

A. Aleutians

Significant Spills

- M/V Kuroshima ran aground November 26, 1997 (FY98) at Summer Bay near Dutch Harbor, resulting in a release of 39,000 gallons of Bunker C product.
- M/V Selendang Ayu ran aground December 8, 2004 (FY05) at Skan Bay on Unalaska Island, resulting in a release of 321,052 gallons of IFO 380 fuel and 14,680 gallons of diesel.

The Aleutians Subarea includes the southern portion of the Alaska Peninsula as well as the Aleutian archipelago. The major islands in the region include Unimak, Unalaska, Umnak, Atka, Adak, Attu, and the Pribilof Islands of St. George and St. Paul. The region includes two Local Emergency Planning Districts (LEPD): the Aleutians East Borough LEPD and the Aleutian and Pribilof Islands LEPD. Major communities include the cities of Unalaska, Sand Point, and St. Paul. Industrial activity is limited to seafood processing, although Unalaska is a major port for freight into the region and a waypoint for freight shipments to Asia.

The total number of spills in the Aleutians subarea has been on a steady decline since FY96. The average number of spills greater than 1,000 gallons is two per year.

M/V Kuroshima, aground at Summer Bay, Unalaska Island, December 1997.
