted the reference to 18 AAC 75.425(e)(3)(A)(v).	The reference was inadvertently removed from a previous register.
16.	420(a)	Deleted the October 16, 2016 implementation date related to the Article 4 regulation package and a minor update to the language.	Implementation date has passed and clarify language.
17.	425(e)(3)(A)	Editorial changes deleting “activities of the”.	Clarify the regulations.

Chapter 75 Housekeeping Summary of Changes

#	Section (18 AAC 75.###)	Summary of Change	Reason for Change
18.	425(e)(3)(A)(i)	Edits to specify the information requirements (type, capacity, installation date, design, construction, and the product type) for oil storage tanks with a storage capacity of greater than 10,000 gallons.	The language was added to eliminate the need for department guidance document OPC 92-6, which specified the informational requirements for the facility description requirements within the plan relative to tanks at the facility.
19.	425(e)(3)(A)(ii)	Edits to specify the information required to be included within the plan for each oil storage tank with a storage capacity of 1,000 gallons and greater but less than or equal to 10,000 gallons to include the location, storage capacity, and the product type stored;	The language was added to eliminate the need for department guidance document OPC 92-6, which specified the informational requirements for the facility description requirements within the plan relative to tanks at the facility.
20.	425(e)(3)(A)(vi)	Edits to specify the loading or transfer information required to be included within the plan for each oil storage tank with a storage capacity of 1,000 gallons and greater but less than or equal to 10,000 gallons.	The language was added to eliminate the need for department guidance document OPC 92-6, which specified the informational requirements for the facility description requirements within the plan relative to tanks at the facility.
21.	425(e)(4)(A)(ii)	Corrected the citation for the corrosion control system requirement for field-constructed aboveground storage tanks and corrected the term used for the buried metallic piping requirement in 18 AAC 75.080(b).	Previous references were incorrect. The error was an unintentional and incorrect edit which occurred during the 2006 updates.
22.	438(c)	Replaced the term “cargo capacity” with “cargo volume”.	Eliminate confusion with the undefined term “cargo capacity”.
23.	440(b)	Replaced the term “cargo capacity” with “cargo volume”.	Eliminate confusion with the undefined term “cargo capacity”.
24.	455(b)(5)(D)	Deleted the October 16, 2016 implementation date related to the Article 4 regulation package.	Implementation date has passed.
25.	455(c)(3)	Removed “package is complete” language from the paragraph.	Eliminate confusion related to the order of the plan review process.
