

# **Updated Operation Requirements for Soil Treatment Facilities –March 2013 Proposed for Adoption-by-Reference**

## **Summary of Changes**

The current version of the Soil Treatment Facility Guidance dates back to November 2002. The 2013 updated version, Operational Requirements for Soil Treatment Facilities, is largely unchanged. The changes that have been made consist of the following:

1. A new titled removing the word, “guidance” to clarify that the requirements are not optional;
2. Removal of the text, “such as those existing in Anchorage, Fairbanks, Kodiak, or Juneau.” and this is no longer accurate; and
3. Updated formatting.
