

Notes:

- This figure is focused on sulfolane detections. Sulfolane was not detected in private well or monitoring well samples collected outside the area shown.
- If a well has insufficient data points to assess a trend (less than 4 samples) and the analyte was not detected, the well is symbolized with "All Results Non-Detect".
- Overlapping trends are offset from exact well locations for reporting purposes; the deepest well in the cluster is centered on the cluster location.

2015 First Quarter Offsite Sulfolane Trends Monitoring Wells and Private Wells

Monitoring Wells	Private Wells
● All Results Non-Detect	● All Results Non-Detect
● Stable	● Stable
■ Probably Decreasing	■ Probably Decreasing
▼ Decreasing	▼ Decreasing
■ Probably Increasing	■ Probably Increasing
▲ Increasing	▲ Increasing
● No Trend	● No Trend
○ Insufficient Data Points	○ Insufficient Data Points
- - - ND Non-Detect	- - - Approximate Sulfolane Isopleth Regardless of Depth
● Point of Entry (POE) System	 FHRA Property Boundary
