Subject: [SPAM] Comment - Oil and Gas for State of Alaska.

I would like to make a comment that Alaska's Oil and Gas ... should be continuing... We need the resources up in Arctic – Alaska... I live at Barrow, Alaska-where we are dependent on the renewable resources to sustain our livelihood in keeping our homes warm and safe for our families.

Natural Gas heats our homes and that is one of the renewable resources...

Oil comes from Prudhoe Bay area and has sustain supplying U.S. A. for over 29yrs... and still our bills for paying for our gas for vehicles .. is so outrageous.. that the world below us really does benefit.. as the Arctic residence goes through hardship trying to pay for the fuel bills to keep homes warm and to keep vehicles and equipments of all type working...

We need to be heard, we are the natives of Alaska.. and should not be left out of the talks.. considerations need to be made.. sacrifices.. to benefit the few that live in the bush areas of the great State of Alaska.

Sincerely, Vera Williams
