**3. Environmentally-Sensitive Areas and Wildlife Issues**

Site #	Priority	Site Name and/or Physical Location	Site Issues
	1	Anderson Bay	High concentrations of birds and otters.
	2	Estuary on Northeast Side Skan Bay	Pink Salmon Spawning.
	3	Head of east arm Skan Bay	Red and Pink Salmon spawning stream.
	4	Southwest arm Skan Bay	Marine Birds; otters; pink salmon
	***	Bald Eagles	Bald eagles potentially preying on oiled carcasses
	***	Foxes	Fox would potentially pray on oiled carcasses.
		shorebirds including black oystercatchers along intertidal areas	

Narrative

~~-Priority to protect bird conc. and pink/red salmon spawning streams. 10 salmon streams Makushin Bay, 3 heads of streams priority areas for protection, volcano lakes, Humpback Bay, and 2 streams.~~  
~~-Steller's Eiders numbers expected to increase. (Threatened Species)~~  
~~-Emperor Goose numbers expected to increase.~~  
~~-Both Makushin and Skan Bay need on-water and shore based wildlife surveys.~~  
~~-Both bays also important for number of commercial fisheries including bottomfish and crab.~~

**4. Archaeo-cultural and Socio-economic Issues**

Site #	Priority	Site Name and/or Physical Location	Site Issues
1		Makushin Bay	
2		Makushin Point to Volcano Bay	
3		Kof Point to Pumicestone Bay	
4		Konets Head	
5		Unimak Island

# **CULTURAL RESOURCE POLICY**

## **M/V Selendang Ayu Cleanup**

The State of Alaska's policy regarding cultural resources (stated in the Alaska Historic Preservation Act) is:

*"to preserve and protect the historic, prehistoric and archaeological resources of Alaska from loss, desecration and destruction so that the scientific, historic and cultural heritage embodied in these resources may pass undiminished to future generations."*

The Unified Command of this cleanup supports this policy and responders' compliance with state and federal laws protecting cultural resources. The oil spill response includes a program to ensure that cultural resource sites are properly identified and protected during cleanup operations. Response personnel play a key role in this program by being aware of their responsibilities under State and Federal law, and by dealing with sites properly if and when they are encountered. Whenever personnel encounter or discover an archaeological site or artifact, they are required to:

1. Leave cultural materials in place at the site of discovery, and mark their location.
2. Stop cleanup work in the vicinity surrounding the site.
3. Inform the FOSC's Historic Properties Specialist and the Shoreline Cleanup Assessment Team archaeologist immediately.

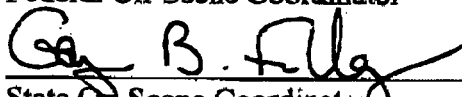

The Alaska Historic Preservation Act prohibits collecting or tampering with protected cultural resources, including artifacts, fossils, human skeletal remains, and other items of antiquity, and *violation of the act is a crime*. In addition, federal concern for cultural resources is expressed in a number of laws and regulations, violation of which may result in significant fines and imprisonment.

**All oil spill response personnel (employees and their contractors) must comply with this Cultural Resource Policy:**

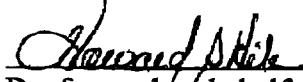

*Anyone found vandalizing, moving, or taking away cultural materials may be subject to disciplinary actions up to and including immediate dismissal from their work, and an incident report may be filed with law enforcement authorities, requesting prosecution under applicable law.*
