## What is Interior Plumbing?

Interior plumbing (AKA premise plumbing) refers to the pipes and fixtures on the interior of your home or building. This means the pipes supplying water to the sinks, showers, water heaters, pressure tanks, refrigerators, or other fixtures in your building.

## Finding Your Interior Plumbing

Interior plumbing is largely found in the walls of your building. To identify the material, you must find exposed sections of pipe. You can commonly find exposed sections of pipe by your pressure tank, water heater, or under your sink

Copper

Steel

Plastic-PVC

Plastic-HDPE

Plastic-PEX

The color of plastic pipe is NOT an indicator of the type of plastic it is made of. The best way to identify plastic pipe is by the printed markings on the side of the pipe.
