

ID	Location and Description	Response Strategy	Implementation	Response Resources	Staging Area	Site Access	Resources Protected (months)	Special Considerations
KGRS-54-01 	<b>Kaflia Bay</b> Nearshore waters in the general area of:  Lat. 58° 15.2 N Lon. 154°11.7 W	<b>Free-oil Recovery</b> Maximize free-oil recovery in the offshore & nearshore environment of Kaflia Bay depending on spill location and trajectory.	Deploy free-oil recovery strike teams upwind and up current of the Kaflia Bay.  Use aerial surveillance to locate incoming slicks.	Deploy multiple free-oil recovery strike teams as required to maximize interception of oil before it impacts sensitive areas.	Vessel platform	Via marine waters  Chart 16603-1	Same as KGRS-54-02	Vessel master should have local knowledge.  Use extreme caution, shoal waters with numerous reefs and rocks.
KGRS-54-02 	<b>Kaflia Bay</b> a. Lat. 58° 15.04 N Lon. 154°13.56 W  b. Lat. 58° 11.50 N Lon. 154°29.12 W	<b>Exclusion</b> Exclude oil from impacting the identified salmon streams in Kaflia Bay.	Deploy anchors and boom with skiffs (class 6) at high tide.  For (a), place 30 ft. of tidal-seal boom across the identified stream. For (b), place 350 ft. of protected-water boom across the intertidal area and mouth of the identified stream.  Tend throughout the tide.  <u>Boom Lengths:</u> a. 30 ft. tidal-seal boom  b. 350 ft. protected-water boom	<b>Deployment Equipment</b> 350 ft. protected-water boom 30 ft. tidal-seal boom 2 ea. small anchor systems 8 ea. anchor stakes <b>Vessels</b> 1 ea. class 3 1 ea. class 6 <b>Personnel/Shift</b> 5 ea. vessel crew/general techs <b>Tending Vessels</b> 1 ea. class 3 1 ea. class 6 <b>Personnel/Shift</b> 3 ea. vessel crew/general techs	Vessel platform	Via marine waters  Chart 16603-1	Fish- intertidal spawning- salmon (May-Sept.), herring (April-May)  Birds-waterfowl concentration, eagle nesting, seabird nesting  Marine mammals- otters, seal,  Habitat- marsh, sheltered rocky shoreline, sheltered tidal flats.	Vessel master should have local knowledge.  A large population of bears forage on the tidal flats in the spring and are present during salmon runs. A bear guard is required during these periods.  Site surveyed: 7/13/06 KGRS Tactics Committee.  Title 41 - Fish Habitat Permit required from ADNR.  Tested: not yet
KGRS-54-03 	<b>Kaflia Bay</b> Lat. 58° 11.61 N Lon. 154°17.99 W	<b>Passive Recovery</b> Place passive recovery boom or line across the identified stream.	At high tide, use a skiff(class 6) to place and anchor snare line or sorbent boom across the identified stream.  Replace as necessary to maximize the recovery.	<b>Deployment Equipment</b> 100 ft. snare line or sorbent boom 1 ea. small anchor systems <b>Vessels/Personnel/Shift</b> Same as KGRS-54-02 <b>Tending Vessels/Personnel/Shift</b> Same as KGRS-54-02	Vessel platform	Via marine waters  Chart 16603-1	Same as KGRS-54-02	Vessel master should have local knowledge.  Use snare line for persistent oils and sorbent boom for non-persistent oils.  Tested: not yet
