EMPTY TANK AFFIDAVIT

The Alaska Department of Environmental Conservation (ADEC) *Empty Tank Affidavit*, Form 18-0503, is used to verify that your underground storage tank (UST) system is empty and meets the definition of “*Taken Out-of-Service*,” in accordance with Title 18 Alaska Administrative Code (AAC) 78, *Underground Storage Tanks*.

- A UST is considered “*Taken Out-of-Service*” when the free petroleum product is removed so that no more than 2.5 centimeters or 1.0 inches of residue, or 0.30 percent by volume, of the total capacity of the system remains (18 AAC 78.020).
- A “*Temporarily Closed*” UST system may still contain petroleum product, *therefore* the Owner and/or Operator is not relieved of the monthly *Release Detection* (RD) monitoring and recordkeeping responsibilities.
- A UST system with the “*Taken Out-of-Service*” designation does relieve an Owner and/or Operator of the monthly RD recordkeeping responsibilities.
- An Owner and/or Operator of a UST system that is “*Taken Out-of-Service*” is required to:
 - Continue to provide proof of Financial Responsibility (18 AAC 78.910)
 - Continue to test and monitor cathodic protection (18 AAC 78.045)
 - Obtain a third-party *UST Operations Inspection* each third year and submit it to the ADEC by September 30th of the year it is due (18 AAC 78.017).
