

**COOK INLET SOUTHEAST ZONE GRS
TACTICS GROUP
MEETING SUMMARY**

September 8, 2004
Islands and Oceans Visitor Center
Homer, Alaska

Attendees:

Dale Gardner- ADEC
John Kwietniak-Tesoro Alaska
Paul Richie- Qualitech
Gary Danielson- CISPRI

Buzz Rome- CISPRI
Mark Fink- ADF&G
Mark Janes- Nuka Research
Tim Robertson- Nuka Research

John Kwietniak opened the meeting.

Tim Robertson gave a reviewed the status of the SECI project. After the edits are incorporated from this meeting, the plans will be placed on the web for review by the Workgroup. Depending on the amount of comments received from the Workgroup the co-chairs will decide on the need for an additional meeting of the Workgroup. Past project have not required the additional meeting. He discussed the upcoming second round of GRS development for Kodiak.

Dale Gardner discussed the publication of the SCP. The expense of printing is becoming prohibitive. It was suggested that the OSRO receive hard copies and all others be sent CDs.

The group began the review of the 22 new GRS for SECI. The group discussed the designation of Port Dick as a Potential Place of Refuge and GRS' needing to ensure that the sensitive areas there are protected. Some of the designated sites in Port Dick are unlikely to be oiled if a spill were to occur outside Port Dick, but would be at risk if a stricken vessel was directed there. The group agreed to keep all sites in Port Dick.

Universal edits are to include:

- The exclusion of logistics/transportation to the sites from the "Implementation" column in the Tables.
- Incorporation of 3 anchors per 200 ft. throughout the plans.
- Change AKDNR to ADNR.
- Numerous maps are to be enlarged to show more detail.
- Chris Wooley will be sent the GRS to determine the cultural resource designation.

Each site was reviewed and edited as necessary.
