

## State of Alaska Moisture Disclosure Wood Seller Registration Program

Seller Name: $\qquad$ Seller ADEC Registration ID: $\qquad$

## Wood is Wet/Frozen

Frozen wood is considered wet unless wood was cut and moisture content measured with a moisture content of $20 \%$ before freezing.

Buyer's Name $\qquad$
I understand that the wood I have purchased has either a measured moisture content or is considered wet. I also understand that wood with a moisture content less than $20 \%$ is considered 'dry' and burns cleaner. In the Fairbanks nonattainment area, I undelstand that starting October 2015, only dry wood may be burned between October 1 - March 31.
