KGRS-65-01 	Wide Bay-West Nearshore waters in the general area of: Lat. 57° 19.6 N Lon. 156°26.8 W	Free-oil Recovery Maximize free-oil recovery in the offshore & nearshore environment of Wide Bay-West depending on spill location and trajectory.	Deploy free-oil recovery strike teams upwind and up current of the Wide Bay-West. Use aerial surveillance to locate incoming slicks.	Deploy multiple free-oil recovery strike teams as required to maximize interception of oil before it impacts sensitive areas.	Vessel Platform	Via marine waters Chart 16103-1	Same as KGRS-65-02	Vessel master should have local knowledge. Use extreme caution, shoal waters with numerous reefs and rocks.

Lat. 57° 23.04 N Lon. 156°24.32 W h. Lat. 57° 21.20 N Lon. 156°27.59 W After initial deployment efforts should be made to locate these streams and exclude from oil.	Exclusion Exclude oil from impacting the identified salmon streams in Wide Bay-West.	Deploy anchors and boom with skiffs (class 6) at high tide. All arrays are completed with tidal-seal boom. Place the boom across the streams at the high tide mark. Tend throughout the tide. <u>Boom Lengths:</u> a. 200 ft. b. 25 ft. c. 50 ft. d. 50 ft. e. 100 ft. f. 500 ft. g. 50 ft. (estimate) h. 50 ft. Human use: commercial fishing	Vessel master should have local knowledge. A large population of bears forage on the tidal flats in the spring and are present during salmon runs. A bear guard is required during these periods. Due to the extreme tidal flats and danger of stranding, 2 skiffs are recommended to deploy and tend this GRS.
